Fiction. Short Stories. Translated from the Italian by Barbara De Marco. In SARACEN TALES, Italian-born Giuseppe Bonaviri brings a wild newness to the tale of the life of Jesus. In this succession of stories, Bonaviri explores all manners of the known and unknown, the archetypal, the mythological, the symbolic--the life of Jesus is both his material and his point of departure. Part surrealism, part folklore, readers will be amazed at the originality and creativity with which a long-familiar tale is presented. "Bonaviri is a myth-maker, looking simultaneously to the historical past and to the future, to arrive at the a-historical, at cosmic universality"--Franco Zangrilli. Giuseppe Bonaviri was born in 1924 in Sicily. He began writing when he was ten and continued through high school, college, and in his professional life as a doctor, health official, and cardiologist. His work has been widely translated.

Poetry. Translated from the Italian by John Taylor. Bilingual Edition. The first comprehensive translation of a long- neglected poet who lived most of his life in his home village in Calabria, experimented with new forms of expression and produced a body of work radiant with twilight mystery, scintillating perception and philosophical breadth. After his obscure and possibly self- inflicted death, Calogero (1910-1961) was gradually discovered, appreciated and published in prestigious editions. John Taylor's dedicated translation deftly handles the semantic leaps and disjunctions in these subtle but boldly original poems, and his introduction, informed by his visit to the village of Melicuccà and his association with the poet's relatives, offers the perfect guide into a private and renewed world. "Calogero felt the silence that had befallen him (or that he had sought?) as a disaster, as the sum of his misfortunes: he listened to it, analyzed it, wholly filled it with a dense web of meanings and subliminal thoughts at the very limits of vertigo..."—Mario Luzi "[His] authentic and noble message is that of a despair by now so elevated and calm that it retains no traces of romantic sorrow, or existential dismay or anxiety."—Giorgio Caproni "The most surprising gift of this ancient-modern poet is the wealth of violent, risk-taking metaphors. Sometimes he seemingly experiments in the surrealist sense of the term; those techniques he has mastered and surpassed, and his experimentation involves varied, more intricate, and conscious techniques."—Amelia Rosselli

This early work by Sigmund Freud was originally published in 1895 and we are now republishing it with a brand new introductory biography. 'Obsessions and Phobias' is a psychological essay on the distinction between obsessions and phobias and potential reasons for their occurrence. Sigmund Schlomo Freud was born on 6th May 1856, in the Moravian town of Příbor, now part of the Czech Republic. He studied a variety of subjects, including philosophy, physiology, and zoology, graduating with an MD in 1881. Freud made a huge and lasting contribution to the field of psychology with many of his methods still being used in modern psychoanalysis. He inspired much discussion on the wealth of theories he produced and the reactions to his works began a century of great psychological investigation.

The Truth Against the World!

Winner of the Premio Strega, Italy's most prestigious literary award, The Faithful Lover is a sumptuously imagined collection by one of the twentieth century's most renowned writers. Eclectic and astute, these remarkable stories show us that the border between this world and the out-of-this-world may be more permeable than we think. In Encounter, a young man eavesdrops on a pair of ghostly lovers, while in Lights, the whisperings of a mysterious voice steer the unnamed narrator towards an elusive destination. Other stories are grounded in the everyday, showcasing the incisive mix of tragedy and comedy that is central to Bontempelli's work. The upside of insanity creates a moral dilemma for a loving mother in Empress, while in Octogenarian, an elderly woman summons her family to her deathbed for one final, hilarious domestic dispute. The title story pokes brutal fun at the narrators' fleeting affections, and in the renowned novella Water, an ethereal young woman's innocence wrecks havoc on a host of admirers. This is a breathtakingly elegant and unsentimental collection. Bontempelli challenges our view of the world by looking beyond the old ideas to a startling truth, a way of seeing that is an unwavering source of joy and surprise.

Poetry. In ADDICTIVE AVERSIONS we encounter the life-force of sex, expressed in the individual body of the poet, but just as blind, asocial and irresistible, hence the title. Alfredo de Palchi is both tough and imaginative. He is absolutely uncompromising, and his poems are painful and exalting to read. One does not come away from his stark and terrible and hilarious work untouched. James Dickey [De Palchi's poetry] casts a revealing light on the dubious existential foundations of all mankind...these disturbing poems cumulate into a redoubtable wisdom -- The Antioch Review. Translated from the Italian by Sonia Raiziss and others.

This is a fascinating and enjoyable popular science book on gravity and black holes. It offers an absorbing account on the history of research on the universe and gravity from Aristotle via Copernicus via Newton to Einstein. The author possesses high literary qualities and is celebrated relativist. The physics of black holes constitutes one of the most fascinating chapters in modern science. At the same time, there is a fanciful quality associated with this strange and beautiful entity. The black hole story is undoubtedly an adventure through physics, philosophy, history, fiction and fantasy. This book is an attempt to blend all these elements together.

From the Publisher: Jonathan Safran Foer spent much of his teenage and college years oscillating between omnivore and vegetarian. But on the brink of fatherhood-facing the prospect of having to make dietary choices on a child's behalf-his casual questioning took on an urgency. His quest for answers ultimately required him to visit factory farms in the middle of the night, dissect the emotional ingredients of meals from his childhood, and probe some of his most primal instincts about right and wrong. Brilliantly synthesizing philosophy, literature, science, memoir and his own detective work, Eating Animals explores the many fictions we use to justify our eating habits-from folklore to pop culture to family traditions and national myth-and how such tales can lull us into a brutal forgetting. Marked by Foer's profound moral ferocity and unvarying generosity, as well as the vibrant style and creativity that made his previous books, Everything is Illuminated and Extremely Loud and Incredibly Close, widely loved, Eating Animals is a celebration and a reckoning, a story about the stories we've told-and the stories we now need to tell.

Luigi Pirandello (1867-1936), master of style, appeared first as poet, pure in style, severe in inspiration, but later "found himself" in writing humorous tales, novels and especially dramas. His humor, though at bottom sad and almost pessimistic, is not of a quiet sort. To him man appears as a creature more miserable than grotesque, eternally made sport of by the irony of fate. Such is the philosophy in "Signora Speranza", one of the most characteristic of his novellas. In 1934 Pirandello was awarded the Nobel Prize for literature.

Once there was a gospel written in Christ's own hand: a treasure of almost unimaginable magnitude, referred to by the Cathars of medieval France as The Book of Love... Fresh from her successful search for the long-hidden scrolls written by Mary Magdalene, journalist Maureen Pascal now finds herself on the trail of the legendary lost gospel known as the Book of Love. But just as there were those who would stop at nothing to seize and suppress the Book of Love seven centuries ago, so there are those today who are equally determined that its radical message should never be revealed. In a race across Italy and France, new dangers await Maureen and her lover Sinclair as they begin to uncover secrets and shine new light on the hidden corners of Christianity. Combining expert research with dazzling plot twists, The Book of Love is sure to thrill readers as they follow Maureen's search for clues through some of the world's greatest art, architecture and history, until a potentially fatal encounter reveals the Book of Love to her -- and to us.

There was an old woman in China who had supported a monk for over twenty years. She had built a little hut for him and fed him while he was meditating. Finally she wondered just what progress he had made in all this time. To find out, she obtained the help of a girl rich in desire. "Go and embrace him," she told her, "and then ask him suddenly: 'What now?'" The girl called upon the monk and without much ado caressed him, asking him what he was going to do about it. "An old tree grows on a cold rock in winter," replied the monk somewhat poetically. "Nowhere is there any warmth." The girl returned and related what he had said. "To think I fed that fellow for twenty years!" exclaimed the old woman in anger. "He showed no consideration for your need, no disposition to explain your condition. He need not have responded to passion, but at least he could have evidenced some compassion." She at once went to the hut of the monk and burned it down. Paul Roberts, the best-selling author of *The End of Oil*, turns his attention to the modern food economy and finds that the system entrusted to meet our most basic need is failing. In this carefully researched, vivid narrative, Roberts lays out the stark economic realities behind modern food and shows how our system of making, marketing, and moving what we eat is growing less and less compatible with the billions of consumers that system was built to serve. At the heart of *The End of Food* is a grim paradox: the rise of large-scale food production, though it generates more food more cheaply than at any time in history, has reached a point of dangerously diminishing returns. Our high-volume factory systems are creating new risks for food-borne illness, from *E. coli* to avian flu. Our high-yield crops and livestock generate grain, vegetables, and meat of declining nutritional quality. While nearly one billion people worldwide are overweight or obese, the same number of people—one in every seven of us—can't get enough to eat. In some of the hardest-hit regions, such as sub-Saharan Africa, the lack of a single nutrient, vitamin A, has left more than five million children permanently blind. Meanwhile, the shift to heavily mechanized, chemically intensive farming has so compromised soil and water that it's unclear how long such output can be maintained. And just as we've begun to understand the limits of our abundance, the burgeoning economies of Asia, with their rising middle classes, are adopting Western-style, meat-heavy diets, putting new demands on global food supplies. Comprehensive in scope and full of fresh insights, *The End of Food* presents a lucid, stark vision of the future. It is a call for us to make crucial decisions to help us survive the demise of food production as we know it. Paul Roberts is the author of *The End of Oil*, which was a finalist for the New York Public Library's Helen Bernstein Book Award in 2005. He has written about resource economics and politics for numerous publications, including the *Los Angeles Times*, the *Washington Post*, *Harper's Magazine*, and *Rolling Stone*, and lectures frequently on business and environmental issues.

For to us a child is born, to us a son is given; and the government will be upon his shoulder and his name shall be called Wonderful Counselor, Mighty God, Everlasting Father, Prince of Peace. For the early church fathers the prophecy of Isaiah was not a compendium of Jewish history or theology but an announcement of the coming Messiah fulfilled in the life and ministry of Jesus of Nazareth. As such, the prophet's words were a rich source of theological reflection concerning their Lord and a vital aid in their defense against the objections of the Jews that Jesus was the promised Messiah. The interpretation of Jesus' ministry in light of Isaiah's prophecy was not a theological innovation on their part, but rather a following of the path blazed by the New Testament writers and Jesus himself. Among passage-by-passage commentaries cited here are those by Eusebius of Caesarea, Jerome, Cyril of Alexandria and Theodoret of Cyr, as well as one attributed to Basil of Caesarea. John Chrysostom preached a series of homilies on Isaiah of which most of those extant concern the first eight chapters, though Chrysostom frequently cites Isaiah in numerous homilies on other books. Augustine of Hippo, Gregory the Great and Bede the Venerable frequently cited passages from Isaiah 1—39 as did many other fathers in defending the Christian faith from Jewish critics. Edited by Steven A. McKinion, this volume of the *Ancient Christian Commentary on Scripture* offers readers access to materials ranging from East to West and from the first through the eighth centuries, some appearing in English translation for the first time. This represents the first time that Pirandello's *Berecche and the War* has been translated into the English Language. Pirandello's historical novella, set in the months preceding Italy's entry into the First World War, is amongst much else a highly individual contribution to war literature and historical fiction. As he charts the crisis of those times as it affects the carefully constructed identity of his protagonist, he embarks on a radical questioning of nineteenth-century notions of order, method and discipline. Further, his dialogue with historical narrative leads him to explore and expose the fiction inherent in representing historical reality, and the fictions by which we all live.

Author Tom Bisset has talked with those who have left. With openness and honesty, he gets to the heart of the issue by asking basic questions. You'll find insight and practical advice for communicating the Christian faith to the next generation.

Can private law assume an ecological meaning? Can property and contract defend nature? Is tort law an adequate tool for paying environmental damages to future generations? This book explores potential resolutions to these questions, analyzing the evolution of legal thinking in relation to the topics of legal personality, property, contract and tort. In this forward thinking book, Mattei and Quarta suggest a list of basic principles upon which a new, ecological legal system could be based. Taking private law to represent an ally in the defence of our future, they offer a clear characterization of the fundamental legal institutions of common law and civil law, considering the challenges of the Anthropogenic era, technological tools of the Internet era, and the global rise of the commons. Summarizing the fundamental institutions of private law: property rights, legal personality, contract, and tort, the authors reveal the limits of these legal institutions in relation to historical international evolution and their regulation in the contexts of catastrophic ecological issues and technological developments. Engaging and thoughtful, this book will be interesting reading for legal scholars and academics of private law and, in particular, those wishing to understand the role of law when facing technological and ecological challenges.

Describes the impact of nanoparticles and microparticles on human and animal health and offers criteria for preventing potential problems deriving from these particles.

*The Church of Solitude* tells the story of Maria Concezione, a young Sardinian seamstress living with breast cancer at the cusp of the twentieth century. Overwhelmed by the shame of her diagnosis, she decides that no one can know what has happened to her, but the heavy burden of this secrecy changes her life in dramatic ways and almost causes the destruction of several people in her life. This surprising novel paints the portrait of a woman facing the unknown with courage, faith, and self-reliance, and is the last and most autobiographical work of Grazia Deledda, who died of breast cancer in 1936, shortly after its publication. An afterword by the translator offers additional information on the author and examines the social and historical environment of that time.
