finding if a career in the trades is right for you, educating yourself and earning the proper certifications, establishing yourself as an excellent apprentice and journeyman in the industry, and moving on to start your own small business in the trades. At each step of the way, your *At Your Best* playbook provides the information, recommendations, outside resources, and concrete actions needed for taking the next successful step in You, Inc. Whether you are beginning your first career, changing careers, or ready to move up and start your own business as a carpenter, plumber, HVAC/R tech, or other tradesman, this is the book that will tell you how. There are currently over 6.5 million unfilled jobs in the skilled trades in the US. Despite being well-paying and secure, these jobs remain open because enough qualified candidates with the skills, attitude, and experience required do not exist. Moreover, plenty of opportunity exists for established tradespeople to start their own business, but they have no guidance. The *At Your Best Playbooks* series changes that.

In *The Plumber*, Lee W. Hickok, MD, an alcoholic urologist, is faced with case after case of patients from the skid row of Galveston, Texas, who have had one or both kidneys removed by a surgeon who calls himself the Plumber. These victims are from the dregs of society and drug addiction. Together with law enforcement, he must solve the mystery and stop this butcher. Suspects range from a local urologist to a mysterious Russian emigrant and his esoteric wife to one of his own residency staff. Lee W. Hickok is the protagonist in this series, which goes by his name and includes the novels *606 University* and *Sweet Amber*. He is continuously plagued by resisting his desires for alcohol, which he has given up after sustaining a course of D/Ts in *Sweet Amber*. *The Plumber* is a fast-paced who-done-it novel that will leave the reader wanting more. Hodding Carter writes, "The unsung hero of human history was, of course, the Brain of Drains, the Hub of Tubs, the Power of Showers, the Brewer of Sewers...the humble plumber.... The Irish may have saved civilization, once, but plumbers have done so countless times." When we consider the amenities that really make a difference in our well-being, surely good plumbing must rank near the top. But rarely have we taken the time to appreciate the engineering marvels that bring clean water into our homes with the turn of a tap and wash our waste products away with the flip of a lever. Until now. Witty, anecdotal, and thoroughly entertaining, *Flushed* not only chronicles the long and notable history of plumbing, but follows Hodding Carter's travels and travails as he casts his own Roman lead water pipes inspired by the writings of Pliny the Elder, descends into the sewers of London, installs a state-of-the-art Japanese toilet in his bathroom, and fearlessly tries to understand everything about this most underappreciated pillar of civilization. A winning combination of history, science, and firsthand experience, *Flushed* will entertain and educate all those who have never contemplated the hidden intricacies of this miracle of everyday technology. One of the fundamental tenets of modernism was its image of hygiene, its ideal of bringing cleanliness and order to the great unwashed, as evident in Adolf Loos's 1898 article, *Plumbers*. Using Loos as a point of departure, the essays in this collection examine architecture through the multiple meanings inherent in plumbing - from the pipes of modern hygiene, to the plumb line of the right angle, to Marcel Duchamp's Ready-made urinal.
