

## Pepper Wine And Wool As The Dynamic Factors Of The Social And Economic Development Of The Middle Ages Intersezioni

This book combines economic history and theory to offer a positive reappraisal of the interaction between demographic forces, urbanization, commercialisation and the role of the state, and their impact on the late medieval economy of the kingdom of Naples.

The Routledge Handbook of Identity and the Environment in the Classical and Medieval Worlds explores how environment was thought to shape ethnicity and identity, discussing developments in early natural philosophy and historical ethnographies. Defining 'environment' broadly to include not only physical but also cultural environments, natural and constructed, the volume considers the multifarious ways in which environment was understood to shape the culture and physical characteristics of peoples, as well as how the ancients manipulated their environments to achieve a desired identity. This diverse collection includes studies not only of the Greco-Roman world, but also ancient China and the European, Jewish and Arab inheritors and transmitters of classical thought. In recent years, work in this subject has been confined mostly to the discussion of texts that reflect an approach to the barbarian as 'other'. The Routledge Handbook of Identity and the Environment in the Classical and Medieval Worlds takes the discussion of ethnicity on a fresh course, contextualising the concept of the barbarian within rational discourses such as cartography, medicine, and mathematical sciences, an approach that allows us to more clearly discern the varied and nuanced approaches to ethnic identity which abounded in antiquity. The innovative and thought-provoking material in this volume realises new directions in the study of identity in the Classical and Medieval worlds. A groundbreaking treatment of heritage survival in African and African American cooking.

In *Ancient Concepts of the Hippocratic*, Lesley Dean-Jones and Ralph Rosen have gathered 19 international authorities in ancient medicine to identify commonalities among the treatises of the Hippocratic Corpus which led scholars of antiquity to group them under one name.
