Chaotics presents a revolutionary set of guidelines designed to help businesses: • detect sources of turbulence • prepare scenarios • predict resulting vulnerabilities and opportunities • develop responses to ensure long-term resilience and success • avoid risk while advancing the interests of the company • build flexibility into the balance sheet • price strategically • adjust products to meet new customer values • and more. Complete with metrics and measurements, Chaotics outlines a powerful new system for managing waves of uncertainty affecting customers, employees, and other stakeholders. In this climate of increased turbulence, no organization can survive with less.

Today's headlines report cities going bankrupt, states running large deficits, and nations stuck in high debt and stagnation. Philip Kotler, Donald Haider, and Irving Rein argue that thousands of "places" -- cities, states, and nations -- are in crisis, and can no longer rely on national industrial policies, such as federal matching funds, as a promise of jobs and protection. When trouble strikes, places resort to various palliatives such as chasing grants from state or federal sources, bidding for smokestack industries, or building convention centers and exotic attractions. The authors show instead that places must, like any market-driven business, become attractive "products" by improving their industrial base and communicating their special qualities more effectively to their target markets. From studies of cities and nations throughout the world, Kotler, Haider, and Rein offer a systematic analysis of why so many places have fallen on hard times, and make recommendations on what can be done to revitalize a place's economy. They show how "place wars" -- battles for Japanese factories, government projects, Olympic Games, baseball team franchises, convention business, and other economic prizes -- are often misguided and end in wasted money and effort. The hidden key to vigorous economic development, the authors argue, is strategic marketing of places by rebuilding infrastructure, creating a skilled labor force, stimulating local business entrepreneurship and expansion, developing

strong public/private partnerships, identifying and attracting "place compatible" companies and industries, creating distinctive local attractions, building a service-friendly culture, and promoting these advantages effectively. Strategic marketing of places requires a deep understanding of how "place buyers" -- tourists, new residents, factories, corporate headquarters, investors -- make their place decisions. With this understanding, "place sellers" -- economic development agencies, tourist promotion agencies, mayor's offices -- can take the necessary steps to compete aggressively for place buyers. This straightforward guide for effectively marketing places will be the framework for economic development in the 1990s and beyond.

A thorough update to a best-selling text emphasizing how marketing solves a wide range of health care problems. There has been an unmet need for a health care marketing text that focuses on solving real-world health care problems. The all new second edition of *Strategic Marketing for Health Care Organizations* meets this need by using an innovative approach supported by the authors' deep academic, health management, and medical experience. Kotler, Stevens, and Shalowitz begin by establishing a foundation of marketing management principles. A stepwise approach is used to guide readers through the application of these

marketing concepts to a physician marketing plan. The value of using environmental analysis to detect health care market opportunities and threats then follows. Readers are shown how secondary and primary marketing research is used to analyze environmental forces affecting a wide range of health care market participants. The heart of the book demonstrates how health management problems are solved using marketing tools and the latest available market data and information. Since the health care market is broad, heterogenous, and interconnected, it is important to have a comprehensive perspective. Individual chapters cover marketing for consumers, physicians, hospitals, health tech companies, biopharma companies, and social cause marketing – with strategies in this last chapter very relevant to the Covid-19 pandemic. Each chapter gives readers the opportunity to improve marketing problem-solving skills through discussion questions, case studies, and exercises.
