This is the definitive one-stop technical answer shop for graphic designers at all levels, whether just starting out or with years of experience. It combines best-practice methods with common and lesser-known shortcuts all designed to help find those precious extra minutes when working to a deadline. Screengrabs, diagrams, icons, and color coding all enable quick and easy navigation through the book, so that these crucial time saving tips are always at your fingertips. Knowing exactly where to find things saves any designer precious hours, too often spent scrolling through menu bars and palettes. The book begins with keyboard shortcuts, widgets, and batch actions that are guaranteed to spare a few seconds each time they're used. The next section moves on to outline the quickest ways to navigate software, desktops, and scripts and plugins, all of which will save about a minute each. The third section shows the reader how customized settings that suit their particular working practices can save anything from a few minutes to an hour of a design process. Also included here are a host of online resources for matching and identifying colors, fonts, and print specs, ideal answers to save a designer valuable time spent in online searches for the most authoritative advice. The final section of this book provides a range of best-practice advice such as setting up style-sheets, files, and print presets, all of which can save designers hours, if not days otherwise spent cleaning up files before they go to print.

Images play a key role for scholarly work in many ways – they facilitate communication and support understanding or make research results look more appealing. At the same time powerful image-editing programs have profoundly changed how image manipulations are perceived today. This book explores how scholars from different domains conceive image manipulation. The study is based on research carried out at the Interdisciplinary Laboratory Image Knowledge Gestaltung at Humboldt University Berlin. Informants from the field of biology, computer science, art history and design explain how they differentiate between appropriate and inappropriate image manipulation. Furthermore these experts report on whether guidelines or practical logics shape their work with images.
