Discusses the place of the illustration in children's picture books, looking particularly at how pictures can express abstract themes, such as moods, which cannot be shown directly. Uses examples from well-known works to illustrate the points discussed.

A modern, magic adventure with a difference. The Key element is humour. The delivery is pacey, direct and very action based. Characters are believable, with quirky personalities. A hilarious story of a dizzy witch and her two best friends, a lazy cat and a neurotic mouse, who make spells in the crazy kitchen of their magic house in Parsley Lane.

Tidying Up Art is an attempt at bringing a bit of clarity into our lives just where it makes no sense at all! Ursus Wehrli, a popular stand-up comedian, rearranges famous works of art, sweeps all unwanted things out of the way and lines everything up in neat rows: after all, being tidy is a virtue.

This book uses a structured approach to teach the art of creating interesting, well-composed images. It provides solutions to problems that often get in the way of producing great photographs and emphasizes the importance of training the eye to exclude the extraneous. Examples of strong images are juxtaposed against flawed images, illustrating how to create a successful composition. Topics covered include light and shadow, lens choice, framing, negative space, and many more. In this book, author Jack Dykinga encourages us to look at photography as a way to communicate. Dykinga says, "Photography is a marvelous language that crosses linguistic borders as a universal, powerful, and direct communication. As photographers, we see something we find interesting and simply want to share it." Readers will learn new ways to create interesting and powerful compositions that communicate their intended messages. Filled with beautiful color images throughout, the book is sure to inspire, teach, and motivate photographers of all levels.

In The Power of Pictures book and companion DVD, Beth Olshansky introduces teachers to her innovative art-based approach to literacy instruction. Widely practiced in classrooms across the country, the model has been proven by research to improve literacy achievement with a wide range of learners, especially those who struggle with verbal skills. At the heart of her approach is the Artists/Writers Workshop. Through study of quality picture books and hands-on art experiences, students learn to visualize, "paint pictures with words," and ultimately create their own extraordinary artistic and literary work. The book and DVD explain how any teacher can successfully use this process to enable all students, particularly low performers, to make dramatic gains in both reading and writing.

"In this book with no pictures, the reader has to say every silly word, no matter what"--

The definitive, must-have guide to pursuing an art career—the fully revised and updated edition of Art/Work, now in its fourteenth printing, shares the tools artists of all levels need to make it in this highly competitive field. Originally published in 2009, Art/Work was the first practical guide to address how artists can navigate the crucial business and legal aspects of a fine art career. But the rules have changed since then, due to the proliferation of social media, increasing sophistication of online platforms, and ever more affordable digital technology. Artists have never had to work so hard to distinguish themselves—including by making savvy decisions and forging their own paths. Now Heather Bhandari, with over fifteen years of experience as a director of the popular Chelsea gallery Mixed Greens, and Jonathan Melber, a former arts/entertainment lawyer and director of an art e-commerce startup, advise a new generation of artists on how to make it in the art world. In this revised and updated edition, Bhandari and Melber show artists how to tackle a host of new challenges. How do you diversify income streams to sustain a healthy art practice? How can you find an alternative to the gallery system? How do you review a license agreement? What are digital marketing best practices? Also included are new quotes from over thirty arts professionals, updated commission legal templates, organizational tips, tax information, and advice for artists who don't make objects. An important resource for gallerists, dealers, art consultants, artist-oriented organizations, and artists alike, Art/Work is the resource that all creative entrepreneurs in the art world turn to for advice.

How fast can your child form these dots into pictures? A challenging activity book requires a child to play against the clock. This will push a child from passive to active learning. It'll make the game much more appealing because of the added element of pressure. Encourage your child to share this activity book with friends!

Illustration practice is not judged purely by visual literacy and technical qualities, but also requires intellectual engagement with its subject matter. Illustration: A Theoretical & Contextual Perspective, 2nd Edition examines the breadth and many uses of this diverse discipline, through nearly 300 colour examples. From developing a brief, conducting research and analysing visual language, the book goes on to explore the role of illustration in documentation, commentary, storytelling, persuasion and identity. It concludes with an overview of current professional practice, demonstrating that the ability to communicate meaningfully and effectively for a global audience is key to navigating today's creative industries. Examples of work from award-winning illustrators showcase a huge range of applications, from the author's own collaboration with the British Museum of Natural History and Olivier Kugler's Portraits of Syrian Refugees in Iraqi Kurdistan, to Levi Pinfold's fictional picture book Black Dog and Malika Favre's promotional images for the BAFTA (British Academy of Film and Television Arts) Film Awards.

A bright, science-minded boy goes to the beach equipped to collect and examine flotsam--anything floating that has been washed ashore. Bottles, lost toys, small objects of every description are among his usual finds. But there's no way he could have prepared for one particular discovery: a barnacle-encrusted underwater camera, with its own secrets to share . . . and to keep. Each of David Wiesner's amazing picture books has revealed the magical possibilities of some ordinary thing or happening--a frog on a lily pad, a trip to the Empire State Building, a well-known nursery tale. In this Caldecott Medal winner, a day at the beach is the springboard into a wildly imaginative exploration of the mysteries of the deep, and of the qualities that enable us to witness these wonders and delight in them.

Thinking Visually for Illustrators features a wide range of work, demonstrating diverse visual languages, context, ideas, techniques and skills. It also looks at the ways in which illustrators develop their own personal visual language. Contemporary illustrators from all over the world engaged in a diverse range of approaches to the discipline have contributed their artwork and commentaries on visual thinking and the working process. The text also features the work of recent graduates, present students and observations from educators past and present. This edition has been updated to include a new chapter on

A skyscraper can't be built without a proper foundation, just like a crunchy taco can't be built without a shell. The same goes with your art, whether it's street photography, fine art, cinematography, painting, or even sculpting. The techniques found in this book, though presented with street photos, will easily translate across every visual art and allow you to create remarkable, mouth-watering masterpieces. Countless artists out there want to push their art further, but they've run face first into a nasty plateau. Art is tough enough as it is, but without proper knowledge of composition and design it's easy to end up in a dark alley waiting to be maliciously fondled by mediocre art. Don't join the masses, join the elite! Learn serious composition and design techniques in a fun way that will launch you to the master level. You might even get a chuckle from the film photos capturing whacky tourists as they wonder aimlessly on the beautiful beach of Waikiki, Hawaii. Take part in the fun and seriously improve your art in a way that would make Da Vinci and Van Gogh smile with pride!

In the magical time between night and day, when both the sun and the moon are in the sky, a child is born in a little blue house on a hill. And Miu Lan is not just any child, but one who can change into any shape they can imagine. The only problem is they can't decide what to be: A boy or a girl? A bird or a fish? A flower or a shooting star? At school, though, they must endure inquisitive looks and difficult questions from the other children, and they have trouble finding friends who will accept them for who they are. But they find comfort in the loving arms of their mother, who always offers them the same loving refrain: "whatever you dream of / i believe you can be / from the stars in the sky to the fish in the sea." In this captivating, beautifully imagined picture book about gender, identity, and the acceptance of the differences between us, Miu Lan faces many questions about who they are and who they may be. But one thing's for sure: no matter what this child becomes, their mother will love them just the same. Kai Cheng Thom is a writer, performance artist, and psychotherapist in Toronto. Her first poetry book, a Place Called No Homeland, was published in 2017. Kai Yun Ching is a community-based organizer, educator, and illustrator in Montreal. Wai-Yant Li is a ceramics artist and illustrator in Montreal.

The principles of and approaches to composition have been intriguing and challenging subjects of study since the beginning of pictorial art. In this book both traditional and contemporary principles and approaches are explored and clearly explained. This lucid, insightful encyclopaedia of how pictures are put together, a classic in its field, is an invaluable book for long-term study, reference, and even browsing. A picture cannot be weighed, measured, and appraised like a sack of potatoes. This book avoids the "discussion by dissection" method of picture analysis, stressing instead the graphic forces that remain valid and essential regardless of how art forms and fashions may change. In thirty-five short chapters, each devoted to a single important concept, the author covers the basics and complexities of graphic composition, including the illusion of depth, the enigma of surface, manifesting and symbolising force and motion, utilising borders, graphic accents, patterns, handling dark and light, directing the viewer's eye, and creating storyboards. These concepts are illustrated by hundreds of diagrams and the work of great artists from myriad historical ages, cultures, and styles. The book not only contains a section on film graphics, but also consistently reminds the reader that the principles of composition relate to the moving picture as well as the still picture.

A new, interactive approach to storytime, The Whole Book Approach was developed in conjunction with the Eric Carle Museum of Picture Book Art and expert author Megan Dowd Lambert's graduate work in children's literature at Simmons College, offering a practical guide for reshaping storytime and getting kids to think with their eyes. Traditional storytime often offers a passive experience for kids, but the Whole Book approach asks the youngest of readers to ponder all aspects of a picture book and to use their critical thinking skills. Using classic examples, Megan asks kids to think about why the trim size of Ludwig Bemelman's Madeline is so generous, or why the typeset in David Wiesner's Caldecott winner, The Three Pigs, appears to twist around the page, or why books like Chris Van Allsburg's The Polar Express and Eric Carle's The Very Hungry Caterpillar are printed landscape instead of portrait. The dynamic discussions that result from this shared reading style range from the profound to the hilarious and will inspire adults to make children's responses to text, art, and design an essential part of storytime.

#1 NEW YORK TIMES BESTSELLER · WALL STREET JOURNAL BESTSELLER · USA TODAY BESTSELLER "The Boy, the Mole, the Fox and the Horse is not only a thought-provoking, discussion-worthy story, the book itself is an object of art."- The New York Times From the revered British illustrator, a modern fable for all ages that explores life's universal lessons, featuring 100 color and black-and-white drawings. Drawing is experiencing an unparalleled surge in the art world. Passé notions that once defined drawing as being a preparatory stage for painting or sculpture have long since been cast aside. Drawing is now fully recognized as its own art form—in the biennials, art fairs, museum exhibitions, and beyond. Drawing has come of age. Contemporary artists are increasingly discovering that drawing is something unique and different from painting. It is an intense, sensitive, compelling, personal, and utterly direct art form, one with its own concepts, characteristics, and techniques. In addition, contemporary drawing is not governed by any particular imagery, but rather encompasses a variety of approaches, including realist, abstract, modernist, and post-

modernist. Contemporary Drawing delves into the essential and far-reaching concepts of this medium, exploring surface, mark, space, composition, scale, materials, and intentionality in turn. Key techniques, such as using nature to induce marks and working with a checklist to determine a drawing's problems, are introduced throughout. Plus, an in-depth chapter examines a number of artists, such as William Kentridge and Gego, who are breaking traditional boundaries that separate one artistic discipline from another. Lushly illustrated by a wide range of highly accomplished contemporary artists, Contemporary Drawing offers a broad perspective on this expansive and energized field of art.

An invaluable resource for professionals who wish to write book evaluations—and for all serious fans of children's literature! This revised edition of From Cover to Cover offers a fresh, up-to-date look at some of the best examples of children's literature and also includes practical advice on how to write clearly articulated, reasoned opinions so that others can learn about books they have not yet read. A brief, updated introduction clearly explains how children's books evolve from manuscripts into bound books and the importance of the many different parts of a book (jacket flaps, title page, copyright, etc.) and changes in the children's book industry, such as the creation of two new major genre awards. In addition, the author demonstrates how to think about and critically evaluate several different genres of children's books. Included are sections about books of information (and the author's responsibility to document sources); traditional literature (myths, legends, tall tales, folktales); poetry, verse, rhymes, and songs; picture books; easy readers and traditional books; and fiction and graphic novels. There is also a concluding chapter on how to write reviews that are both descriptive and analytical, including a segment on children's literature blogs. Updated material includes: •An introduction that reflects the many changes in the children's book industry •A section on genres, including a discussion of graphic novels •A section on children's literature blogs •An introduction of two new major genre awards: the Robert F. Sibert Informational Book Award and the Theodor Seuss Geisel Award •And more than 90% of the books cited have been updated from the first edition to more recent publications!

Powerful and often controversial, news pictures promise to make the world at once immediate and knowable. Yet while many great writers and thinkers have evaluated photographs of atrocity and crisis, few have sought to set these images in a broader context by defining the rich and diverse history of news pictures in their many forms. For the first time, this volume defines what counts as a news picture, how pictures are selected and distributed, where they are seen and how we critique and value them. Presenting the best new thinking on this fascinating topic, this book considers the news picture over time, from the dawn of the illustrated press in the nineteenth century, through photojournalism's heyday and the rise of broadcast news and newsreels in the twentieth century and into today's digital platforms. It examines the many kinds of images: sport, fashion, society, celebrity, war, catastrophe and exoticism; and many mediums, including photography, painting, wood engraving, film and video. Packed with the best research and full colour-illustrations throughout, this book will appeal to students and readers interested in how news and history are key sources of our rich visual culture.

Molly Bang's brilliant, insightful, and accessible treatise is now revised and expanded for its 25th anniversary. Bang's powerful ideas—about how the visual composition of images works to engage the emotions, and how the elements of an artwork can give it the power to tell a story—remain unparalleled in their simplicity and genius. Why are diagonals dramatic? Why are curves calming? Why does red feel hot and blue feel cold? First published in 1991, Picture This has changed the way artists, illustrators, reviewers, critics, and readers look at and understand art.

Children's picturebooks are the very first books we encounter, and they form an important, constantly evolving, and dynamic sector of the publishing world.
