It might be easier to say what this guide isn't, rather than what it is. It isn't an in depth look at every single function available within the WordPress dashboard. Nor is it a guide to help you develop or modify WordPress themes. It's an easy to follow WordPress manual that will help you to get an overall understanding of how you use the various features within the WordPress Dashboard to keep your website or blog updated. The official WordPress Codex is great if you want to get really involved in developing your own WordPress theme or modifying your site with plugins, but it can be a bit daunting for those users who just want a simple guide to using the Content Management side of WordPress or just need to update their site pages every so often. The Easy WP Guide will teach you how to add content to your website and keep it updated, simply and easily. This version has been completely updated for use with WordPress 4.3.

Women have been defined by men in men's terms until relatively recently but now that women are coming into their own both out in the workforce and as separate entities unto themselves, the question is, once you throw off the shackles of what it means to be a woman as defined by men all throughout history, what exactly is a women as the pure essence she is in her soul? Women are as complex and individual as men if they choose to be yet as simple and one-dimensional as the stereotypical caricatures if they choose to be too so women are women just like men are men. In modern society, a woman can be pretty well anything she wants but the problem, hypocrisy or

"The rising demand for energy, the higher costs of oil and gas, and the association of fossil fuels with adverse climate change have all brought a renewed interest in nuclear energy. Nuclear power, however, is itself controversial, because of its costs, its environmental effects and the security risks it poses. This book discusses these critical issues surrounding nuclear power in relation to Asia. It discusses also the politics of nuclear power and the activities of civil society organisations concerned about nuclear issues. Throughout the book the perspectives are included of both proponents and opponents of nuclear power on the key controversial issues."--Publisher's description.

an ideal world. Home schooling is becoming more popular as many parents become disillusioned with public schooling and want to develop closer relationships with their children during the formative years. The mainstay of the movement seems to be Christian parents who don't like the secular/ humanistic curriculum and the so-called worldly influences of other children in public schools, hence, they choose to educate them on their own with Christian values. The other thrust seems to be that the public school system simply fails in its obligation to churn out well-educated children ready for the competitive real world. The home schooling movement, arguably started by John Holt in the 1970s, is based upon the idea that children learn better by themselves following their own natural interests.

The unprecedented results of the 2008 national elections took many Malaysians by surprise. The component parties of the ruling coalition suffered huge losses, while the opposition was

victorious in several states. Many media scholars and political pundits, including politicians, pointed to the online platform as a democratic tool that had increased support for the opposition. In the 2013 election the ruling party turned its spotlight on new media to try to regain voter support. In order to obtain a better understanding of the much-touted democratizing effects of the online media, this book employs an alternative lens to examine the use of new media at the intersection of social and political realities. It explores the ways individual political bloggers, Facebookers and Twitterers used cyberspace to battle for voter support in the 2008 and 2013 national elections. It examines the cultural practices and the social and political affiliation and aims of individual actors, as well as the social ties that subsequently emerged from the use of the online media. This research employs a political economy approach to the media, Habermas's notion of the public sphere, and the social determinism perspective in order to understand the extent to which online media can enrich political life and bring about new ways of campaigning.

Faith in the UK's political system has reached new lows. Politicians and commentators are lining up to offer answers, but what if the problem goes beyond left and right, trust and bureaucracy? What if the system puts too much power in the hands of politicians in London and not enough in the hands of ordinary people? This important book addresses a key issue of our time: where should power and governance lie in our democracy? Simon Parker, a leading expert on public services and government, claims the answer is to give power away. Indeed, across the country, communities and cities are already starting to take matters into their own hands, reinventing citizenship for the 21st century. Including fascinating interviews with former ministers and officials about their experience of managing the central state, as well as

illuminating international case studies, Parker offers policy recommendations and practical ideas for giving power away and creating a new kind of politics focused on unleashing society's creative potential. In so doing, he provides a route map for change, showing how decentralisation can make us happier, healthier and more equal.

online world to grow your business. The secret: think of your audience as your friends and then treat them that way. The Power Friending approach is all about developing real relationships based on mutual respect and support. While you may never meet some of your online friends face-to-face, they still expect you to follow the established norms of friendship: be authentic, reach out, listen. And don't lie to your friends. These same rules apply when building a strong brand online. Whether you're a blogger, a small company, a well-known global enterprise, or an aspiring queen of the Internet, Mac shows how to make the most of social networking tools, including: -Targeting the right networks -Feeding and seeding a community -Authentically engaging with customers and fans -Managing your online friendships on a daily basis and on a budget This isn't a book of abstract theories or complicated strategies. Mac writes from personal experience: she built a huge fan base through social networking. She also draws on real-life and up-to-date examples to give you the information you really need in order to establish and maintain credibility and meaningful relationships online.

Are you struggling to cut through the noise and convey your message to the marketplace? Become your own media channel and tell your stories like a PR pro! We live in a fast-paced, digital-first world cluttered with brands and individuals telling the world how great they are. It's no wonder consumers are so cynical and distrustful. They resent being interrupted with meaningless ads, pitches and promotional messages. They simply don't care about you or your business—because you haven't given them a reason to. Meanwhile, marketers and PR pros are beginning to accept that many of the methods they've been using to reach potential customers and influencers simply don't work anymore. Bottom line: Standing out, getting noticed and resonating in the marketplace is a growing challenge for businesses and

organizations, large and small. Trust and reputation have never been more important in business. Learn how to harness the power of both public relations and content marketing to build recognition, influence and credibility for your business, organization or personal brand. In this book, veteran public relations practitioner and marketing speaker Trevor Young—aka “The PR Warrior”—shows you how to strategically use content marketing for PR to:

- Humanize your company or organization
- Deepen the connection your brand has with consumers
- Grow your influence within the industry you operate
- Build familiarity and trust in the marketplace
- Connect with the people who influence your clients and customers
- Increase new business leads and sales
- Reduce the customer’s buying cycle
- Make paid-for advertising work harder

Written for entrepreneurs, change agents, business leaders, marketers and PR practitioners, *Content Marketing for PR* is your essential guide to building a visible brand that’s recognized, respected and relevant in today’s noisy social world.

There are about 100 billion nerve cells or neurons in your brain's cortex. They were all there when you were born. The theory right now is that you do not grow new brain cells. You have x amount at birth and that's it. Every neuron is capable of sprouting up to 20,000 dendrites if they are nourished properly and stimulated. In addition to neurons, we each have up to 900 billion glial cells which develop myelin, the sheathing that

wraps around neuron axons. Axons are the nerve pathways that send messages from neuron to neuron. We grow new brain cells in the cerebellum, the lobe in the back of the brain that is responsible for motion, moving our bodies and muscle control. The neurons, glial cells and new brain cells in the cerebellum all depend on what we feed our bodies with. If the pregnant mother is undernourished and further damages her body by taking drugs, smoking, drinking alcohol, etc., the baby will not be born with the normal expected 100 billion neurons.

This book explains how gossip contributes to knowledge. Karen Adkins marshals scholarship and case studies spanning centuries and disciplines to show that although gossip is a constant activity in human history, it has rarely been studied as a source of knowledge. People gossip for many reasons, but most often out of desire to make sense of the world while lacking access to better options for obtaining knowledge. This volume explores how, when our access to knowledge is blocked, gossip becomes a viable path to knowledge attainment, one that involves the asking of questions, the exchange of ideas, and the challenging of preconceived notions.
