This NAO report examines the reorganisation of neonatal services in England, and has set out a number of facts in regard of baby births. In 2006, 635,748 babies were born in England, with 62,471 babies, approximately 10% of all births admitted to neonatal units. Babies require neonatal care because they are premature, have a low birth weight or suffer from illness or a condition, such as a heart defect. The NAO also states that there is a trend in low weight babies increasing in the UK and other developed countries. Premature babies are the result of a number of factors, including maternal age, obesity, smoking, ethnic origin, deprivation and assisted conception such as IVF. Also, the number of women giving birth at 40 years of age or more has more than doubled since 1986. The NAO has set out a number of findings and recommendations, including: that there is a widespread support for neonatal services to be delivered through managed clinical networks, but these networks have evolved at different rates; most clinical networks have made progress in reducing long-distance transfers, but only half provide specialist transport services 24 hours a day, seven days a week; that there has been an improvement in communication between clinical networks; that there are still capacity problems that undermine the effectiveness and efficiency of neonatal care, and that this is often due to a shortage of nurses; that a greater account should be taken of parent's needs when neonatal care is required, such as communication with medical staff, information about the babies' care and accommodation for the parents; the costs of neonatal services are not fully understood, and there is a mismatch between costs and charges.

Do you want to learn the art of mental manipulation, discover subliminal manipulation methods, how to analyze or read body language with NLP? Do you want to learn the secrets of dark seduction, hypnosis and mind control? If yes, then keep reading... Dark Psychology is both the study of criminal and deviant behavior and a conceptual framework in order to decipher the potential of evil that could be found within all of us. The idea with this one is that everyone, even if they realize it or not, will have the potential, if it is going to benefit themselves and even their families enough, to victimize other humans and creatures. Some people are just more willing to do it than others. You may not think about doing this to just get a promotion at work or to get someone to notice you, but you may be willing to hurt other people if you knew it would save your life or save the life of someone in your family. According to dark psychology, every human has a bank of malevolent intentions geared towards other people and these intentions range from fleeting thoughts to minimally obtrusiveness to pure psychopathic deviant characters that are devoid of any form of cohesive rationality. Every human will have had thoughts or feeling of acting towards another person in a brutal manner and many times would have had thoughts or the feelings of hurting

someone else without mercy. To be honest with oneself is to accept the fact that at a certain point in time, there has been a feeling of wanting to commit some heinous acts. While many of us are going to restrain or hide this kind of tendency, there are those who are going to see these impulses and decide to act on them. The idea of dark psychology is to seek to understand these perceptions, feelings, thoughts, and even the subjective processing systems that tend to lead to the predatory behavior that is seen as unethical to what most of modern society is going to see as normal or good. This book covers the following topics: - Dark psychology traits - Nlp - How to analyze people - Nonverbal -verbal communication - Manipulation - Subliminal manipulation techniques - Favorite victims of manipulators - Profiling a sociopath - Subconscious mind suggestions - Using dark psychology to manipulate a man - Identifying hidden manipulation - What to do if you get caught - Consequences of remaining in manipulative relationships - Confidence and how it is displayed - Spot the lie - Understanding psychopaths - Employing manipulation and persuasion to get what you want ...And much more ? Dark psychology is going to assume that any abusive, deviant, or criminal behaviors that are showing up are done for a purpose. They may be seen as bad or evil, but the other person is doing them for some purpose, and not just because they feel like it. They are going to have a rational goal most
