Transforming the Rural Nonfarm Economy Steven Hagglade, Peter B. R. Hazell, Thomas Reardon, 2007-11-16

Contrary to conventional wisdom that equates rural economies with agriculture, rural residents in developing countries often rely heavily on activities other than farming for their income. Indeed, nonfarm work accounts for between one-third and one-half of rural incomes in the developing world. In recent years, accelerating globalization, increasing competition from large businesses, expanding urban markets for rural goods and services, and greater availability of information and communication technology have combined to expose rural nonfarm businesses to new opportunities as well as new risks. By examining these rapid changes in the rural nonfarm economy, international experts explore how the rural nonfarm economy can contribute to

overall economic growth in developing countries and how the poor can participate in this rapidly evolving segment of the economy. The authors review an array of recent studies of the rural nonfarm economy in order to summarize existing empirical evidence, explore policy implications, and identify future research priorities. They examine the varied scale, structure, and composition of the rural nonfarm economy, as well as its relationship with agricultural and urban enterprises. And they address key questions about the role of public intervention in the rural nonfarm economy and how the rural poor can participate in and navigate the rapid transition underway in rural areas. The contributors offer new insights to specialists in rural development and to others interested in overall economic development.

Policy Intervention Analysis Ritu Paliwal,2014-01-03 Environmental Impact Assessment (EIA) is crucial for protecting the environment, especially in a country like India--with its dense and rapidly growing population, shrinking land mass, and an economy poised for rapid growth. In order to make EIA an interactive process, it is necessary that it is supported by a strong follow-up mechanism. A properly formulated follow-up process would not only encourage compliance but also increase awareness among the stakeholders. Policy Intervention Analysis: environmental impact assessment evaluates the adequacy of post project monitoring (PPM) process in India and its effective implementation with a focus on the industrial sector. The book investigates the reasons for poor compliance and gives corrective measures for corrective PPM. It identifies specific measures to improve environmental conditions and provides an action plan that will help strengthen the monitoring and enforcement mechanism based on specific regional concerns.

Geographers Patrick H. Armstrong,Geoffrey Martin,2015-12-14 An annual collection of studies of individuals who have made major contributions to the development of geography and geographical thought. Subjects are drawn from all periods and from all parts of the world, and include famous names as well as those less well known: explorers, independent thinkers and scholars. Each paper describes the geographer's education, life and work and discusses their influence and spread of academic ideas, and includes a select bibliography and brief chronology. The work includes a general index and a cumulative index of geographers listed in volumes published to date.
