Written by the same author of 'Good Morning to Goodnight, ' Eleni Sophia writes this for you. A poetry collection about love, heartbreak, and healing, guiding young women towards a journey of self-love and healing. 'This One's for You' not only makes a wonderful gift for oneself but also for a friend

Recreates the kidnapping of U.S. General James Dozier by the Red Brigades, one of the most feared underground groups in Europe

Orthodontics is a fast developing science as well as the field of medicine in general. The attempt of this book is to propose new possibilities and new ways of thinking about Orthodontics beside the ones presented in established and outstanding publications available elsewhere. Some of the presented chapters transmit basic information, other clinical experiences and further offer even a window to the future. In the hands of the reader this book could provide an useful tool for the exploration of the application of information, knowledge and belief to some orthodontic topics and questions.

Commemorating the Justice League of America's 45th anniversary, The Justice League Companion is a comprehensive examination of the Silver Age JLA. Written by Michael Eury (author of the critically acclaimed Captain Action and co-author of The Superhero Book), The Justice League Companion traces the JLA's development, history, imitators, and early fandom through vintage and all-new interviews with the series' creators, an issue-by-issue index of the JLA's 1960-1972 adventures, classic and never-before-published artwork, and other fun and fascinating features!

A hands-on, applications-based approach to the design and analysis of commonly used centrifugal pumps Centrifugal Pump Design presents a clear, practical design procedure that is solidly based on theoretical fluid dynamics fundamentals, without requiring higher math beyond algebra. Intended for use on the factory floor, this book offers a short, easy-to-read description of the fluid mechanic phenomena that occur in pumps, including those revealed by the most recent research. The design procedure incorporates a simple computer program that allows designs to be checked immediately and corrected as needed; readers learn to calibrate the performance calculation program based on their own test data. Other important features of this book include: \* Up-to-date coverage of detailed design data \* Guidance on selection, troubleshooting, and modification of existing pumps \* A numerical example illustrating the design of a pump as readers move through the book \* Manual calculations-including worked examples-and personal computer program listings critical to pump design \* Ample references to all subjects for further study This unique handbook closes the gap between research and application and puts the fundamentals of advanced fluid mechanics where they will do the most good: in the hands of engineers, teachers, and designers who create industrial pumps.

101 inspirational lessons on how to achieve true happiness, find fulfilment and live peacefully and meaningfully every day, from Robin Sharma, leading life coach and author of the multi-million-copy bestseller The Monk Who Sold His Ferrari. How can one achieve true happiness? Is it possible to live with joy, passion and purpose every day? It is, and this potent book - with its powerful life lessons and profound wisdom - can show you how. Here Robin Sharma, one of the world's leading life teachers and bestselling authors, takes you on a journey towards a new way of living, allowing you to re-purpose your time to make every day meaningful. Offering simple solutions to life's most frustrating challenges, this is a guide to rebalancing the conflicting forces in your life. Its lessons include:- How to discover your calling- How to see your troubles as blessings- How to enjoy the path - not just the rewards- How to live fully, so you can die happy This is a truly remarkable book that you will treasure for a lifetime.

This remarkable collection of essays by leading Indigenous scholars focuses on the themes of freedom, liberation and Indigenous resurgence as they relate to the land. They analyze treaties, political culture, governance, environmental issues, economy, and radical social movements from an anti-colonial Indigenous perspective in a Canadian context. Editor Leanne Simpson (Nishnaabekwe) has solicited Indigenous writers that place Indigenous freedom as their highest political goal, while turning to the knowledge, traditions, and culture of specific Indigenous nations to achieve that goal. The authors offer frank and political analysis and commentary of the kind not normally found in mainstream books, journals, and magazines.

Demonstrates how feminism as an intellectual discipline has taken the wrong approach and examines the underlying passion that links feminists and readers of romance fiction

Veteran garden writers Nancy Szerlag of the Detroit News and Alison Beck have created a beautifully photographed book that features over 681 perennials suited to Michigan's climate and growing conditions. Tips on planting, growing, recommended varieties, and problems and pests are included. A Quick Reference Chart provides at-a-glance information on color, blooming, height, hardiness, and light and soil requirements.

Like a Mighty Wind New Leaf Publishing Group

Stuart just wanted his father to love him, but he was made to believe he was too naughty to be loved. Finally David Howarth was sent to prison for abusing Stuart's young sisters. Nobody knew the truth about Stuart's abuse until one fateful day when his father tried it again and Stuart fought back in the only way he knew how.

Despite the world's aging population, suitable clothing for the older community is a largely neglected area. This book considers the needs of the growing number of active older people and investigates how recent developments in textiles, fibres, finishes, design and integrated technology can be deployed to serve this group and improve quality of life. Part I provides an understanding of the active aging population by considering the group's experiences of and attitudes towards clothing and reviewing the barriers to their adoption of new wearable technologies. Part II focuses on the needs of the older population, including effective communication with designers and the age-related anatomical and physiological changes that designs should consider. Part III reviews design requirements and processes, and finally Part IV reviews the manufacture of suitable apparel, with chapters on suitable textile fibres, balancing technology and aesthetics and wearable electronics. Summarises the wealth of recent research on attitudes to clothing amongst the active ageing population Looks into how their aspirations can be investigated and appropriate apparel designed to meet their needs Examines design and manufacturing issues, including ways of accommodating physiological changes with age and

the use of wearable electronics

"VB 53" provides documentation of Vanessa Beecroft's most recent performance at Pitti Immagine Uomo 66 in Florence's Horticultural Garden. 21 models of varying appearance and race were planted in a mass of earth in the tepidarium. All were nude except for a single accessory: Helmut Lang shoes that wrapped around their ankles, separating their bare legs from the bare, rough earth. According to Beecroft, "The sole is reference to land art. Very dark and humid, like the rich foam of cultivated fields... The performance juxtaposes the purity of the female body, their nudity, with the dirty color of the soil and its material. Some models look like lillies, others like potatoes. Lilies and potatoes can also grow in filth." The 50 images in this book illuminate Beecroft's signature issues: the body, beauty and identity.

"When we believe the Bible as it is, we will see the power of God move in our lives and in our community as it did centuries ago in Bible times." -Mel Tari Translated into dozens of languages, with millions of copies sold, Like a Mighty Wind remains a beloved classic from global evangelist Mel Tari. Recounting the incredible story of revival on the island of Timor during 1965 in the midst of political turmoil, the book is an amazing testament to the power of faith and the reality of God's power to work miracles in modern times. The Spirit of God that swept across the island "like a mighty wind" continues today throughout Indonesia although persecution of Christians is all too common. The story of God's powerful revival in this region remains a testament to the truth of God's Word, and serves as a reminder to all believers that the Spirit of God manifests in our world now as it did in the earliest days of the Church.

The aim of this book is to present the basic concepts of mechanics of materials to beginners in a simplified and an organized way. Some knowledge of general mechanics is assumed as a prerequisite. More advanced topics are not covered in this presentation to avoid unnecessary confusion. The advantages and disadvantages of two common building materials, namely, reinforced concrete and steel, are listed in order to make comparison between the two materials and to make the reader able to select proper material of construction for a particular project. The basics of the design procedure are also explained in order to introduce the concept to the beginners. Basic tests performed on structural steel are also discussed in brief. Both SI and US Customary units are used throughout the book to make it a general reference. It is hoped that this book will also serve as a quick guide for the experienced engineers. Suggestions for further improvement of the presentation will be highly appreciated and will be incorporated in the future editions.

30 tutorials and more than 100 exercises in chemoinformatics, supported by online software and data sets Chemoinformatics is widely used in both academic and industrial chemical and biochemical research worldwide. Yet, until this unique guide, there were no books offering practical exercises in chemoinformatics methods. Tutorials in Chemoinformatics contains more than 100 exercises in 30 tutorials exploring key topics and methods in the field. It takes an applied approach to the subject with a strong emphasis on problem-solving and computational methodologies. Each tutorial is self-contained and contains exercises for students to work through using a variety of software packages. The majority of the tutorials are divided into three sections devoted to theoretical background, algorithm description and software applications, respectively, with the latter section providing step-by-step software instructions. Throughout, three types of software tools are used: in-house programs developed by the authors, open-source programs and commercial programs which are available for free or at a modest cost to academics. The in-house software and data sets are available on a dedicated companion website. Key topics and methods covered in Tutorials in Chemoinformatics include: Data curation and standardization Development and use of chemical databases Structure encoding by molecular descriptors, text strings and binary fingerprints The design of diverse and focused libraries Chemical data analysis and visualization Structure-property/activity modeling (QSAR/QSPR) Ensemble modeling approaches, including bagging, boosting, stacking and random subspaces 3D pharmacophores modeling and pharmacological profiling using shape analysis Protein-ligand docking Implementation of algorithms in a high-level programming language Tutorials in Chemoinformatics is an ideal supplementary text for advanced undergraduate and graduate courses in chemoinformatics, bioinformatics, computational chemistry, computational biology, medicinal chemistry and biochemistry. It is also a valuable working resource for medicinal chemists, academic researchers and industrial chemists looking to enhance their chemoinformatics skills.

Get up and running with Magento 2 to create custom solutions, themes, and extensions effectively About This Book Create unique solutions for Magento 2 by developing and implementing solutions, themes, and extensions Be proficient in the main functionalities, resources, and system structure of Magento 2 Get to grips with this practical and hands-on guide to raise your web development skills to the next level Who This Book Is For If you are a PHP developer who wants to improve your skills in e-commerce development by creating themes and extensions for Magento 2, then this book is for you. What You Will Learn Install and set up the Magento Ecosystem Choose the best options for Magento's Sell System features Work with Search Engine Optimization in Magento Create and customize themes for Magento Develop extensions for new Magento functionalities Package extensions to publish in the Magento Connect network Create Magento solutions for mobile devices Carry out performance adjustments to speed up your Magento system In Detail Magento is the e-commerce software and platform trusted by the world's leading brands. Used by thousands of merchants for their transactions worth billions, it provides the flexibility to customize the content and functionality of your website. By strengthening your fundamentals in Magento development, you can develop the best solutions and take advantage of the growing market. This fast-paced tutorial will provide you with skills you need to successfully create themes, extensions, and solutions to Magento 2 projects. This book begins by setting up Magento 2 before gradually moving onto setting the basic options of the Sell System. You will take advantage of Search Engine Optimization aspects, create design and customize theme layout, develop new extensions, and adjust the Magento System to achieve great performance. By sequentially working through the steps in each chapter, you will quickly explore all the features of Magento 2 to create a great solution. With ample examples and a practical approach, this book will ensure your success with this astonishing e-commerce management system. Style and approach This book would be a fast-paced tutorial guide that uses hands-on examples to developing new solutions for Magento e-commerce system. Each topic is explained sequentially in the process of creating a Magento solution, along with detailed explanations of the basic and advanced features of Magento 2.

Twenty-four one-hour-long lessons explore the fundamentals of the computer programming language, examining syntax, language, object oriented design, GUI programming, and the use of Python for CGI applications and as a system administration tool

Tina searches for love after running away from home and an alcoholic mother.

Fully revised, new edition presenting students with latest information in field of ophthalmology. Covers all sections of the eye and associated disorders and diseases. Previous edition published in 2008.

Study of Islamic canonical decisions (Fatwas) issued in India during the last hundred years.
