This revision tool helps readers strengthen their existing knowledge of childhood disorders through Extended Matching Questions (EMQs) on topics frequently asked in Paediatrics examinations, ranging from neonatology to emergency medicine and public health. Detailed answers in each section build comprehension and knowledge. Many medical schools now examine undergraduates using EMQs, but they also feature highly in postgraduate examinations. This revision aid will therefore also be useful to those preparing for postgraduate examinations such as the Diploma of Child Health (DCH) and Membership of the Royal College of Paediatrics and Child Health (MRCPC), as well as foundation doctors on their first paediatric rotations and all those wishing to consolidate their knowledge and understanding of Paediatrics.

The single best answer format of questions is invaluable in assessing a trainee's clinical skills and problem-solving abilities. It allows the trainee to demonstrate application of their knowledge to clinical practice. This book comprises six sets of practice papers. Each set contains 30 single best answer questions which cover topics including clinical anaesthesia, pain and intensive care. The questions are based on the recent changes introduced to the written part of the final FRCA examination. The best possible answer to a given clinical scenario is substantiated by a detailed explanation drawn from recent review articles and textbooks in clinical anaesthesia. These questions will enable candidates to assess their clinical knowledge and skills in problem-solving, data interpretation and decision making. This book is essential study material for candidates sitting postgraduate examinations in anaesthesia and intensive care medicine. It is not only an essential guide for trainees but also an invaluable educational resource for all anaesthetists.

There is a great shortage of MCQs book in Paediatric surgery. To fulfil that need, Dr Muhammad Khalid Syed has prepared this MCQs book. This book provides in depth knowledge of paediatric surgery. For each question readers are asked to select the one best answer. In majority of questions, it is asked to select the false option out of five possible choices. The purpose of this is to provide an abundance of correct information directly rather than writing much details in answer. The topics covered in this book include the Abdomen with inguinal area and genitalia, urology, thoracic surgery, head & neck and soft tissue lesions, orthopaedic, trauma, oncology and vascular and lymphatics. In the end there are MCQs related to anatomy required in paediatric surgery. This book will increase your score, for all paediatric surgical examination, General surgical examination (to cover portion of paediatric surgery) and paediatric medicine examination (to covers the differential diagnosis of surgical conditions).

This book is the unique book with combination of colour atlas of Paediatric surgery and MCQs in Paediatric surgery. In Colour Atlas patient's photos, X-rays, CT scan and MRI can be seen. Among patient's photos there are pre-operative and per-operative photos, as well as photos of complications. My other book "MCQs in Paediatric surgery" also has been merged in this book. This MCQs book is unique in sense, that it provides lot of specific paediatric surgical knowledge directly in MCQs with short and to the point explanations. Atlas gives classical features of disease in images that helps in spot diagnosis of disease. Little explanation about the image is given at side. Nearly all the paediatric surgical cases are gathered at one place. In most of the clinical examination discussion starts from apparent finding, in this regards, this atlas greatly helps in spot diagnosis of the cases. MCQs help in passing theoretical examination. This book is beneficial for all paediatric Surgery examination, general surgical examination to cover portion of pediatric surgery and pediatric medicine examination to cover differential diagnosis of surgical conditions. This Atlas also gives an idea to general practitioner about clinical spot diagnosis of paediatric surgical cases and medical students about awareness of paediatric surgical conditions
