Winner of the Man Booker Prize: "Okri shares with García Márquez a vision of the world as one of infinite possibility. . . . A masterpiece" (The Boston Sunday Globe). Azaro is a spirit child, an abiku, existing, according to the African tradition, between life and death. Born into the human world, he must experience its joys and tragedies. His spirit companions come to him often, hounding him to leave his mortal world and join them in their idyllic one. Azaro foresees a trying life ahead, but he is born smiling. This is his story. When President Bill Clinton first went to

Africa he quoted from *The Famished Road*, which has inspired literature, art, politics, and pop songs—and even been referenced in an episode of *The Simpsons*. A transformative story for all ages and all times, it means many things to many people. Few contemporary novels have aroused as much passion as this one. Indeed, twenty-five years after its breakout publication, the iconic story of Azaro's travels continues to mesmerize new generations. For readers of *Things Fall Apart* or *One Hundred Years of Solitude*, this Man Booker Prize-winning blend of fabulism and gritty realism by the Nigerian author of *Astonishing the Gods* and *Dangerous Love* is a “dazzling, hypnotic” journey through Africa that “weaves the humblest detail with the most extravagant flight of fancy to create an astonishing fictional tapestry” (*San Francisco Chronicle*). Already considered a classic of world literature, it is “a masterpiece if ever one existed” (*The Boston Sunday Globe*).

Daniel C. Liebler masterfully introduces the science of proteomics by spelling out the basics of how one analyzes proteins and proteomes, and just how these approaches are then employed to investigate their roles in living systems. He explains the key concepts of proteomics, how the analytical instrumentation works, what data mining and other software tools do, and how these tools can be integrated to study proteomes. Also discussed are how protein and peptide separation techniques are applied in proteomics, how mass spectrometry is used to identify proteins, and how data analysis software enables protein identification and the mapping of modifications. In addition, there are proteomic approaches for analyzing differential protein expression, characterizing proteomic diversity, and dissecting protein-protein interactions and networks.

The evolution of political parties and party systems in the world's largest, most complex and volatile democracy reached a crucial stage at the turn of the century. The three general elections held in quick succession at the end of the nineties threw up three major trends; the apparent demise of the Congress Party as the dominant pan-national party; the emergence of a 'federalised' party structure and coalition politics; and the decline of the Third Front as a force in national politics. This topical collection of original essays by eminent scholars drawn from diverse disciplines examines these wide-ranging changes in political parties - their leadership, ideological profile, support base and programmatic content - as well as in the texture of the party system in the country. In understanding these complex processes this volume provides a comparative framework by bringing in the experiences of Germany and the European Union which are undergoing similar political transformation. The 'federalisation' of national politics and the significant transformation in India's political sociology are examined at four levels. 1. the statues and strategies, interaction patterns and processes of India's innumerable political parties as well as key questions governing the party system in the country; 2. the texture and pattern of political alliances from the national perspective - particularly, how alliances with regional parties are viewed and made by national parties; 3. conversely, the perspective of the regional parties in making these alliances; and 4. the impact of the 73rd Constitutional amendment on parties and politics at the local level and in small states. Overall, this volume provides an incisive and comprehensive analysis of the far-reaching changes in both party systems and electoral behaviour that have occurred since the end of the twentieth century. Constituting an important

contribution to the on-going debate on these issues, this volume will attract the attention of students of Indian politics, political science, democracy, party systems and comparative politics. From legendary playwright August Wilson comes the powerful, stunning dramatic bestseller that won him critical acclaim, including the Tony Award for Best Play and the Pulitzer Prize. Troy Maxson is a strong man, a hard man. He has had to be to survive. Troy Maxson has gone through life in an America where to be proud and black is to face pressures that could crush a man, body and soul. But the 1950s are yielding to the new spirit of liberation in the 1960s, a spirit that is changing the world Troy Maxson has learned to deal with the only way he can, a spirit that is making him a stranger, angry and afraid, in a world he never knew and to a wife and son he understands less and less. This is a modern classic, a book that deals with the impossibly difficult themes of race in America, set during the Civil Rights Movement of the 1950s and 60s. Now an Academy Award-winning film directed by and starring Denzel Washington, along with Academy Award and Golden Globe winner Viola Davis.

The monograph "Explicit Biology: A Revision Course" for UTME, POST-UTME and other related examinations written by O.J. Olaoye is a complementary text to the various textbooks that have been written in the subject area. The book has five sections and twenty six chapters on all the biology topics. This book has become timely in view of the poor results that are being witnessed in the UTME examination especially in the sciences and mathematics, biology inclusive. These majorly are due to poor or inadequate access to good study materials. Each chapter has annotated topics followed by copious specimen questions on some past UTME and POST -UTME examination, for practice and emphasis. The topics in each chapter are adequately treated and with clarity. The illustrations are simple but effective. The author has done a lot of work and put in efforts to come out with a very readable and useful text. It is highly recommended to all the students aspiring to undertake the UTME and POST-UTME examination, in order to improve highly their chances of success. O.A. Sofola B.Sc, M.Sc, M.B.B.S (Lagos), Ph.D (Leeds), FAS (Nig.) Professor of physiology, College of Medicine, University of Lagos Former Vice Chancellor, OOU, Ago- Iwoye. Ogun State.

I know who I am Kelvin seemed desperate to win his father's approval. However, Mr Eze not only seemed unwilling to bestow it, but hell bent in making life unbearable for his acclaimed son. Kelvin thought it would be best to find his true family rather than endure the torture of being the unwanted child. He realised that his quest for recognition was unlikely to succeed, so he set his eyes on freedom. In the meantime, Kelvin expected that a good academic performance would change his luck and put him right with Mr Eze or at least boost his confidence in his abilities. With all his attention on his studies, competing for the best grades against the leading brains in his class, especially Christian, an indomitable rival, he would not let school romance get in the way fo his goal. But slowly and steadily, Chioma, gained his trust and won him over. He would have to make a decision between holding on to his moral principle or satisfying his human desire for friendship. New Home, New Identity Marginalised and decimated, the Biafran people were forced to go to war and secede from Nigeria. But decades after losing the war and embracing the Nigerian identity, they are still not treated as equal citizens in their home country. As a new wave of terrorism sweeps the northern parts of the country, the Biafran people, predominantly Igbo are again decimated as they have been for decades in every crises and this led to renewed discussions about their independence. For Biafra, the fight for equality was over and their Sovereignty was not negotiable. For Kelvin, it wasn't very different, and so his quest for truth and independence must begin. His compulsory holiday in Igbo land would expose him to the truth that might have indirectly caused him to abandon his academic pursuit. Perhaps, it was just an excuse to free himself from the clutch of Mr Eze and begin his quest for the truth about his identity.

In the early sixties, Tayo Ajayi sails to England from Nigeria to take up a scholarship at Oxford University. There he discovers a whole generation high on visions of a new and better world. He meets Vanessa Richardson, the beautiful daughter of a former colonial officer. Their story, which spans four decades, is a bittersweet tale of a brave but doomed affair and the universal desire to fall truly, madly and deeply in love. A lyrical and moving story of unfulfilled love fraught with the weight of history, race and geography and intertwined with questions of belonging, aging, faith and family secrets. In Dependence explores the complexities of contemporary Africa, its Diaspora and its interdependence with the rest of the world.

This is an African retelling of Euripides: an unnervingly topical story of a people and a beloved city destroyed by the brutality of war. The play was first performed in Lagos in 2003 under the distinguished director Chuck Mike, and subsequently toured the UK.
