Anna Goldsworthy was nine years old when she met Eleanora Sivan, the charismatic Russian émigré and world-class pianist who became her piano teacher. Piano Lessons is the story of what Mrs. Sivan brought to Anna's lessons: a love of music, a respect for life, a generous spirit, and the courage to embrace a musical life. Beautifully written and strikingly honest, Piano Lessons takes the reader on a journey into the heart and meaning of music. As Anna discovers passion and ambition, confronts doubt and disappointment, and learns about much more than tone and technique, Mrs. Sivan's wisdom guides her: "We are not teaching piano playing. We are teaching philosophy and life and music digested." "What is intuition? Knowledge that has come inside." "My darling, we

must sit and work." Piano Lessons reminds us all how an extraordinary teacher can change a life completely. A work that will appeal to all music lovers and anyone who has ever taken a music lesson, Piano Lessons will also touch the heart of anyone who has ever loved a teacher.

A less-expensive grayscale paperback version is available. Search for ISBN 9781680922875. The field of management and organizational behavior exists today in a constant state of evolution and change. Casual readers of publications like the New York Times, The Economist and the Wall Street Journal will learn about the dynamic nature of organizations in today's ever-changing business

environment. Organizational Behavior is designed to meet the scope and sequence requirements of the introductory course on Organizational Behavior. This is a traditional approach to organizational behavior. The table of contents of this book was designed to address two main themes. What are the variables that affect how, when, where, and why managers perform their jobs? What theories and techniques are used by successful managers at a variety of organizational levels to achieve and exceed objectives effectively and efficiently throughout their careers? Management is a broad business discipline, and the Organizational Behavior course covers many areas such as individual and group behavior at work, as well as organizational processes such as communication in the workplace and managing conflict and negotiation. No one individual can be an expert in all areas of management, so an additional benefit of this text is that specialists in a variety of areas have authored individual chapters. Finally, we all made an effort to present a balanced approach to gender and diversity throughout the text in the examples used, the photographs selected, and the use of both male and female in alternating chapters when referring to generic managers or employees.

This timely and hugely practical work provides a score of examples from contemporary and historical scientific presentations to show clearly what makes an oral presentation effective. It considers presentations made to persuade an audience to adopt some course of action (such as funding a proposal) as well as presentations made to communicate information, and it considers these from four perspectives: speech, structure, visual aids, and delivery. It also discusses computer-based projections and slide shows as well as overhead projections. In particular, it looks at ways of organizing graphics and text in projected images and of using layout and design to present the information efficiently and effectively.

Actor. Director. Visionary. The fascinating life of Sam Wanamaker is explored for the first time in this biography by Diana Devlin, who worked closely with Wanamaker during the last twenty years of his life. Sam Wanamaker (1909 - 1993) is best known as the man who spent the last twenty-five years of his life campaigning to reconstruct Shakespeare's Globe near its original site in London. Born in the USA, he trained as an actor in Chicago and began his career during the golden age of radio drama, before moving on to Broadway. A vocal left wing activist, Wanamaker moved to the UK during the turbulent era of the anti-Communist witch hunts. Having crossed the Atlantic, he carved a successful international career as actor, producer and director. He directed the opening production at the Sydney Opera House. With his staunch sense of purpose, he made as many enemies as friends: charismatic and persuasive, he was also stubborn and domineering. But above all, he was a man of great vision, and it was that vision that inspired many to help make his dream of Shakespeare's Globe come into being, which opened to much fanfare in 1997

Universal Economics is a new work that bears a strong resemblance to its two predecessors, *University Economics* (1964, 1967, 1972) and *Exchange and Production* (1969, 1977, 1983). Collaborating again, Professors Alchian and Allen have written a fresh presentation of the analytical tools employed in the economic way of thinking. More than any other principles textbook, *Universal Economics* develops the critical importance of property rights to the existence and success of market economies. The authors explain the interconnection between goods prices and productive-asset prices and how market-determined interest rates bring about the allocation of resources toward the satisfaction of consumption demands versus saving/investment priorities. They show how the crucial role of prices in a market economy cannot be well understood without a firm grasp of the role of money in a modern world. The Alchian and Allen application of information and search-cost analysis to the subject of money, price determination, and

inflation is unique in the teaching of economic principles. No one has ever done price theory better than Alchian that is, no one has ever excelled Alchian's ability to explain the reason, role, and nuances of prices, of competition, and of property rights. And only a precious few can count them on my fingers have a claim for being considered to have done price theory as well as he did it. Donald Boudreaux, George Mason University. Armen A. Alchian (1914-2013), one of the twentieth century's great teachers of economic science, taught at UCLA from 1958 to 1984. Founder of the UCLA tradition in economics, he has become recognized as one of the most influential voices in the areas of market structure, property rights, and the theory of the firm. William R. Allen taught at Washington University prior to joining the UCLA faculty in 1952. Along with research primarily in international economics and the history of economic theory, he has concentrated on teaching economics. Universal Economics is his third textbook collaboration with Armen Alchian. Jerry L. Jordan wrote his doctoral dissertation under the direction of Armen Alchian. He was Dean of the School of Management at the University of New Mexico, a member of President Reagan's Council of Economic Advisors and of the U.S. Gold Commission, Director of Research of the Federal Reserve Bank of Saint Louis, and President and CEO of the Federal Reserve Bank of Cleveland.
