In this encyclopedic book, Lewis provides insights into the origins, training, tactics, weapons and achievements of special forces and special mission units throughout the world, focusing particularly on US and UK forces. He also looks at the codes that bind the members of these elite units together. He reveals training secrets in everything from wilderness survival to hand-to-hand combat. In doing so, he draws extensively on biographies, autobiographies, training manuals, interviews and press coverage of key operations. The elite forces covered include: The British Army's Special Air Service (SAS), established in 1950, which has served as a model for the special forces of many countries. Its counter-terrorist wing famously took part in the hostage rescue during the siege of the Iranian Embassy in London in 1980. The Parachute Regiment, the airborne infantry element of 16 Air Assault Brigade, which spearheads the British Army's rapid intervention capability. It is closely linked to United Kingdom Special Forces. The US Navy's SEALs (Sea, Air, Land Teams), trained to conduct special operations in any environment, but uniquely specialised and equipped to operate from and in the sea. Together with speedboat-operating Naval Special Warfare Combatant-Craft Crewmen, they form the operational arm of the Naval

Special Warfare community, the Navy component of the US Special Operations Command. Their special operations include: neutralizing enemy forces; reconnaissance; counter-terrorism (famously in the killing of Osama bin Laden); and training allies. The US Army's Delta Force: The Special Mission Unit, 1st Special Forces Operational Detachment-Delta (1st SFOD-D), known simply as Delta Force, the Army component of Joint Special Operations Command. Its role is counter-terrorism, direct action and national intervention operations, though it has the capability to conduct many different kinds of clandestine missions, including hostage rescues and raids. The US Army Rangers, a light infantry combat formation under the US Army Special Operation Command. The Green Berets - motto: 'to free the oppressed' - trained in languages, culture, diplomacy, psychological warfare and disinformation. Russia's Spetsnaz, whose crack anti-terrorist commandos ended the Moscow theatre siege, and who have a reputation for being among the world's toughest and most ruthless soldiers. Spetsnaz units saw extensive action in Afghanistan and Chechnya, often operating far behind enemy lines. Israeli Special Forces, especially Shayetet 13 (Flotilla 13), whose motto, in common with the rest of the Israeli military, is 'Never again', a reference to the Holocaust. They are particularly adept at the specifically Israeli martial art Krav Maga, which they dub 'Jew-jitsu'.

The audience for this book is that group whose job is "selling," and who desire to hone the skills associated with their profession and advance from "salesperson" to "sales professional" and to continue their professional development until having achieved the penultimate role in sales: that of "Trusted Advisor" to his or her customer or client. The author recognizes that the complexity associated with selling to "Major Accounts" requires a unique skill set, methodology and sales framework, and a degree of professionalism to deal with such accounts, which are characterized by having multiple decision makers, a longer sales cycle - ranging from six months to two years or more, and a higher dollar volume as represented by both "deal size" and annual sales volume. As comfortable on "Mahogany Row" dealing with C-Level executives as with dealing at the Project Manager level, it is the unique combination of skills, poise, bearing, professionalism and commitment to continued professional development that characterizes the successful Sales Professional in this role.

An aging arsenal of decaying tanks and antique rifles lets Argead forces scrape by, but true victories are won by the Polaris: elite battle-mages enslaved for the world-ending sins of their ancestors. Taki is an ambitious Polaris stuck with the dregs of his kind in a squad named Tirefire the Lesser. Though career suicide might be bearable in the right company, his new companions are anything but. The sniper despises him, the man-at-arms is profoundly depressed, and his beautiful captain has a penchant for beating her underlings. As the invading horde draws closer, this squad of defectives must band together despite the long odds against them. But with Imperial assassins out for their blood and treachery from within their own ranks, survival will come with a high price.

For many, a motorcycle bought at the beginning of the 1950s was a first taste of the freedom offered by personal transport. Although postwar austerity was fading, money was still tight and new machines virtually unobtainable, but there were plenty of cheap prewar machines around and an ex-War Department motorcycle could be bought from one of the big city dealers on the never-never; better still it would be sent to your local railway station. Ex-army dispatch riders' coats and boots would serve to keep the weather at bay as the new motorcyclists explored and enjoyed the quiet roads in a pre-motorway era. The decade would become a Golden Era of motorcycling as manufacturers brought new and excitingly advanced machines to an appreciative audience which had never even heard of a Japanese motorcycle. Motorcycle sport mushroomed in popularity at a time when you actually had to go to the race to see it and helped to reinforce the public's ever-growing enthusiasm for the motorcycle. The era would also see the arrival of the moped, scooter and bubblecar. For those that were there, Jeff Clew's insight to motorcycling of the '50s will provide a delightful nostalgic journey into the past, while those younger riders who cherish 1950s motorcycles today will discover a whole new dimension to their enjoyment of the machines.

This practical and helpful volume details how clinicians can work through various common challenges in individual, couple, or group psychotherapy. Chapters draw upon clinical wisdom gleaned from the author's 48 years as a practicing psychiatrist to address topics such as using countertransference for therapeutic purposes; resistance, especially when it needs to be the focus of the therapy; and a prioritization of exploration over explanation. Along with theory and clinical observations, Dr. Gans offers a series of "Clinical Pearls," pithy comments that highlight different interventions to a wide range of clinical challenges. These include patient hostility, the abrupt and unilateral termination of therapy, the therapist's loss of compassionate neutrality when treating a couple, and many
