Myth criticism flourished in the mid-twentieth century under the powerful influence of Canadian thinker Northrop Frye. It asserted the need to identify common, unifying patterns in literature, arts, and religion. Although it was eclipsed by postmodern theories that asserted difference and conflict, those theories proved incapable of inspiring solidarity or guiding social action. The Productions of Time argues for a return to myth criticism in order to refine and extend its vision. With the aim of rehabilitating myth criticism for our time, Michael Dolzani sketches an anatomy of the imagination as demonstrated in the total body of its productions, including literature, mythology, the arts, popular culture, and religious and political texts. Dolzani situates a vast panoply of images, character types, plot structures, themes, and genres to better understand their purposes, their recurrences across broad spans of history, and their interrelations.

Illustrating the relationship between mythology and history, The Productions of Time proposes a symbolic language as a way of enabling dialogue across ideological and individual differences. Arguing for the ethical and intellectual necessity of conceiving a unifying pattern that transcends differences, The Productions of Time demonstrates that imagination is part of the human inheritance, common to all, not just to poets and mystics.

novel about the terrors of state surveillance, from the acclaimed author of *The Housekeeper and the Professor*. On an unnamed island, objects are disappearing: first hats, then ribbons, birds, roses. . . . Most of the inhabitants are oblivious to these changes, while those few able to recall the lost objects live in fear of the draconian Memory Police, who are committed to ensuring that what has disappeared remains forgotten. When a young writer discovers that her editor is in danger, she concocts a plan to hide him beneath her floorboards, and together they cling to her writing as the last way of preserving the past. Powerful and provocative, *The Memory Police* is a stunning novel about the trauma of loss. With a wickedly witty touch, Elkin's essays takes readers on a tour of American life in the 20th century. Stanley Elkin was one of our great American writers. "A divine exploiter of the idiocies and intricacies of our language," as John Irving put it, and nowhere is that more clear than this collection of essays, which find Elkin wresting hilarity and heartbreak from the most unlikely of sources.

champagne, accept the shiny new title, and step into this thrilling next chapter of your career, the truth descends like a fog: you don't really know what you're doing. That's exactly how Julie Zhuo felt when she became a rookie manager at the age of 25. She stared at a long list of logistics--from hiring to firing, from meeting to messaging, from planning to pitching--and faced a thousand questions and uncertainties. How was she supposed to spin teamwork into value? How could she be a good steward of her reports' careers? What was the secret to leading with confidence in new and unexpected situations? Now, having managed dozens of teams spanning tens to hundreds of people, Julie knows the most important lesson of all: great managers are made, not born. If you care enough to be reading this, then you care enough to be a great manager. *The Making of a Manager* is a modern field guide packed everyday examples and transformative insights, including: \* How to tell a great manager from an average manager (illustrations included) \* When you should look past an awkward interview and hire someone anyway \* How to build trust with your reports through not being a boss \* Where to look when you lose faith and lack the answers Whether you're new to the job, a veteran leader, or looking to be promoted, this is the handbook you need to be the kind of manager you wish you had.

"Perhaps the best book by the foremost stylist of his generation" (New York Times), J. D. Salinger's *Franny and Zooey* collects two works of fiction about the Glass family originally published in *The New Yorker*. "Everything everybody does is so--I don't know--not wrong, or even mean, or even stupid necessarily. But just so tiny and meaningless and--sad-making. And the worst part is, if you go bohemian or something crazy like that, you're conforming just as much only in a different way." A novel in two halves, *Franny and Zooey* brilliantly captures

the emotional strains and traumas of entering adulthood. It is a gleaming example of the wit, precision, and poignancy that have made J. D. Salinger one of America's most beloved writers. "Fascinating. Doidge's book is a remarkable and hopeful portrait of the endless adaptability of the human brain."—Oliver Sacks, MD, author of *The Man Who Mistook His Wife for a Hat* What is neuroplasticity? Is it possible to change your brain? Norman Doidge's inspiring guide to the new brain science explains all of this and more An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they've transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.

There are two ways of getting home; and one of them is to stay there. The other is to walk round the whole world till we come back to the same place; and I tried to trace such a journey in a story I once wrote. It is, however, a relief to turn from that topic to another story that I never wrote.

These stories are for anyone who has ever felt they were an outsider, marching to the beat of their own drum and trying to discover some reality hidden within the cliché of modern life, love and work. From the author of *Leaving London* For mature readers. Includes *The Paris Quartet: Short Stories For the End of the World* This is your life and you may just recognize yourself within these seventeen short stories and six plays. If you've ever been in a less than perfect relationship, been trapped in a meaningless job, have found yourself drunk, lost and alone in a new city on Christmas Eve or have simply spent years trying to escape from a situation of your own making then you may just find some comfort within these pages. Contemporary stories of doomed love affairs, cheating spouses and new beginnings in cities such as Paris, New York and London. A family dinner party where the elephant in the room threatens to reveal itself, girlfriends who leave, boyfriends who can't commit and a reclusive anti-hero fighting a corporate giant all make an appearance within this collection of gritty and darkly humorous short stories. -----

----- Reviews This is a wonderful collection of short stories (and plays) which mine deeply emotional and personal territory, which is one of Crystal's major strengths as a writer. All of these stories are deeply relatable and hyper-realistic – you either know these characters or perhaps you have found yourself in these very same situations. Each of them leaves the reader with much more than what is on the surface – ala Ernest Hemingway and/or Raymond Carver – and will have you thinking about them long after you finish reading them. - Julian Gallo, author of *Breathe* Garry Crystal's title for his collection of short stories and one scene plays aptly summarizes a dominant theme at the same time that it seems to dismiss the content as near meaningless. Most of these narratives depict the all too common scene for

thirty-something people in the big city; struggles at recovery from ruined relationships, lapses into sloth, alcohol, drugs, casual, sometimes barely civil, sexual encounters and, of course, depression that blankets these scenes of urban discontent like a grey, palpable fog. For all this, I could not dismiss as dreary cliché this highly entertaining and thought provoking collection. It was fun to read and at some points, downright intriguing. Dark humor and a conversational first person narrator style preserve the several stories of an alienated young urban male from triteness. Situations that, if our jaded narrator did not so masterfully depict them, might be all too familiar for interest. In "The Conversationalists", for example, he endures a mercifully short relationship with the beautiful, but totally self-absorbed Serena. It's the artful recreation of a scene that this reader and, I'm sure, many others have encountered in real life. The difference being that most of us do not in our suffering of a "me personality" interlocutor turn the encounter into a lively and entertaining short story. There are women characters who in dialogue express cogent insights as they relentlessly pursue an evasive and emotionally remote male incapable of authentic commitment. I would think that many women readers would find strong female characters like these quite satisfying. This collection has much to offer to readers from a broad band of tastes who enjoy good story telling. Those who enjoy nuanced meaning and dark ambiguities delivered by way of succinct narration and lively dialogue, these stories are the right stuff. - Online Book Club

'Marsden's Book of Movement Disorders' represents the final work of the late Professor C. Donaldson. It was their intention that this would be the most comprehensive book on movement disorders and also that it would serve as the 'clinical Bible' for the management of these conditions. It provides a masterly survey of the entire topic, which has been made possible only by vast laboratory and bedside experience. The coverage of this comprehensive online resource includes the full breadth of movement disorders, from the underlying anatomy and understanding of basal ganglia function to the diagnosis and management of specific movement disorders, including the more common conditions such as Parkinson's Disease through to very rare conditions such as Neimann-Pick disease. Chapters follow a structured format, featuring historical overviews, definitions, clinical features, differential diagnosis, investigations and treatment covered in a structured way. Figures include many original photographs and diagrams of historical significance, which can all be downloaded as PowerPoint presentations. Among these illustrations are still images of some original film clips of some of Dr. Marsden's patients published here for the first time. Comprehensively referenced, with links through to primary research journal articles, and updated by experts from the Institute of Neurology at Queen Square, 'Marsden's Book of Movement Disorders' is a valuable reference for movement disorder specialists and researchers, as well as clinicians who care for patients with movement disorders.

change. The contrast with Britain's European neighbours, France, Germany, Italy, Spain, Greece, Russia, is dramatic – all have been convulsed by external warfare, revolution and civil war and experienced fundamental change to their ruling elites or social and economic structures. Frank McLynn takes seven occasions when Britain came closest to revolution: the Peasants' Revolt of 1381; the Jack Cade rebellion of 1450; the Pilgrimage of Grace in 1536; the English Civil Wars of the 1640s; the Jacobite Rising of 1745-6; the Chartist Movement of 1838-48; and the General Strike of 1926. Why, at these dramatic turning points, did history finally fail to turn? McLynn examines Britain's history and themes of social, religious and political change to explain why social turbulence stopped short of revolution on so many occasions.

It's Cyn who talks Glo into sharing Raj. Half the time he'll be Cyn's boyfriend, the other half he'll be Glo's. Glo reluctantly accepts the proposition—how can she say no without jeopardizing her friendship?—and for a while, everything goes smoothly. Until Glo realizes that she doesn't know her BFF as well as she thinks. Until the simmering tension between Glo and Cyn boils over during a study abroad trip to Costa Rica. Until Cyn disappears into the jungle of a secluded island, leaving Glo searching for answers. Until, seven years later, Glo spots a familiar pair of blue eyes behind a sweep of blonde hair in the streets of New York City. Is it really Cyn, or is the guilt of survival catching up with Glo? And has Glo told us everything we need to know?

Chronicle). A father and his son walk alone through burned America. Nothing moves in the ravaged landscape save the ash on the wind. It is cold enough to crack stones, and when the snow falls it is gray. The sky is dark. Their destination is the coast, although they don't know what, if anything, awaits them there. They have nothing; just a pistol to defend themselves against the lawless bands that stalk the road, the clothes they are wearing, a cart of scavenged food—and each other. The Road is the profoundly moving story of a journey. It boldly imagines a future in which no hope remains, but in which the father and his son, "each the other's world entire," are sustained by love. Awesome in the totality of its vision, it is an unflinching meditation on the worst and the best that we are capable of: ultimate destructiveness, desperate tenacity, and the tenderness that keeps two people alive in the face of total devastation.

There are 168 hours in a week. This book is about where the time really goes, and how we can all use it better. It's an unquestioned truth of modern life: we are starved for time. With the rise of two-income families, extreme jobs, and 24/7 connectivity, life is so frenzied we can barely find time to breathe. We tell ourselves we'd like to read more, get to the gym regularly, try new hobbies, and accomplish all kinds of goals. But then we give up because there just aren't enough hours to do it all. Or else, if we don't make excuses, we make sacrifices.

To get ahead at work we spend less time with our spouses. To carve out more family time, we put off getting in shape. To train for a marathon, we cut back on sleep. There has to be a better way-and Laura Vanderkam has found one. After interviewing dozens of successful, happy people, she realized that they allocate their time differently than most of us. Instead of letting the daily grind crowd out the important stuff, they start by making sure there's time for the important stuff. They focus on what they do best and what only they can do. When plans go wrong and they run out of time, only their lesser priorities suffer. It's not always easy, but the payoff is enormous. Vanderkam shows that it really is possible to sleep eight hours a night, exercise five days a week, take piano lessons, and write a novel without giving up quality time for work, family, and other things that really matter. The key is to start with a blank slate and to fill up your 168 hours only with things that deserve your time. Of course, you probably won't read to your children at 2:00 am, or skip a Wednesday morning meeting to go hiking, but you can cut back on how much you watch TV, do laundry, or spend time on other less fulfilling activities. Vanderkam shares creative ways to rearrange your schedule to make room for the things that matter most. 168 Hours is a fun, inspiring, practical guide that will help men and women of any age, lifestyle, or career get the most out of their time and their lives.

One day Sophie comes home from school to find two questions in her mail: "Who are you?" and "Where does the world come from?" Before she knows it she is enrolled in a correspondence course with a mysterious philosopher. Thus begins Jostein Gaarder's unique novel, which is not only a mystery, but also a complete and entertaining history of philosophy. In this first book-length historiographical study of the Scientific Revolution, H. Floris Cohen examines the body of work on the intellectual, social, and cultural origins of early modern science. Cohen critically surveys a wide range of scholarship since the nineteenth century, offering new perspectives on how the Scientific Revolution changed forever the way we understand the natural world and our place in it. Cohen's discussions range from scholarly interpretations of Galileo, Kepler, and Newton, to the question of why the Scientific Revolution took place in seventeenth-century Western Europe, rather than in ancient Greece, China, or the Islamic world. Cohen contends that the emergence of early modern science was essential to the rise of the modern world, in the way it fostered advances in technology. A valuable entrée to the literature on the Scientific Revolution, this book assesses both a controversial body of scholarship, and contributes to understanding how modern science came into the world.
