

Planting Designs For Cactus Succulents Indoor And Outdoor Projects For Unique Easy Care Plants In All Climates

Succulents and cacti make the perfect indoor plant pets. Inexpensive to purchase, easy to care for and resilient to the neglect of even the laziest of gardeners, growing these plants is virtually foolproof. Often small in size these plants are the ideal green solution for the city dweller, who has little time and only a small amount of space. However, there are so many different cultivars of cacti and succulents to collect – each with their own needs – that the watering, feeding, potting and general care can differ from plant to plant. The Little Book of Cacti and Other Succulents features a directory of 60 of the most popular varieties of cacti and succulents to own. The entry for each of the 60 plants is accompanied by a photograph and all the essential requirements for that variety in an easy-to-follow breakdown. This includes details on size, growth, spread and flowering, along with any extra tips on care for that specific plant. When given the right care, your cacti and succulents will thrive and grow. Additionally this book includes a general care section on everyday maintenance and potting, along with tips on how to deal with common pests and disease. This is a must-have guide for all cacti and succulent lovers, who already own or want to start a collection of these hardy little plants.

“For those of you—and your numbers are growing—gardening in drought-stricken parts of the country, The Bold Dry Garden will quench your thirst for inspiration.” —New York Times Book Review Ruth Bancroft is a dry gardening pioneer. As the world heats up and we become more and more conscious of our place in the natural scheme, the appeal of the native plants of the Southwest becomes ever more compelling for gardeners. In addition to providing year-round beauty with relatively little maintenance, landscaping with native plants contributes to the repair of the natural ecosystem and brings us closer to our environment—and the array of native plant material available to the Southwestern gardener is diverse and spectacular, providing seemingly endless opportunities for creative and attractive landscapes. In Landscaping with Native Plants of the Southwest, George Oxford Miller provides the definitive guide to choosing the best of the best among the native plants of Arizona and New Mexico. Covering wildflowers, shrubs, trees, vines, groundcovers, and cacti, this comprehensive, richly illustrated book selects the species whose ornamental qualities, growth habit, adaptability, maintenance needs, and beauty add up to the highest landscape value. The illustrations, maps, and charts provide guidelines for species selection and planting, ongoing maintenance, landscape design, and water and energy conservation. In-depth plant profiles describe the habitat requirements for more than 350 native plant species, subspecies, and varieties, with lush photographs illustrating how each plant looks and responds to landscape conditions. As the interest in native-plant landscaping and xeriscaping continues to grow, this book will find a place on the shelf of every gardener and landscaper in the region—or of anybody interested in recreating the beauty of the Southwest in a hot, dry corner of the yard.

“Eye-popping proof that water-wise gardens are bold, beautiful and brilliantly hued.” —San Diego Home and Garden Dry weather defines the Southwest, and it's getting dryer. As water becomes more precious, our gardens suffer. If we want to keep gardening, we must revolutionize our plant choices and garden practices. Hot Color, Dry Garden provides a joyful, color-filled way to

exuberantly garden in low-water conditions. Garden expert Nan Sterman highlights inspiring examples of brilliant gardens filled with water-smart plants. You'll find information about designing for color using plants, architecture, and accessories, along with a plant directory that features drought-tolerant plants that dazzle.

This survey of twenty-one gardens by Steve Martino, whose work blends colorful, man-made elements with native plants to reflect the sun-drenched beauty of the desert, is sure to inspire gardeners, landscapers, and admirers of California and the Southwest. For more than thirty years, Steve Martino has been committed to the development and advancement of landscape architecture in the Southwest. His pioneering work with native plant material and the development of a desert-derived design aesthetic is widely recognized. A recurring theme of his work is the dramatic juxtaposition of man-made elements with ecological processes of the region. His love for the desert--the interplay of light and shadow, the colors, plants, and wildlife--inspires his work. As Martino explains, "Gardens consist of two worlds, the man-made and the natural one. I've described my design style as 'Weeds and Walls'--nature and man. I use native plants to make the transition from a building to the adjacent natural desert." Though Martino's work is deeply connected to the natural world, he also has a flair for the dramatic, which is apparent from his lively color selections, sculptural use of plants, and keen attention to lighting, shadows, and reflections. Boldly colored stucco walls frame compelling views of the desert and sky, expanding the outdoor living area while solving common site problems such as lack of privacy or shade. Interspersed are custom structures molded in translucent fiberglass in vivid hues--colorful arbors, outdoor showers, and internally lit benches.

The Art of Southwest Landscaping is the second in a series on landscaping in the desert regions of the Southwest. It is dedicated to the wide variety of delightful desert accents, cacti, groundcovers, ornamental grasses, palms, shrubs, succulents, trees and vines that can beautify landscapes. The author, Dawn Layna Fried, has included a broad selection of plant species that she has used in her own practice as a landscape designer over the past 30 years. Dawn Layna Fried, also an avid plant photographer, has always been passionate about creating magnificent, outdoor living spaces using a variety of color and greenery. She has spent years designing and installing award-winning landscapes for her company, Horticulture Unlimited Inc, in Tucson, Arizona. Each of the plant species listed in this book have been used by Dawn to create unforgettable Southwest landscapes. Stunning photographs accompany each species. The author hopes her book will be the inspiration for you to create unimaginable gardens in your own backyard. *The Art of Southwest Landscaping* will educate longtime desert dwellers and newcomers alike about the variety of amazing landscape plants available today for small and large gardens. The book includes specific plant suggestions for a variety of landscapes, along with detailed characteristics and special features, such as flower color, fragrance, texture and uses for shade, sun or to attract butterflies. It also identifies the genus and species for each plant with detailed resources on how to keep plants healthy.

Based on the author's 30-year study with over 50,000 plants, *The Complete Book of Cacti and Succulents* offers a photographic A-Z which profiles more than 300 plants, with practical advice for propagating and cultivating them and imaginative ideas for display. The expert advice, supported by step-by-step photographs, covers subjects ranging from handling spiky plants to identifying pests and diseases. Catering both to enthusiastic beginners and ardent cactophiles around the world, this should be a useful sourcebook of plant species advice, ideas and inspiration.
