Dr. Samantha Bower of the Centers for Disease Control is handed the case and asked to investigate its origins and containment. A MYSTERIOUS FIGURE THAT IS NOT WHO HE APPEARS TO BE . . . Samantha discovers a lethal pathogen unlike any she has encountered in her lifetime. Extremely contagious with a mortality rate higher than any disease ever recorded, it is an extinction level event. A man with an intimate knowledge of the microorganism offers her help. But Samantha Bower begins to suspect he is not who he says he is. HUMANITY HANGS ON THE EDGE OF A CLIFF . . . Samantha begins to realize there are forces at work that she can't understand. Pressures are being applied from outside sources and not all of them wish for a vaccine. **Plague** Gary Birken, 2022-07-26 At Franklin Children's Hospital, an inexplicable disease is reaching terrifying proportions. One by one, the patients of pediatrician Annick Clement are dying. Tracing it to a strain of killer toxin, she's made a chilling discovery. The deaths are not coincidence. They're not accidents. It's the unfathomable scheme of a bioterrorist—a medical genius working in Annick's own shadow, and possessed by a diabolical compulsion to kill. For Annick, stopping him means laying her own life on the line. And fast. Because the terror is spreading.

Plague Year Jeff Carlson, 2007-07-31 Read Jeff Carlson's blogs and other content on the Penguin Community. View our feature on Jeff Carlson's Plague Year. The nanotechnology was designed to fight cancer. Instead, it evolved into the Machine Plague, killing nearly five billion people and changing life on Earth forever. The nanotech has one weakness: it self-destructs

at altitudes above ten thousand feet. Those few who've managed to escape the plague struggle to stay alive on the highest mountains, but time is running out—there is famine and war, and the environment is crashing worldwide. Humanity's last hope lies with a top nanotech researcher aboard the International Space Station—and with a small group of survivors in California who risk a daring journey below the death line...

*Plague of the Undead* Joe McKinney, 2014-10-07 First in the post-apocalyptic series from the Bram Stoker Award-winning author who “writes zombies like he's been gunning them down all of his life” (Weston Ochse, author of *A Hole in the World*). *A Handful of Survivors* For thirty years, they have avoided the outbreak of walking death that has consumed America's heartland. They have secured a small compound near the ruins of Little Rock, Arkansas. Isolated from the world. Immune to the horror. Blissfully unaware of what lies outside in the region known as the “Dead Lands.” Until now . . . *A New Generation of Explorers* Led by a military vet who's seen better days, the inexperienced offspring of the original survivors form a small expedition to explore the wastelands around them. A biologist, an anthropologist, a cartographer, a salvage expert—all are hoping to build a new future from the rubble in the Dead Lands. Until all hell breaks loose . . . *A Land of Death* The infected are still out there. Stalking. Feeding. Spreading like a virus. Wild animals roam the countryside, hunting prey. Small pockets of humanity hide in the shadows: some scared, some mad, all dangerous. This is the New World. If the explorers want it, they'll have to take it. Dead or alive . . . *Praise for Joe McKinney and Dead City* “A merciless, fast-paced and genuinely scary read that will leave you absolutely breathless.” —Brian Keene, Bram Stoker Award-winning author “A rising star on the horror scene.” —Fearn.net “Zombie fans will enjoy this!” —The Parkersburg (WV) News and Sentinel

**White Plague** James Abel, 2015-01-06 In the frozen waters of the Arctic, Marine bioterror expert Joe Rush races to save a submarine crew from a lethal threat... “The pleas for help stopped coming just after five in the morning, Washington time. The Pentagon staffers cleared for handling sensitive messages sat in horror for a moment and then tried other ways to reach the victims. Nothing worked so they called the Director, who phoned me.” In the remote, frozen waters of the Arctic Ocean, the high-powered and technically advanced submarine U.S.S. Montana is in peril. Adrift and in flames, the boat—and the entire crew—could be lost. The only team close enough to get to them in time is led by Marine doctor and bio-terror expert

Joe Rush. With only thirty-six hours before the surviving crew perish, Joe and his team must race to rescue the Montana and ensure that the boat doesn't fall into enemy hands. Because a fast-approaching foreign submarine is already en route, and tensions may explode. But that's the least of their troubles. For the surviving sailors are not alone on the sub. Something is trapped with them. Something deadly lethal. Something that plagued mankind long ago, when it devastated the entire world. And the crew of the Montana has unknowingly set it free. Now, Joe and his team must not only find a way to save the Montana and her crew, but stop a lethal horror of apocalyptic consequence from being unleashed on all humanity.

**Black Death** Robert S. Gottfried,2010-05-11 A fascinating work of detective history, The Black Death traces the causes and far-reaching consequences of this infamous outbreak of plague that spread across the continent of Europe from 1347 to 1351. Drawing on sources as diverse as monastic manuscripts and dendrochronological studies (which measure growth rings in trees), historian Robert S. Gottfried demonstrates how a bacillus transmitted by rat fleas brought on an ecological reign of terror -- killing one European in three, wiping out entire villages and towns, and rocking the foundation of medieval society and civilization.

They've just completed a top secret mission against Iran in the Persian Gulf when they come across a cruise ship adrift at sea. Hundreds of bodies litter its deck, and, as Cabrillo tries to determine what happened, explosions rack the length of the ship. Barely able

to escape with his own life and that of the liner's sole survivor, Cabrillo finds himself plunged into a mystery as intricate - and as perilous - as any he has ever known and pitted against a cult with monstrously lethal plans for the human race . . . plans he may already be too late to stop

The California case is merely the first in a burgeoning series of outbreaks that occur in unrelated geographical areas but with puzzling commonalities: The locations are always healthcare facilities, and their victims are only physicians and their patients. As her investigation takes increasingly bizarre turns, Melissa finds that behind the natural threat lurks a far more sinister possibility—sabotage—and soon finds herself facing the wrath of a powerful cabal, sworn to achieve its aims, no matter what the cost in human life—including Melissa's.

Meanwhile, in Boston, Massachusetts, Agent Thomas Flaherty tracks down glamorous archaeologist Brooke Thompson, who he suspects holds some answers to the cave's ancient mystery. **The Plague Year** Lawrence Wright,2021-06-08 From the Pulitzer Prize-winning author of *The Looming Tower*, and the pandemic novel *The End of October*: an unprecedented, momentous account of Covid-19—its origins, its wide-ranging

repercussions, and the ongoing global fight to contain it A book of panoramic breadth ... managing to surprise us about even those episodes we ... thought we knew well ... [With] lively exchanges about spike proteins and nonpharmaceutical interventions and disease waves, Wright's storytelling dexterity makes all this come alive." —The New York Times Book Review From the fateful first moments of the outbreak in China to the storming of the U.S. Capitol to the extraordinary vaccine rollout, Lawrence Wright's *The Plague Year* tells the story of Covid-19 in authoritative, galvanizing detail and with the full drama of events on both a global and intimate scale, illuminating the medical, economic, political, and social ramifications of the pandemic. Wright takes us inside the CDC, where a first round of faulty test kits lost America precious time . . . inside the halls of the White House, where Deputy National Security Adviser Matthew Pottinger's early alarm about the virus was met with confounding and drastically costly skepticism . . . into a Covid ward in a Charlottesville hospital, with an idealistic young woman doctor from the town of Little Africa, South Carolina . . . into the precincts of prediction specialists at Goldman Sachs . . . into Broadway's darkened theaters and Austin's struggling music venues . . . inside the human body, diving deep into the science of how the virus and vaccines function—with an eye-opening detour into the history of vaccination and of the modern anti-vaccination movement. And in this full accounting, Wright makes clear that the medical professionals around the country who've risked their lives to fight the virus reveal and embody an America in all its vulnerability, courage, and potential. In turns steely-eyed, sympathetic, infuriated, unexpectedly comical, and always precise, Lawrence Wright is a formidable guide, slicing through the dense fog of misinformation to give us a 360-degree portrait of the catastrophe we thought we knew.
