A beautiful poetry collection chosen by the Poet Laureate, Carol Ann Duffy. Carol Ann Duffy, the Poet Laureate, has chosen her favourite poems for children for this stunning collection of classic and modern verse, exquisitely illustrated by multi-award-winning illustrator Emily Gravett.

This attractive, full-colour coursebook covers the seven topics of the Higher Level extension (HL) syllabus in Geography for the International Baccalaureate (IB) Diploma. It explores the HL theme, Global Interactions, emphasising the various scales at which issues can be studied, and identifying and carefully explaining key global issues. The coursebook guides students through the HL syllabus, building geographical skills and making connections to other areas of the Geography course and to concepts in the Theory of Knowledge. It also encourages detailed study of primary and secondary sources, developing students' analytical skills. The content is tailored to the requirements and assessment objectives of the IB syllabus, making it relevant to the way in which the subject is taught, assessed and examined.

Write Like a Chemist A Guide and Resource Oxford University Press on Demand  
Meant as a companion to The ACS Style Guide, not a competitor, this book is an extraordinary resource for upper-level chemistry majors as well as graduate students faced with writing a journal article, a conference abstract, or a thesis. Full of prepared research projects and exercises, WriteLike a Chemist provides expert instruction ideal for students from diverse backgrounds, including both native and nonnative speakers of English. It is specifically designed to help students transition from the writing skills required in undergraduate lecture

and laboratory classes to writing skills required by career chemists: a journal article, a scientific poster, and a research proposal. Each of these types of writing is directed towards a different audience, and writing for a journal requires a different writing style than writing a research proposal for the National Science Foundation. Thus to write like a chemist requires that one learns to write for different audiences. This book assists young scientists in developing that essential writing skill.

The book in its present form introduces detailed descriptions and illustrative solved problems in the fields of Water Supply, Sanitary and Environmental Engineering. The Soprano Sorceress, the first novel in New York Times bestselling author L. E. Modesitt, Jr.'s epic fantasy series the Spellsong Cycle about a singer and music instructor at Iowa State University who gets far more than she expected when she is magically transported to the world of Erde. On Erde, Anna Marshall is no longer just a professional singer. In this world, song is magic, making Anna a sorceress, potentially the strongest in Erde. Here, a wrong note can mean death to a sorcerer, but Anna's lifetime of training means she can sing more powerfully and precisely than anyone else. Her power does not go unnoticed and

makes her a target. To survive, Anna must learn enough song-magic and understand this new world. One of the New York Times' most popular journalists presents groundbreaking scientific news about marriage. And, surprise: It's good news. We've all heard the statistic: Fifty percent of marriages end in divorce. It's enough to make many couples give up when the going gets rough, thinking that's what everybody else does. But what if it weren't true? What if, in fact, it's not only possible but often easier than you think to save a seemingly troubled relationship? These are the questions Tara Parker-Pope asked herself after her own divorce. An investigative journalist on the health and wellness beat, she turned to some of the top biologists, neuroscientists, psychologists, and other scientists for the facts about marriage and divorce. Those facts were more positive and provocative than she'd ever expected, and For Better offers page after page of astonishing, eye-opening good news. Parker-Pope presents the science behind why some marriages work and others don't; the biology behind why some spouses cheat and others remain faithful; the best diagnostic tools created by the most cutting-edge psychologists to assess the probability of success in getting married, staying married,

or remarrying. There are questionnaires to uncover potentially damaging hidden attitudes toward spouses. There are tools to show the impact of routine, fresh activity and how small adjustments can make a huge difference. Tara Parker- Pope's genius is for exploring the science behind the big issues that affect our lives every day and translating that science into advice that we can use-every day. For Better is the definitive guide to the most profound relationship of our lives.
