FROM a very early period of my life the entire bent of my inclinations had been toward microscopic investigations. When I was not more than ten years old, a distant relative of our family, hoping to astonish my inexperience, constructed a simple microscope for me by drilling in a disk of copper a small hole in which a drop of pure water was sustained by capillary attraction. This very primitive apparatus, magnifying some fifty diameters, presented, it is true, only indistinct and imperfect forms, but still sufficiently wonderful to work up my imagination to a preternatural state of excitement.

From contaminated infant formula to a spate of all-too familiar headlines in recent years, food safety has emerged as one of the harsher realities behind China's economic miracle. Tainted beef, horse meat and dioxin outbreaks in the western world have also put food safety in the global spotlight. Food Safety in China: Science, Technology, Management and Regulation presents a comprehensive overview of the history and current state of food safety in China, along with emerging regulatory trends and the likely future needs of the country. Although the focus is on China, global perspectives are presented in the chapters and 33 of the 99 authors are from outside of China. Timely and illuminating, this book offers invaluable insights into our understanding of a critical link in the increasingly globalized complex food supply chain of today's world.

This book is required reading for every concerned citizen—the material it covers should be discussed in schools, colleges, and universities throughout the country."— New York Review of Books Not since the atomic bomb has a technology so alarmed its inventors that they warned the world about its use. That is, until 2015, when biologist Jennifer Doudna called for a worldwide moratorium on the use of the gene-editing tool CRISPR—a revolutionary new technology that she helped create—to make heritable changes in human embryos. The cheapest, simplest, most effective way of manipulating DNA ever known, CRISPR may well give us the cure to HIV, genetic diseases, and some cancers. Yet even the tiniest changes to DNA could have myriad, unforeseeable consequences, to say nothing of the ethical and societal repercussions of intentionally mutating embryos to create "better" humans. Writing with fellow researcher Sam Sternberg, Doudna—who has since won the Nobel Prize for her CRISPR research—shares the thrilling story of her discovery and describes the enormous responsibility that comes with the power to rewrite the code of life. "The future is in our hands as never before, and this book explains the stakes like no other." — George Lucas "An invaluable account . . . We owe Doudna several times over." — Guardian

Genome editing is a powerful new tool for making precise alterations to an organism's genetic material. Recent scientific advances have made genome editing more efficient, precise, and flexible than ever before. These advances have spurred an explosion of interest from around the globe in the possible ways in which genome editing can improve human health. The speed at which these technologies are being developed and applied has led many policymakers and stakeholders to express concern about whether appropriate systems are in place to govern these technologies and how and when the public should be engaged in these decisions. *Human Genome Editing* considers important questions about the human application of genome editing including: balancing potential benefits with unintended risks, governing the use of genome editing, incorporating societal values into clinical applications and policy decisions, and respecting the inevitable differences across nations and cultures that will shape how and whether to use these new technologies. This report proposes criteria for heritable germline editing, provides conclusions on the crucial need for public education and engagement, and presents 7 general principles for the governance of human genome editing.

Griffin and Natalia are still surviving one veil at a time, living life not knowing when another one might make an appearance, or where it may take them. Mountains, desert, summer or winter—there's no way to prepare, they just take what's thrown at them. Through it all their love continues to grow, and it's more than just because of circumstance. They've grown to rely on each other. Depend on one another. But they shouldn't get too comfortable... They soon learn that with the storms, they're not only traveling to different locations, but different times as well. How far into the future or past will they go? When will it end? No one knows. All that matters is they have to survive, no matter what. Together. Do they find strength in numbers, gain new allies, or are they safer with just the two of them? New enemies, old friends, and new revelations of their situation... They've developed a theory, and if it's correct, they could finally end back up where they started, but that could mean losing each other for good, which they vow never to do.

Born the son of a clergyman on October 18, 1662, Matthew Henry was ordained into the British Presbyterian Church where he held the pastorate in Chester from 1687 to 1712. Indians wryly admit that ‘India grows at night’. But that is only half the saying, the full expression is: ‘India grows at night... when the government sleeps’, suggesting that the nation may be rising despite the state. India’s is a tale of private success and public failure. Prosperity is, indeed, spreading across the country even as governance failure pervades public life. But how could a nation become one of the world’s fastest-growing economies when it’s governed by a weak, ineffective state? And wouldn’t it be wonderful if India also grew during the day—in other words, if public policy supported private enterprise? What India needs, Gurcharan Das says, is a strong liberal state. Such a state would have the authority to take quick, decisive action, it would have the rule of law to ensure those actions are legitimate and finally, it would be accountable to the people. But achieving this will not be easy, says Das, because India has historically had a weak state and a strong society. About the Author Gurcharan Das is a well known author, commentator and public intellectual. He is the author of the much acclaimed *The Difficulty of Being Good*, and the international bestseller *India Unbound*, which has been translated into many languages and filmed by the BBC. His other works include the novel, *A Fine Family*, a book of essays, *The Elephant Paradigm*, and an anthology, *Three Plays*, consisting of *Larins Sahib*, *Mira* and *9 Jakhoo Hill*. Gurcharan Das writes a regular column for a number of Indian newspapers including the *Times of India* and occasional guest columns for *Newsweek*, *Wall Street Journal* and *Foreign Affairs*. Gurcharan Das graduated from Harvard University and was CEO of Procter and Gamble India before he took early retirement to become a full time writer. He lives in Delhi.

DIVAN OF GHALIB Translation & Introduction Paul Smith Mirza Asadullah Beg (1797-1869),

known as Ghalib (conqueror) was born in the city of Agra of parents with Turkish aristocratic ancestry. When he was only five his father Abdullah Beg Khan died in a battle while working under Rao Raja Bakhtwar Singh of Alwar and his uncle Nasrullah Beg Khan took charge of him. But he lost his uncle also at the age of eight. He then moved to Delhi. He lived on state patronage, credit or the generosity of friends. His fame came to him posthumously. He had remarked during his life that although his age had ignored his greatness he would be recognized by later generations. History has vindicated his claim. Although he wrote many more ghazals, qit'as and ruba'is in Persian he is more famous for those written in Urdu. Before Ghalib, the Urdu ghazal was primarily an expression of anguished love but Ghalib expressed his philosophy and cynicism. In keeping with the conventions of the ghazal, in most of Ghalib's couplets the 'beloved' could be a beautiful woman, boy, monarch or even... God or the Spiritual Master as in his many Sufi poems. Here is the largest selection of his Persian & Urdu ghazals and other poems in the correct form and meaning in English ever published. Introduction on his Poetry, Life & Times and on the Forms of Poetry he used. Selected Bibliography. Large Format Paperback 7" x 10" 265 pages COMMENTS ON PAUL SMITH'S TRANSLATION OF HAFIZ'S 'DIVAN'.
