We need a bold new brand of teacher leadership that will create opportunities for teachers to practice, share, and grow their knowledge and expertise. This book is about "teacherpreneurs"—highly accomplished classroom teachers who blur the lines of distinction between those who teach in schools and those who lead them. These teacherpreneurs embody the concept that teachers can teach as well as lead the transformation of teaching and learning. It's about empowering expert teachers who can buoy the image of teaching and enforce standards among their ranks while all along making sure that their colleagues as well as education policymakers and the public know what works best for students. The book follows a small group of teacherpreneurs in their first year. We join their journey toward becoming teacher leaders whose work is not defined by administrative fiat, but by their knowledge of students and drive to influence policies that allow them and their colleagues to teach more effectively. The authors trace the teacherpreneurs' steps—and their own—in the effort to determine what it means to define and execute the concept of "teacherpreneurism" in the face of tough demands and resistant organizational structures.

Recovery from Schizophrenia, from its first publication, was acclaimed as a work of major importance. It demonstrated convincingly, but controversially, how political, economic and labour market forces shape social responses to the mentally ill, mould psychiatric

treatment philosophy, and influence the onset and course of one of the most common forms of mental illness. In this revised and updated third edition, Dr Warner analyses the latest research to extend the conclusions of the original work and tells us whether conditions and outcomes for people with schizophrenia are getting better or worse for people in Britain and America in recent years. In addition, he \* critiques recent approaches to preventing the occurrence of schizophrenia \* suggests innovative strategies for advancing the economic situation of people with mental illness \* describes the latest advances in the rehabilitation of people with schizophrenia \* provides a guide on how to combat the stigma of mental illness at local and national level. Recovery from Schizophrenia's radical analysis of the factors affecting the outcome of schizophrenia is essential reading for all psychiatrists, mental health professional, mental health advocates, social workers, rehabilitation personnel, and psychologists.

This eighty-ninth volume of the IARC Monographs is the third and last of a series on tobacco-related agents. Volume 83 reported on the carcinogenicity of tobacco smoke and involuntary smoking (second-hand smoke or environmental tobacco smoke) (IARC 2004a). Volume 85 summarized the evidence on the carcinogenic risk of chewing betel quid with and without tobacco (IARC 2004b). That volume explored the variety of products chewed in South Asia and other parts of the world that contain areca nut in combination with other ingredients,

often including tobacco. In this eighty-ninth volume, the carcinogenic risks associated with the use of smokeless tobacco, including chewing tobacco and snuff, are considered in a first monograph. The second monograph reviews some tobacco-specific nitrosamines. These agents were evaluated earlier in Volume 37 of the Monographs (IARC 1985) and information gathered since that time has been summarized and evaluated. This first report deals with some of the major development issues confronting the developing countries and explores the relationship of the major trends in the international economy to them. It is designed to help clarify some of the linkages between the international economy and domestic strategies in the developing countries against the background of growing interdependence and increasing complexity in the world economy. It assesses the prospects for progress in accelerating growth and alleviating poverty, and identifies some of the major policy issues which will affect these prospects.

Marketing Destinations and Venues for Conferences, Conventions and Business Events introduces students to key areas of marketing and promotion that are essential if destinations are to compete successfully in the rapidly expanding global business event sector. It achieves this by looking at issues surrounding business event marketing, strategic planning, destination and venue selling strategies and future challenges. The 2nd Edition has also been updated to include: New content on: destination marketing organisations' and venues' use of technology, use and impact of social media, sponsorship

and partnership issues, economic changes as well as their responses to demand for sustainable meetings locations Updated and new case studies on growth areas and emerging markets e.g. Middle East, Asia, Eastern Europe/Russia, Africa and South America, but also to include material on mature markets, destinations and venue operators A genuinely international focus in terms of content and examples New review and discussion questions and, where appropriate, learning outcomes New online resource package for students and lecturers including: weblinks, power point slides and project questions (coming soon). Accessible, global and informative, this is essential reading for all future business event and conference managers.

Citrus greening, a disease that reduces yield, compromises the flavor, color, and size of citrus fruit and eventually kills the citrus tree, is now present in all 34 Floridian citrus-producing counties. Caused by an insect-spread bacterial infection, the disease reduced citrus production in 2008 by several percent and continues to spread, threatening the existence of Florida's \$9.3 billion citrus industry. A successful citrus greening response will focus on earlier detection of diseased trees, so that these sources of new infections can be removed more quickly, and on new methods to control the insects that carry the bacteria. In the longer term, technologies such as genomics could be used to develop new citrus strains that are resistant to both the bacteria and the insect.

The Digital Economy Report 2019 on "Value creation and capture: Implications for developing countries" takes stock of recent trends in the global digital landscape and discusses the development and policy implications of data and digital platforms. A key feature of the evolving digital economy is the increasing role of digital data as an economic resource, together with digital platforms as new influential actors, with capacity to collect, process, analyze and monetize data. The report considers policy options for countries to help ensure that they capture a fair part of the value created in the digital economy for inclusive development. Key issues

include the market impact of emerging technologies and digital platforms, the impact on smaller businesses in developing countries and the implications for infrastructure, entrepreneurship, skills, competition, data flows, data protection, taxation and other relevant policies.

For countries as diverse as China and Mauritius, Special Economic Zones (SEZs) have been a powerful tool to attract foreign investment, promote export-oriented growth, and generate employment; for many others, the results have been less than encouraging. While the benefits and limitations of zones will no doubt continue to be debated, what is clear is that policymakers are increasingly attracted to them as an instrument of trade, investment, industrial, and spatial policy. Since the mid 1980s, the number of newly-established zones has grown rapidly in almost all regions, with dramatic growth in developing countries. In parallel with this growth and in the evolving context of global trade and investment, zones are also undergoing significant change in both their form and function, with traditional export processing zones (EPZs) increasingly giving way to larger and more flexible SEZ models. This new context will bring significant opportunities for developing countries to take advantage of SEZs, but will also raise new challenges to their successful design and implementation. This volume aims to contribute to a

better understanding of the role and practice of SEZs in developing countries, in order to better equip policymakers in making effective decisions in planning and implementing SEZ programs. It covers some of the emerging issues and challenges in SEZs – including upgrading, regional integration, WTO compliance, innovation, the environment, and gender issues – with practical case examples from SEZ programs in developing countries.

This Selected Issues paper estimates the long-run economic impact of Brexit on the United Kingdom under two distinct assumptions for the post-Brexit relationship between the United Kingdom and the European Union. These illustrative scenarios entail different degrees of higher trade costs, a more restricted European Union migration regime and reduced foreign inward investment. A standard multicountry and multisector computable general equilibrium model is used to quantify the impact of higher trade barriers. There is substantial sectoral heterogeneity in the impact, and regions with higher concentrations of the more affected sectors are likely to confront greater losses. The empirical analysis suggests the speed of sectoral labor relocation across sectors has been relatively low in the UK. Irrespective of these empirical estimates, policies, such as retraining, would be critical to facilitate faster adjustment of the economy to the post-Brexit equilibrium thereby helping to minimize the

associated costs to individuals and in aggregate. Through 18 chapters, this book draws on policy lessons from successful countries that have managed to overcome political economy constraints and reach upper-middle-income emerging market economy status to examine how Senegal can achieve per capita growth rates of four to five percent per year over a 20-year period, as well as lessons for other low-income countries. Contributors working in academia, civil society, and government in Senegal, as well as at the World Bank, in peer countries like Mauritius, Morocco, and Seychelles, and the International Monetary Fund, address creating a sound, balanced, and efficient fiscal framework through new revenue-raising measures, expenditure rationalization, and more efficient public investment; promoting an inclusive and deeper financial sector; relieving constraints on doing business and promoting private investment, including foreign direct investment; and achieving high, sustained, and inclusive growth. They discuss Senegal's macroeconomic environment and what it means to be an upper-middle-income emerging market economy, including the country's industrial framework, the Plan Senegal emergent growth targets, and dimensions of inclusive growth; revenue mobilization, public expenditure efficiency and rationalization, and debt sustainability; ways to make Senegal's financial system more stable, deeper, and

more inclusive in the context of the West African Economic and Monetary Union; aspects of structural reform in the country and ways to implement reforms to achieve growth; and social inclusion and protection in Senegal.

Universal basic income (UBI) is emerging as one of the most hotly debated issues in development and social protection policy. But what are the features of UBI? What is it meant to achieve? How do we know, and what don't we know, about its performance?

What does it take to implement it in practice?

Drawing from global evidence, literature, and survey data, this volume provides a framework to elucidate issues and trade-offs in UBI with a view to help inform choices around its appropriateness and feasibility in different contexts. Specifically, the book examines how UBI differs from or complements other social assistance programs in terms of objectives, coverage, incidence, adequacy, incentives, effects on poverty and inequality, financing, political economy, and implementation. It also reviews past and current country experiences, surveys the full range of existing policy proposals, provides original results from micro†“tax benefit simulations, and sets out a range of considerations around the analytics and practice of UBI.

Cyber risk is an emerging source of systemic risk in the financial sector, and possibly a macro-critical risk too. It is therefore important to integrate it into financial sector surveillance. This paper offers a range of analytical approaches to assess and monitor cyber risk to the financial sector, including various approaches to stress testing. The paper illustrates these techniques by applying them to Singapore. As an advanced economy with a complex financial system and rapid adoption of fintech, Singapore serves as a good case study. We place our results in the context of recent cybersecurity developments in the public and private sectors, which can be a reference for surveillance work.

Informed by the authors' extensive experience in helping organizations improve the performance of their management systems, *Inside Energy: Developing and Managing an ISO 50001 Energy Management System* covers how to apply each of the many requirements of the standard in a systematic and comprehensive manner. produces a demonstrably high return on investment. The book explores how to achieve energy performance targets and qualify for ISO 50001 registration. It helps you manage the skills, knowledge, and experience of the many experts who will participate in your organization's Energy Management System (EnMS) policy, planning, and implementation. This book provides practical information for understanding and developing an ISO 50000 Energy Management System (EnMS), including clear and concise explanations of the standards and requirements. Building from chapter to chapter, it supplies comprehensive direction for developing, implementing, and managing an EnMS. The text also explains the relationship between ISO 9000 and 14000, and offers guidance for integrating EnMS concepts with existing organizational policies, processes, and procedures. It also offers additional guidance on methods available to management and energy teams when implementing the ISO 50001 requirements. The book takes readers through the steps that can transform existing energy management systems to far more effective ones that significantly reduce the costs of energy in the business' bottom line. It includes perspectives on multinational and national energy and environment policies that will likely affect the cost of energy purchased in the world's markets. Using the information found in this book, you can save your

Acts and Monuments by John Foxe, popularly abridged as Foxe's Book of Martyrs, is a celebrated work of church history and martyrology, first published in English in 1563 by John Day. Published early in the reign of Queen Elizabeth I and only five years after the death of the Roman Catholic Queen Mary I, Foxe's Acts and Monuments was an affirmation of the Protestant Reformation in England during a period of religious conflict between Catholics and Protestants. Foxe's account of church history asserted a historical justification that was intended to establish the Church of England as a continuation of the true Christian church rather than as a modern innovation, and it contributed significantly to a nationalistic repudiation of the Roman Catholic Church. The sequence of the work, initially in five books, covered first early Christian martyrs, a brief history of the medieval church, including the Inquisitions, and a history of the Wycliffite or Lollard movement. It then dealt with the reigns of Henry VIII and Edward VI, during which the dispute with Rome had led to the separation of the English Church from papal authority and the issuance of the Book of Common Prayer. The final book treated the reign of Queen Mary and the Marian Persecutions. (courtesy of wikipedia.com)

household counterparts. FSIs include both aggregated individual institution data and indicators that are representative of the markets in which the financial institutions operate. FSIs are calculated and disseminated for the purpose of supporting macroprudential analysis--the assessment and surveillance of the strengths and vulnerabilities of financial systems--with a view to strengthening financial stability and limiting the likelihood of financial crises. Financial Soundness Indicators: Compilation Guide is intended to give guidance on the concepts, sources, and compilation and dissemination techniques underlying FSIs; to encourage the use and cross-country comparison of these data; and, thereby, to support national and international surveillance of financial systems.

The 2012 UNEP Foresight Process on Emerging Global Environmental Issues primarily identified emerging environmental issues and possible solutions on a global scale and perspective. In 2013, UNEP carried out a similar exercise to identify priority emerging environmental issues that are of concern to the Small Island Developing States (SIDS). The social and economic emerging issues were also identified using the same set of criteria. At the core of the process was a SIDS Foresight Panel consisting of 11 SIDS experts (for the UNEP Panel)
