

Of Alien Interview The New Earth

NEW YORK TIMES BEST SELLER • The epic story of the greatest quest in all of science—the holy grail of physics that would explain the creation of the universe—from renowned theoretical physicist and author of *The Future of the Mind* and *The Future of Humanity* When Newton discovered the law of gravity, he unified the rules governing the heavens and the Earth. Since then, physicists have been placing new forces into ever-grander theories. But perhaps the ultimate challenge is achieving a monumental synthesis of the two remaining theories—relativity and the quantum theory. This would be the crowning achievement of science, a profound merging of all the forces of nature into one beautiful, magnificent equation to unlock the deepest mysteries in science: What happened before the Big Bang? What lies on the other side of a black hole? Are there other universes and dimensions? Is time travel possible? Why are we here? Kaku also explains the intense controversy swirling around this theory, with Nobel laureates taking opposite sides on this vital question. It is a captivating, gripping story; what's at stake is nothing less than our conception of the universe. Written with Kaku's trademark enthusiasm and clarity, this epic and engaging journey is the story of *The God Equation*.

Now in paperback, returning to the universe of New York Times Notable book *This Alien Shore* comes a new space opera from an acknowledged master of science fiction. When deep-space travel altered the genes of the first interstellar colonists, Earth abandoned them. But some of the colonies survived, and a new civilization of mental and physical "Variants" has been established, centered around clusters of space stations known as the outworlds. Now the unthinkable has happened: a suicide assault has destroyed the life support system of a major waystation. All that is known about the young men responsible is that in their last living moments they were receiving messages from an uninhabited sector of space, and were playing a virtual reality game. Two unlikely allies have joined forces to investigate the incident: Ru Gaya, a mercenary explorer with a taste for high risk ventures, and game designer Micah Bello, who must find the parties responsible for the attack in order to clear his name. From the corridors of a derelict station lost to madness to an outlaw stronghold in the depths of uncharted space, the two now follow the trail of an enemy who can twist human minds to his purpose, and whose plans could bring about the collapse of outworld civilization. In this first Portfolio of over 200 Spirit images by healer/artist AHONU, soul essence images of the client (reproduced by kind permission) are used to remove blockages and provide instant and long term healing in the here and now. His Spirit Art, Soul Portraits & Ancestral Healing pictures are commissioned from all over the world and include a comprehensive, deep analysis. Also in this volume are the first of the unique Ancestral Healing (Family Crest) images.

Pan, the Greek god of forests, shepherds and fertility, has long represented the pagan gods in general. With the advent of the Christian church communication with the pagan gods was very heavily suppressed by priests who have a vested interest in eliminating religious competition, by any means required, including, but not limited to lying, stealing, cheating, murder, mayhem, extortion, torture and blackmail. As a result, general public attention to the pagan gods disappeared about 2,000 years ago. PAN-God of the Woods assumes that the pagan gods may still be active, living beings. If any

of the ancient gods are still around in the 21st century, what are they doing now? If they are here now -- still watching, still powerful, still immortal -- where or how might we contact them? If Pan is still around which of us mortals could not use the helping hand of a friendly god once in awhile? -- Lawrence R. Spencer

This "compellingly hard-hitting" bestseller from a Pulitzer Prize finalist gives readers the complete untold story of the top-secret military base for the first time (New York Times). It is the most famous military installation in the world. And it doesn't exist. Located a mere seventy-five miles outside of Las Vegas in Nevada's desert, the base has never been acknowledged by the U.S. government — but Area 51 has captivated imaginations for decades. Myths and hypotheses about Area 51 have long abounded, thanks to the intense secrecy enveloping it. Some claim it is home to aliens, underground tunnel systems, and nuclear facilities. Others believe that the lunar landing itself was filmed there. The prevalence of these rumors stems from the fact that no credible insider has ever divulged the truth about his time inside the base. Until now. Annie Jacobsen had exclusive access to nineteen men who served the base proudly and secretly for decades and are now aged 75-92, and unprecedented access to fifty-five additional military and intelligence personnel, scientists, pilots, and engineers linked to the secret base, thirty-two of whom lived and worked there for extended periods. In Area 51, Jacobsen shows us what has really gone on in the Nevada desert, from testing nuclear weapons to building super-secret, supersonic jets to pursuing the War on Terror. This is the first book based on interviews with eye witnesses to Area 51 history, which makes it the seminal work on the subject. Filled with formerly classified information that has never been accurately decoded for the public, Area 51 weaves the mysterious activities of the top-secret base into a gripping narrative, showing that facts are often more fantastic than fiction, especially when the distinction is almost impossible to make.

A special fiftieth anniversary edition of Kurt Vonnegut's masterpiece, "a desperate, painfully honest attempt to confront the monstrous crimes of the twentieth century" (Time), featuring a new introduction by Kevin Powers, author of the National Book Award finalist *The Yellow Birds* Selected by the Modern Library as one of the 100 best novels of all time *Slaughterhouse-Five*, an American classic, is one of the world's great antiwar books. Centering on the infamous World War II firebombing of Dresden, the novel is the result of what Kurt Vonnegut described as a twenty-three-year struggle to write a book about what he had witnessed as an American prisoner of war. It combines historical fiction, science fiction, autobiography, and satire in an account of the life of Billy Pilgrim, a barber's son turned draftee turned optometrist turned alien abductee. As Vonnegut had, Billy experiences the destruction of Dresden as a POW. Unlike Vonnegut, he experiences time travel, or coming "unstuck in time." An instant bestseller, *Slaughterhouse-Five* made Kurt Vonnegut a cult hero in American literature, a reputation that only strengthened over time, despite his being banned and censored by some libraries and schools for content and language. But it was precisely those elements of Vonnegut's writing—the political edginess, the genre-bending inventiveness, the frank violence, the transgressive wit—that have inspired generations

of readers not just to look differently at the world around them but to find the confidence to say something about it. Authors as wide-ranging as Norman Mailer, John Irving, Michael Crichton, Tim O'Brien, Margaret Atwood, Elizabeth Strout, David Sedaris, Jennifer Egan, and J. K. Rowling have all found inspiration in Vonnegut's words. Jonathan Safran Foer has described Vonnegut as "the kind of writer who made people—young people especially—want to write." George Saunders has declared Vonnegut to be "the great, urgent, passionate American writer of our century, who offers us . . . a model of the kind of compassionate thinking that might yet save us from ourselves." Fifty years after its initial publication at the height of the Vietnam War, Vonnegut's portrayal of political disillusionment, PTSD, and postwar anxiety feels as relevant, darkly humorous, and profoundly affecting as ever, an enduring beacon through our own era's uncertainties. "Poignant and hilarious, threaded with compassion and, behind everything, the cataract of a thundering moral statement."—The Boston Globe

Dieses Buch ist allen Unsterblichen Spirituellen Wesen gewidmet, egal ob sie sich selbst als solche darüber bewusst sind oder nicht. Es ist ganz besonders der Weisheit, dem Mut und der Integrität jener Wesen gewidmet, welche in unterschiedlichen Inkarnationen in unterschiedlichen Zeiten während der Vergangenheit, in der Gegenwart und in der Zukunft die Flamme der Wahrheit anzünden und in die dunkelsten Ecken dieses Universums tragen. Diese Widmung gilt nicht nur den philosophischen Lehren und Techniken, die von diesen Wesen entwickelt wurden, sondern auch dem gezeigten und bewiesenen Mut, ihre Philosophien angesichts überwältigender Ignoranz, offenkundiger Feindseligkeit und aggressiver Unterdrückung durch unbedeutende Wesen und durch die selbstsüchtigen, eigennützligen Interessen von intergalaktischen und planetarischen politischen, wirtschaftlichen und religiösen Institutionen anzuwenden und zu verbreiten.

The "Readers Edition" is a simplified version of the book, ALIEN INTERVIEW. It does NOT include FOOTNOTES, INDEX or TABLE OF CONTENTS. Only the letters, personal notes and copies of top secret government interview transcripts from Roswell, N.M.. The interviews were conducted with the pilot of a crashed UFO at the US Army Air Force Base in July and August of 1947 under government direction by Flight Nurse Matilda O'Donnell MacElroy. (deceased) A piercing and scientifically grounded look at the emergence of the coronavirus pandemic and how it will change the way we live—"excellent and timely." (The New Yorker) Apollo's Arrow offers a riveting account of the impact of the coronavirus pandemic as it swept through American society in 2020, and of how the recovery will unfold in the coming years. Drawing on momentous (yet dimly remembered) historical epidemics, contemporary analyses, and cutting-edge research from a range of scientific disciplines, bestselling author, physician, sociologist, and public health expert Nicholas A. Christakis explores what it means to live in a time of plague—an experience that is paradoxically uncommon to the vast majority of humans who are alive, yet deeply fundamental to our species. Unleashing new divisions in our society as well as opportunities for cooperation, this 21st-century pandemic has upended our lives in ways that will test, but not vanquish, our already frayed collective culture. Featuring new,

provocative arguments and vivid examples ranging across medicine, history, sociology, epidemiology, data science, and genetics, Apollo's Arrow envisions what happens when the great force of a deadly germ meets the enduring reality of our evolved social nature.

More than half of American adults and more than seventy-five percent of young Americans believe in intelligent extraterrestrial life. This level of belief rivals that of belief in God. American Cosmic examines the mechanisms at work behind the thriving belief system in extraterrestrial life, a system that is changing and even supplanting traditional religions. Over the course of a six-year ethnographic study, D.W. Pasulka interviewed successful and influential scientists, professionals, and Silicon Valley entrepreneurs who believe in extraterrestrial intelligence, thereby disproving the common misconception that only fringe members of society believe in UFOs. She argues that widespread belief in aliens is due to a number of factors including their ubiquity in modern media like The X-Files, which can influence memory, and the believability lent to that media by the search for planets that might support life. American Cosmic explores the intriguing question of how people interpret unexplainable experiences, and argues that the media is replacing religion as a cultural authority that offers believers answers about non-human intelligent life.

A comprehensive and definitive volume telling the complete story of how Alien was made, featuring new interviews with Ridley Scott and other production crew, and including many rarely-seen photos and illustrations from the Fox archives. In 1979 a movie legend was born, as Twentieth Century-Fox and director Ridley Scott unleashed Alien - and gave audiences around the world the scare of their lives. To celebrate the movie's fortieth anniversary, author J.W. Rinzler (The Making of Star Wars) tells the whole fascinating story of how Alien evolved from a simple idea in the mind of writer Dan O'Bannon into one of the most memorable sci-fi horror thrillers of all time. With brand new interviews with Ridley Scott and other key members of the original production crew, and featuring many never-before-seen photographs and artworks from the archives, The Making of Alien is the definitive work on this masterpiece of popular cinema.

Bill Cooper, former United States Naval Intelligence Briefing Team member, reveals information that remains hidden from the public eye. This information has been kept in Top Secret government files since the 1940s. His audiences hear the truth unfold as he writes about the assassination of John F. Kennedy, the war on drugs, the Secret Government and UFOs. Bill is a lucid, rational and powerful speaker who intent is to inform and to empower his audience. Standing room only is normal. His presentation and information transcend partisan affiliations as he clearly addresses issues in a way that has a striking impact on listeners of all backgrounds and interests. He has spoken to many groups throughout the United States and has appeared regularly on many radio talk shows and on television. In 1988 Bill decided to "talk" due to events then taking place worldwide, events which he had seen plans for back in the early '70s. Since Bill has been "talking,"

he has correctly predicted the lowering of the Iron Curtain, the fall of the Berlin Wall and the invasion of Panama. All Bill's predictions were on record well before the events occurred. Bill is not a psychic. His information comes from Top Secret documents that he read while with the Intelligence Briefing Team and from over 17 years of thorough research. "Bill Cooper is the world's leading expert on UFOs." -- Billy Goodman, KVEG, Las Vegas. "The onlt man in America who has all the pieces to the puzzle that has troubled so many for so long." -- Anthony Hilder, Radio Free America "William Cooper may be one of America's greatest heros, and this story may be the biggest story in the history of the world." -- Mills Crenshaw, KTALK, Salt Lake City. "Like it or not, everything is changing. The result will be the most wonderful experience in the history of man or the most horrible enslavement that you can imagine. Be active or abdicate, the future is in your hands." -- William Cooper, October 24, 1989.

Discover who the aliens are - the benevolent ones and those who mean us harm - and what they want from us. Here is the ultimate field guide to the 82 extraterrestrial species that populate the universe. Fully illustrated throughout. This is the ultimate field guide to the 82 extraterrestrial species that populate the universe. ET enthusiast Craig Campobasso explores the origins, physical characteristics, technological and consciousness abilities, dimensional capacities, belief systems, and cosmic agendas of each of the species. The species fall into two categories: 1) benevolent races, which function as the guardians of humanity, whose goals include helping people overcome duality, healing, and protecting; and 2) malevolent races, which are responsible for abductions, cloning, and ultimately domination. This intergalactic expose will entertain all those interested in UFOs, aliens, ETs. Sci-fi and fantasy fans of the Marvel universe; Star Trek, Star Wars, and other popular TV shows like Ancient Aliens; Roswell, and Project Blue Book are prime targets for this book that delves deep into who the real extraterrestrials are and what they want with the people of Earth.

Could "UFOs" and "Aliens" simply be us, but from the future? This provocative new book cautiously examines the premise that extraterrestrials may instead be our distant human descendants, using the anthropological tool of time travel to visit and study us in their own hominin evolutionary past. Dr. Michael P. Masters, a professor of biological anthropology specializing in human evolutionary anatomy, archaeology, and biomedicine, explores how the persistence of long-term biological and cultural trends in human evolution may ultimately result in us becoming the ones piloting these disc-shaped craft, which are likely the very devices that allow our future progeny to venture backward across the landscape of time. Moreover, these extratempestrials are ubiquitously described as bipedal, large-brained, hairless, human-like beings, who communicate with us in our own languages, and who possess technology advanced beyond, but clearly built upon, our own. These accounts, coupled with a thorough understanding of the past and modern human condition, point to the continuation of established

biological and cultural trends here on Earth, long into the distant human future.

The content of this book is the letter, Top Secret interview transcripts and personal notes received from the late Matilda O'Donnell MacElroy, an Army Air Force nurse who stationed at the Roswell Army Air Field 509th Bomb Group. Her letter asserts that this material is based on a series of interviews she conducted with an extraterrestrial being as part of her official duty as a nurse in the U.S. Army Air Force. During July and August she interviewed a saucer pilot who crashed near Roswell, New Mexico on July 8th, 1947. The being identified itself as an officer, pilot and engineer of The Domain Expeditionary Force, a race of beings who are using the asteroid belt in our solar system as a intergalactic base of operations.

The Believer is the weird and chilling true story of Dr. John Mack. This eminent Harvard psychiatrist and Pulitzer Prize-winning biographer risked his career to investigate the phenomenon of human encounters with aliens and to give credibility to the stupefying tales shared by people who were utterly convinced they had happened. Nothing in Mack's four decades of psychiatry had prepared him for the otherworldly accounts of a cross-section of humanity including young children who reported being taken against their wills by alien beings. Over the course of his career his interest in alien abduction grew from curiosity to wonder, ultimately developing into a limitless, unwavering passion. Based on exclusive access to Mack's archives, journals, and psychiatric notes and interviews with his family and closest associates, The Believer reveals the life and work of a man who explored the deepest of scientific conundrums and further leads us to the hidden dimensions and alternate realities that captivated Mack until the end of his life.

One myth from the history of every great civilization spoke of beings descending from heaven and using human and animal DNA to create giant offspring. Rabbinical authorities Septuagint translators and early church fathers understood this as a factual record of history. The phenomenon began with the Watchers who spawned Nephilim resulting in judgment from God. The ancients also knew Bible passages that predict the Nephilim will return when Iraq and Iran are invaded and destroyed. Is this prophecy about to be fulfilled Is man in his rush to play god through biological weapons biotechnology and genetic manipulation opening gateways to a supernatural unknown Nephilim Stargates and the Return of the Watchers is a glimpse into this past present and future phenomena with an eye on what sages and scientists believe and what futurists and prophets may fear. U.S. Air Force Major George Filer belongs to the generation of pilots and airmen who first became aware of the strange aircraft showing up in the Earth's atmosphere after World War II. These men - military professionals who flew planes, commanded ships, served as radar operators and air traffic controllers at air fields around the world - began to whisper amongst themselves about encounters with suspected extraterrestrial aircraft. During secret debriefings at U.S. bases, pilots and air crew told their commanders of seeing strange lights at night and in the daylight, groups of saucer- or cigar-shaped craft that easily paced them just a few yards off their plane's wingtip. Award-winning investigative reporter John Guerra spent four years interviewing Filer, a decorated intelligence officer. From objects in the skies over Cold War Europe to a UFO overflight during the Cuban Missile Crisis to strange lights over the DMZ during the Tet Offensive, Filer leaves nothing out about his Air Force UFO encounters, providing Guerra all the amazing details of his six decades investigating extraterrestrials and

their craft. Filer's most memorable case - the shooting of an alien at Fort Dix Army Base in 1978 - is fully recounted for the first time in this book. Filer - who readers have seen on countless UFO documentaries - is also a member of the Disclosure Project, the famous panel of military experts, astronauts, and scientists that urges the U.S. government to release all it knows about UFOs to the public. Then, in the fall of 2017, the Pentagon released the F-18 gun camera footage of what can only be described as an extraterrestrial vehicle outperforming U.S. Navy fighters off San Diego. For the first time, after decades of denying what its intelligence officers, pilots, base commanders and air traffic control personnel know to be true, the military finally admitted to what Filer describes in this incredible book.

Since 1947, the mysterious crash of an unidentified aircraft at Roswell, New Mexico, has fueled a firestorm of speculation and controversy with no conclusive evidence of its extraterrestrial origin -- until now. Colonel Philip J. Corso (Ret.), a member of President Eisenhower's National Security Council and former head of the Foreign Technology Desk at the U.S. Army's Research & Development department, has come forward to tell the whole explosive story. Backed by documents newly declassified through the Freedom of Information Act, Colonel Corso reveals for the first time his personal stewardship of alien artifacts from the crash, and discloses the U.S. government's astonishing role in the Roswell incident: what was found, the cover-up, and how these alien artifacts changed the course of 20th century history. **INSTANT NEW YORK TIMES BESTSELLER** "Provocative and thrilling ... Harvard's top astronomer lays out his controversial theory that our solar system was recently visited by advanced alien technology from a distant star. In late 2017, scientists at a Hawaiian observatory glimpsed an object soaring through our inner solar system, moving so quickly that it could only have come from another star. Avi Loeb, Harvard's top astronomer, showed it was not an asteroid; it was moving too fast along a strange orbit, and left no trail of gas or debris in its wake. There was only one conceivable explanation: the object was a piece of advanced technology created by a distant alien civilization. In *Extraterrestrial*, Loeb takes readers inside the thrilling story of the first interstellar visitor to be spotted in our solar system. He outlines his controversial theory and its profound implications: for science, for religion, and for the future of our species and our planet. A mind-bending journey through the furthest reaches of science, space-time, and the human imagination, *Extraterrestrial* challenges readers to aim for the stars—and to think critically about what's out there, no matter how strange it seems.

Non-fiction: *Aliens Answer* contains the transcripts of interviews with off-planet beings (aliens). Ms. Barr, certified hypnotherapist and behavioral therapist, placed client Steve Reichmuth under deep hypnotic induction. While in this state, the question was posed, "Are there any non-earth beings who wanted to make contact?" A being came through Steve who described himself as being from Zeta Reticuli. He told us that we could call him "Han." The initial contact was so intriguing that the therapist prepared detailed, probing questions for ensuing interviews. The questions covered the sociology and science of these beings, as well as history, biology, physics, mysteries of the Universe, and much more. Early in the sessions Han introduced Zestra and Gen. Zestra is his partner and a healer. Gen is in training for making diplomatic contact with various life forms. All three worked together to answer the questions posed by the therapist. The rich answers validate the reality of these off-planet beings. Some physical incidents also helped validate the truth of these contacts. The therapist arranged for testing of

this communication by bringing these beings through another individual, a medical doctor. The same bright and engaging being called Han easily came through this second individual, as well as Zestra and Gen. This is an ongoing communication. Readers are invited to submit their questions for these beings to: behavior.therapy@yahoo.com. If appropriate, these questions will be posed during future sessions.

Impeccably researched, this riveting journalistic investigation separates fact from fiction, and documents the existence of—and government reactions to—actual UFOs.

This taut, true thriller dives into a dark world that touches us all, as seen through the brilliant, breakneck career of an extraordinary hacker--a woman known only as Alien. When she arrived at MIT in the 1990s, Alien was quickly drawn to the school's tradition of high-risk physical trespassing: the original "hacking." Within a year, one of her hallmates was dead and two others were arraigned. Alien's adventures were only just beginning. After a stint at the storied, secretive Los Alamos National Laboratory, Alien was recruited by a top cybersecurity firm where she deployed her cache of virtual weapons--and the trespassing and social engineering talents she had developed while "hacking" at MIT. The company tested its clients' security by every means possible--not just coding, but donning disguises and sneaking past guards and secretaries into the C-suite. Alien now runs a boutique hacking outfit that caters to some of the world's biggest and most vulnerable institutions--banks, retailers, government agencies. Her work combines devilish charm, old-school deception, and next generation spycraft. In *Breaking and Entering*, cybersecurity finally gets the rich, character-driven, fast-paced treatment it deserves.

How do people come up with truly original ideas? The answer is to think outside the box—way outside. For the past decade, Cyril Bouquet, Jean-Louis Barsoux, and Michael Wade, professors of innovation and strategy at IMD Business School, have studied inventors, scientists, doctors, entrepreneurs, and artists. These people, or “aliens,” as the authors call them, are able to make leaps of creativity, and use five patterns of thinking that distinguish them from the rest of us. These five patterns—Attention, Levitation, Imagination, Experimentation, and Navigation—lead to a fresh and flexible approach to problem-solving. Alien thinkers know how to free the imagination so it can detect hard-to-observe patterns. They practice deliberate ways to retreat from the world in order to see the big picture underlying a problem. And they approach ideas in systematic ways that reflect the constraints of reality. Through surprising and compelling stories, the authors show how readers can use this method to develop out-of-this-world ideas. *ALIEN Thinking* can help any of us find innovative solutions to the most difficult problems.

The critically acclaimed author of *Alien: The Cold Forge* takes readers to a rogue colony where terror lurks in the tunnels of an abandoned Weyland-Yutani complex. "Shy" Hunt and the tech team from McAllen Integrations thought they'd have an easy

job--set up environmental systems for the brand new Hasanova Data Solutions colony, built on the abandoned ruins of a complex known as "Charybdis." There are just two problems: the colony belongs to the Iranian state, so diplomacy is strained at best, and the complex is located above a series of hidden caves that contain deadly secrets. When a bizarre ship lands on a nearby island, one of the workers is attacked by a taloned creature, and trust evaporates between the Iranians and Americans. The McAllen Integrations crew are imprisoned, accused as spies, but manage to send out a distress signal... to the Colonial Marines. Offers interviews with people who have reported direct experiences or contact with the UFO phenomema, including an account of the surgical removal of alien implants. From a noted Cambridge zoologist, a wildly fun and scientifically sound exploration of what alien life must be like, using universal laws that govern life on Earth and in space. Scientists are confident that life exists elsewhere in the universe. Yet rather than taking a realistic approach to what aliens might be like, we imagine that life on other planets is the stuff of science fiction. The time has come to abandon our fantasies of space invaders and movie monsters and place our expectations on solid scientific footing. But short of aliens landing in New York City, how do we know what they are like? Using his own expert understanding of life on Earth and Darwin's theory of evolution--which applies throughout the universe--Cambridge zoologist Dr. Arik Kershenbaum explains what alien life must be like: how these creatures will move, socialize, and communicate. For example, by observing fish whose electrical pulses indicate social status, we can see that other planets might allow for communication by electricity. As there was evolutionary pressure to wriggle along a sea floor, Earthling animals tend to have left/right symmetry; on planets where creatures evolved in midair or in soupy tar, they might be lacking any symmetry at all. Might there be an alien planet with supersonic animals? A moon where creatures have a language composed of smells? Will aliens scream with fear, act honestly, or have technology? The Zoologist's Guide to the Galaxy answers these questions using the latest science to tell the story of how life really works, on Earth and in space.

The intriguing, thought provoking, deep and fascinating interview with an alien being living among us. Written as a series of questions and answers, this book covers the experience of life on Earth not only as an alien being, but as one of us as well. This novel is a must read for anyone who has an interest in alien presence on Earth. An anthropological look at the UFO community, told through first-person experiences with researchers in their element as they pursue what they see as a solvable mystery—both terrestrial and cosmic. More than half a century since Roswell, UFOs have been making headlines once again. On December 17, 2017, the New York Times ran a front-page story about an approximately five-year Pentagon program called the Advanced Aerospace Threat Identification Program. The article hinted, and its sources clearly said in subsequent television interviews, that some of the ships in question couldn't be linked to any country. The implication, of course, was that they might be linked to other solar systems. The UFO community—those who had been thinking about, seeing, and analyzing supposed flying saucers (or triangles or chevrons) for years—was surprisingly skeptical of the revelation. Their incredulity and doubt rippled across the internet. Many of the people most invested in UFO reality weren't really buying it. And

as Scoles did her own digging, she ventured to dark, conspiracy-filled corners of the internet, to a former paranormal research center in Utah, and to the hallways of the Pentagon. In *They Are Already Here* we meet the bigwigs, the scrappy upstarts, the field investigators, the rational people, and the unhinged kooks of this sprawling community. How do they interact with each other? How do they interact with “anomalous phenomena”? And how do they (as any group must) reflect the politics and culture of the larger world around them? We will travel along the Extraterrestrial Highway (next to Area 51) and visit the UFO Watchtower, where seeking lights in the sky is more of a spiritual quest than a “gotcha” one. We meet someone who, for a while, believes they may have communicated with aliens. Where do these alleged encounters stem from? What are the emotional effects on the experiencers?
