Co-authored by Zoe Enser and Mark Enser, *The CPD Curriculum: Creating conditions for growth* shares expert and practical guidance for schools on designing and delivering continuing professional development (CPD) that truly lives up to its name. There is a wealth of research available on professional learning, from both within and outside the education sphere, and in this book Zoe and Mark pull it all together to help school leaders optimise teachers' ongoing learning and growth. Zoe and Mark explain how schools can overcome issues with CPD that can leave teachers plateauing in their development after just a few years, and share a variety of case studies that illustrate the key components of an effective CPD programme that builds on teachers' prior knowledge. The authors spell out the importance of CPD and explain how, when done well, it gives teachers the agency to make professional decisions informed by the best evidence and experience they have to hand. Furthermore, they explore how high-quality professional development contributes not only to a collaborative culture within the school staff team and enhanced job satisfaction for teachers, but also to improved student outcomes. Split into three parts - intent, implementation and impact - the book covers a range of key areas, including: coaching and mentoring, subject-specific CPD, empowerment and self-efficacy, delivery methods and quality of materials. They also examine the current issues and common pitfalls surrounding CPD and offer guidance on how it can be improved, with clear end goals in mind. What does a welcome party, a night of drinking, and a recently enrolled college student have in common? Nothing, but that's what was needed for a one-way ticket to Purgatory. I'm Nerezza Taylor, and there must be a mistake. I'm not a mythical creature, and I don't have powers. I would know if I needed Nair during the full moon or had a hankering for the taste of pennies, right? When an ancient door pulls me into Purgatory, I'm not given much of a choice: Attend Purgatory Prep or be locked up forever since I'm an anomaly. Alex, I'll take Purgatory Prep for 1,000, please. Humans aren't supposed to be able to cross over the barrier, but here I am. So what does that mean for me? Everyone makes it their duty to remind me of the fact that I don't belong here. Well, so do I. So come join me on my journey as I try and survive the perils of Purgatory Prep Academy. *Road to Redemption* is the first novel in the Purgatory Prep Academy Series. In the words of Bill Gates, 'We all need people who give us feedback. That's how we improve.' The art of giving feedback is widely recognised as one of the most powerful tools in education and equally one of the most variable aspects in the way it is applied. In *The Feedback Pendulum*, Michael aims to explore how the use of feedback has evolved over time, drawing on a combination of research and sharing experiences, and examples of best practices across the different phases of education to establish a culture of efficient and effective feedback that supports the teaching and learning cycle. This book will unpick the research, the experience of expert practitioners, and practical strategies in the different phases of education, including: the evolution of feedback over time; pre-school feedback; primary and secondary school feedback; specialist education feedback; parental feedback; and CPD feedback Through the use of spotlights from teachers and an education psychologist's perspective interweaved throughout, Michael provides a manifesto for enhancing feedback in education.

Featuring newly commissioned essays and photography of rarely exhibited works, this book highlights the radicalism of Jean Dubuffet, who was one of the most provocative voices of the postwar avant-garde. In 1940s occupied Paris, Jean Dubuffet began to champion a progressive vision for art; one that rejected classical notions of beauty in favor of a more visceral aesthetic. Taking a pioneering approach to materiality and technique, the artist variously blended paint with sand, glass, tar, coal dust, and string. At the same time, he began to assemble a collection of Art Brut--work that was made outside the academic tradition of fine art--even visiting psychiatric wards from 1945 to collect work by patients. This book features texts from leading scholars and is accompanied by images that illuminate Dubuffet's attempts to move beyond the artistic expectations of his time. The works are grouped into six thematic sections that focus on specific series, from his graffiti-inspired "Walls" and his notorious portrait series, "People are Much More Beautiful Than They Think" to the "Corps de dames," a controversial series of "female" landscapes, and his anthropomorphic sculptures, "Little Statues of Precarious Life." Exquisitely produced, this celebration of Dubuffet's work embraces his world view that art is for everyone, not just the elite.

Mark Enser's 'Making Every Geography Lesson Count: Six principles to support great geography teaching' maps out the key elements of effective geography teaching and shows teachers how to develop their students' conceptual and contextual understanding of the subject over time. What sets geography apart from other subjects is the value placed on seeing the connections between the different parts of its broad curriculum, on building links between different topics, and on thinking like a geographer. Writing in the practical, engaging style of the award-winning 'Making Every Lesson Count', Mark Enser has set out to help his fellow practitioners maximise this value by combining the time-honoured wisdom of excellent geography teachers with the most useful evidence from cognitive science. 'Making Every Geography Lesson Count' is underpinned by six pedagogical principles challenge, explanation, modelling, practice, feedback and questioning that will enable teachers to ensure that students leave their lessons with an improved knowledge of the world, a better understanding of how it works and the geographical skills to support their learning. Each chapter looks at one of the six principles and begins with twin scenarios which illustrate some of the real challenges faced in geography classrooms. Mark then delves into a discussion on the underpinning theory and offers a range of practical, gimmick-free strategies designed to help teachers overcome these obstacles. Furthermore, each chapter also ends with a case study from a fellow geography teacher who has successfully employed the principle in their own classroom. Written for new and experienced practitioners alike, this all-encompassing book offers an inspiring alternative to restrictive Ofsted-driven definitions of great teaching and empowers geography teachers to deliver great lessons and celebrate high-quality practice. Suitable for geography teachers of students aged to 18 years.
