What sets Laravel apart from other PHP web frameworks? Speed and simplicity, for starters. This rapid application development framework and its ecosystem of tools let you quickly build new sites and applications with clean, readable code. Fully updated to cover Laravel 5.8, the second edition of this practical guide provides the definitive introduction to one of today's mostpopular web frameworks. Matt Stauffer, a leading teacher and developer in the Laravel community, delivers a high-level overview and concrete examples to help experienced PHP web developers get started with this framework right away. This updated edition also covers Laravel Dusk and Horizon and provides information about community resources and other noncore Laravel packages. Dive into features, including: Blade, Laravel's powerful custom templating tool Tools for gathering, validating, normalizing, and filtering user-provideddata The Eloquent ORM for working with application databases The role of the Illuminate request object in the application lifecycle PHPUnit, Mockery, and Dusk for testing your PHP code Tools for writing JSON and RESTful APIs Interfaces for filesystem access, sessions, cookies, caches, and search Tools for implementing queues, jobs, events, and WebSocket event publishing

## EDITORE

This volume brings together all the successful peer-reviewed papers submitted for the proceedings of the 43rd conference on Computer Applications and Quantitative Methods in Archaeology that took place in Siena (Italy) from March 31st to April 2nd 2015.

This book explores the diversity of topics, views and perspectives focused on the relationship between information systems, organizations and managerial control. It brings together theories and practices by a diverse group of scholars working in different disciplines: organization, management, accounting, information systems development, human-computer interaction. The volume is divided into three sections, each one focusing on a specific theme: organizational change, innovation and information and communication technologies; organizational control, accounting and information systems; information, knowledge and project management practices. The book is based on a selection of the best research papers - original double blind peer reviewed contributions of the annual conference of the Italian chapter of AIS, held in Milan, Italy in December 2013.

This book examines the energy dimension of the smart city from the perspective of urban planning, providing a complete overview that ranges from theoretical aspects to practical considerations and projects. In addition, it aims to illustrate how the concept of the smart city can enhance understanding of the urban system and foster new forms of management of the metropolis, including with respect to energy supply and use. Specifically, the

book explores the different dimensions of the relationship between energy and the city, discusses methodological issues with a special focus on ontological approaches to sustainability, and describes practices, tools, and good examples of energy-related urban planning. The authors represent the main Italian research groups working in the field, Italy being an excellent example of a country exposed to energy problems due to, for example, vulnerability to climate change and lack of primary energy resources. This book will be valuable for students of urban planning, town planners, and researchers interested in understanding the changing nature of the city and the challenges posed by energy issues.

Learn how to build a data science technology stack and perform good data science with repeatable methods.

You will learn how to turn data lakes into business assets. The data science technology stack demonstrated in Practical Data Science is built from components in general use in the industry. Data scientist Andreas Vermeulen demonstrates in detail how to build and provision a technology stack to yield repeatable results. He shows you how to apply practical methods to extract actionable business knowledge from data lakes consisting of data from a polyglot of data types and dimensions.

What You'll Learn Become fluent in the essential concepts and terminology of data science and data engineering Build and use a technology stack that meets industry criteria Master the methods for retrieving actionable business knowledge Coordinate the handling of polyglot data types in a data lake for repeatable results Who This Book Is For Data scientists and data

This book constitutes the refereed proceedings of the 6th International IFIP WG 2.13 Conference on Open Source Systems, OSS 2010, held in Notre Dame, IN, USA, in May/June 2010. The 23 revised full papers presented together with 17 short papers, 5 workshop abstracts and 4 panel descriptions were carefully reviewed and selected from 51 submissions. The papers reflect the international communities of active OSS researchers and present a broad range of perspectives on open source systems ranging from software engineering through organizational issues to law.

Grazie a questa guida tutti i programmatori potranno capire i motivi per cui la combinazione di PHP, Apache e MySQL stia diventando rapidamente il sistema più diffuso per sviluppare siti web dinamici. In un solo manuale, completo e approfondito, si trovano tutte le basi necessarie per comprendere come i loro componenti principali lavorino assieme e separatamente. La creazione di due progetti- esempio per lo sviluppo di siti web completi consente di esercitarsi in concreto sulle applicazioni. Partendo dalle funzionalità di base, come scrivere codice PHP, creare un database MySQL, popolarlo di dati e presentare informazioni specifiche ai visitatori, si arrivano a sperimentare le caratteristiche più avanzate di PHP, Apache e MySQL procedendo,

Il Novecento ci ha consegnato una interessante evoluzione del concetto stesso di bene culturale architettonico e urbano, dalla identificazione selettiva del monumento alla contestualizzazione del monumento, alla monumentalizzazione del contesto (ambiente naturale, manufatti storici, stratificazione storica degli usi antropici del territorio). Tale evoluzione ha arricchito e dilatato in misura significativa il campo di interesse in ordine alle azioni di tutela, conservazione e valorizzazione dei beni. Il progetto di conservazione del bene storico-architettonico, nella accezione attuale, si pone in alternativa all'intervento (straordinario) di restauro classicamente inteso, riferendosi, secondo la impostazione teorico-metodologica del restauro preventivo, piuttosto all'intervento (ordinario) di manutenzione e di conservazione programmata. Tali presupposti implicano una ampia, interdisciplinare e organizzata base conoscitiva, mirata allo specifico architettonico in tutti i suoi aspetti (storici, formali, figurativi, simbolici, costruttivi, funzionali...) e anche nella sua realtà contestuale urbana e ambientale, in grado di selezionare e orientare le scelte operative. Conoscenza finalizzata certamente al progetto, ma

anche alla diagnostica, al monitoraggio del cantiere e al check up continuo dell'edificio nel tempo. Si esige dunque la possibilità e la capacità di gestire, in maniera visuale, relazionata e dinamica, una notevole massa di informazioni, peraltro fortemente eterogenea per caratteristiche proprie e per formati. Il programma di ricerca si propone di fornire un contributo innovativo in ordine alla definizione delle modalità organizzative e procedurali mirate alla costruzione di data base integrati, finalizzati alla documentazione, e alle azioni di tutela, conservazione e valorizzazione del patrimonio architettonico e urbano, nonché al loro utilizzo da parte degli Enti pubblici territoriali e di operatori tecnico-professionali. Il campo di indagine è lo specifico architettonico, nella sua relazione contestuale urbana, e la città storicizzata, nel suo insieme, quale risultato del processo storico di formazione e trasformazione sino all'attualità. I casi di studio sono individuati da ciascuna Unità di ricerca in riferimento al proprio territorio di ambito. Un significativo contributo su una tematica di permanente attualità, atteso che la emergenza del terremoto ha drammaticamente riproposto la carenza di conoscenza sistemica, organizzata e finalizzata, dei beni storico-architettonici presenti sul territorio. Il volume è a cura di Mario Centofanti con il coordinamento scientifico di Anna Marotta, Roberto Mingucci, Michela Cigola, Elena Ippoliti.

PHP and MySQL are quickly becoming the de facto standard for rapid development of dynamic, database-driven web sites. This book is perfect for newcomers to programming as well as hobbyists who are intimidated by harder-to-follow books. With concepts explained in plain English, the new edition starts with the basics of the PHP language, and explains how to work with MySQL, the popular open source database. You then learn how to put the two together to generate dynamic content. If you come from a web design or graphics design background and know your way around HTML, *Learning PHP & MySQL* is the book you've been looking for. The content includes: PHP basics such as strings and arrays, and pattern matching A detailed discussion of the variances in different PHP versions MySQL data fundamentals like tables and statements Information on SQL data access for language A new chapter on XHTML Error handling, security, HTTP authentication, and more *Learning PHP & MySQL* explains everything from fundamental concepts to the nuts and bolts of performing specific tasks. As part of O'Reilly's bestselling Learning series, the book is an easy-to-use resource designed specifically for beginners. It's a launching pad for future learning, providing you with a solid foundation for more advanced development.

Bruce Chatwin's debut novel: "Conrad's Heart of Darkness seen through a microscope" (The Atlantic)

In this vivid, powerful novel, Chatwin tells of Francisco Manoel de Silva, a poor Brazilian adventurer who sails to Dahomey in West Africa to trade for slaves and amass his fortune. His plans exceed his dreams, and soon he is the Viceroy of Ouidah, master of all slave trading in Dahomey. But the ghastly business of slave trading and the open savagery of life in Dahomey slowly consume Manoel's wealth and sanity.

What separates the traditional enterprise from the likes of Amazon, Netflix, and Etsy? Those companies have refined the art of cloud native development to maintain their competitive edge and stay well ahead of the competition. This practical guide shows Java/JVM developers how to build better software, faster, using Spring Boot, Spring Cloud, and Cloud Foundry. Many organizations have already waded into cloud computing, test-driven development, microservices, and continuous integration and delivery. Authors Josh Long and

There's a wealth of data online, but sorting and gathering it by hand can be tedious and time consuming. Rather than click through page after endless page, why not let bots do the work for you? Webbots, Spiders, and Screen Scrapers will show you how to create simple programs with PHP/CURL to mine, parse, and archive online data to help you make informed decisions. Michael Schrenk, a highly regarded webbot developer, teaches you how to develop fault-tolerant designs, how best to launch

and schedule the work of your bots, and how to create Internet agents that: –Send email or SMS notifications to alert you to new information quickly –Search different data sources and combine the results on one page, making the data easier to interpret and analyze –Automate purchases, auction bids, and other online activities to save time Sample projects for automating tasks like price monitoring and news aggregation will show you how to put the concepts you learn into practice. This second edition of *Webbots, Spiders, and Screen Scrapers* includes tricks for dealing with sites that are resistant to crawling and scraping, writing stealthy webbots that mimic human search behavior, and using regular expressions to harvest specific data. As you discover the possibilities of web scraping, you'll see how webbots can save you precious time and give you much greater control over the data available on the Web.

Si impara, infine, come liberare tutta la potenza di PHP6 spingendolo fino ai suoi limiti.

The theme of the conference this year was Critical CALL, drawing inspiration from the work carried out in the broader field of Critical Applied Linguistics.

The term 'critical' has many possible interpretations, and as Pennycook (2001) outlines, has many concerns. It was from these that we decided on the conference theme, in particular the notion that we should question the assumptions that lie at the basis of our praxis, ideas that have become 'naturalized' and are not called into question. Over 200 presentations were delivered in 68 different sessions, both in English and Italian, on topics related specifically to the theme and also more general CALL topics. 94 of these were submitted as extended papers and appear in this volume of proceedings.

L'arte intesa nella sua accezione più ampia di attività di produzione estetica ha favorito il successo internazionale del made in Italy. Non è certo un caso che in tutti i settori merceologici trainanti dell'economia italiana (moda, arredamento, design, etc.) il contenuto estetico rappresenti il principale fattore di competitività e di successo. La formazione in questi settori, sia in quelli più tradizionali delle arti figurative e dello spettacolo (pittura, scultura, scenografia, musica, danza, arte drammatica), sia in quelli della conservazione, tutela e valorizzazione dei beni artistici; sia ancora in quelli più orientati al design e all'innovazione (moda, arredamento, design, grafica, multimedialità, etc.), richiede un

modello didattico che garantisca una reale esperienza del fare. In tal senso le istituzioni dell'Alta Formazione Artistica e Musicale, che tendono per loro natura a unificare il sapere con il saper fare, si configurano come le tipologie formative più idonee per la formazione in questi ambiti. E proprio per comunicare le esperienze più qualificate di produzione artistica e di elaborazione teorico - critica si è scelto di proporre un prodotto editoriale che illustri e faccia conoscere il meglio di questo sistema. Il nome HiArt, evocativo e di facile memorizzazione, ben identifica le aspettative del settore di essere contestualizzato quale ambito di alta formazione, quale livello qualitativo superiore, offrendo inoltre la possibilità di un'apertura anche ad un pubblico internazionale. L'articolazione monografica scelta per la rivista, che tratta quale primo argomento L'innovazione tecnologica ed i nuovi linguaggi, oltre a cercare di evitare una eccessiva autoreferenzialità propria di questo sistema, ha l'obiettivo di presentare il settore artistico italiano quale luogo culturalmente vivace e aggiornato favorendo sinergie e contaminazioni artistiche, consapevoli del fatto che l'evoluzione e lo sviluppo culturale siano sempre di più legati alla crescita dell'interdisciplinarietà ed alla costruzione di reti e di spazi dove promuovere la ricerca artistica accanto al recupero della ricca tradizione, valorizzando così una identità italiana nell'arte e nei settori produttivi ad elevato contenuto

This book focuses on the impact of information and communication technologies (ICTs) on organizations and society as a whole. Specifically, it examines how such technologies improve our lives and facilitate our work. A main aspect explored is how actors understand the potential of ICTs to support organizational activities and hence, how they adopt and adapt these technologies to achieve their goals. The book collects papers on various areas of organizational strategy, e.g. new business models, competitive strategies, knowledge management and more. The main areas dealt with are new technologies for a better life, innovations for e-government, and technologies enhancing enterprise modeling. In addition, the book addresses how organizations impact society through sustainable development and social responsibility, and how ICTs employ social media networks in the process of value co-creation.

It is a great pleasure to share with you the Springer LNCS proceedings of the Second World Summit on the Knowledge Society, WSKS 2009, organized by the Open - search Society, Ngo, <http://www.open-knowledge-society.org>, and held in Samaria Hotel, in the beautiful city of Chania in Crete, Greece, September 16–18, 2009. The 2nd World Summit on the Knowledge Society (WSKS 2009) was an international scientific event devoted to promoting dialogue on the main aspects of the knowledge society towards a better world for all. The multidimensional economic and social crisis of the last couple of years has brought to the fore the need to discuss in depth new policies and strategies for a human centric developmental processes in the global context. This annual summit brings together key stakeholders involved in the worldwide development of the knowledge society, from academia, industry, and government, including policy makers and active citizens, to look at the impact and prospects of information technology, and the knowledge-based era it is creating, on key facets of living, working, learning, innovating, and collaborating in today's hyper-complex world. The summit provides a distinct, unique forum for cross-disciplinary fertilization of research, favoring the dissemination of research on new scientific ideas relevant to international research agendas such as the EU (FP7), OECD, or UNESCO. We focus on the key aspects of a new sustainable deal for a bold response to the multidimensional crisis of our times.
