The magazine covers General Knowledge, Science and Technology news, Interviews of toppers of examinations, study material of Physics, Chemistry, Zoology and Botany with model papers, reasoning test questions, facts, quiz contest, general awareness and mental ability test in every monthly issue.

While the standard solid state topics are covered, the basic ones often have more detailed derivations than is customary (with an emphasis on crystalline solids). Several recent topics are introduced, as are some subjects normally included only in condensed matter physics. Lattice vibrations, electrons, interactions, and spin effects (mostly in magnetism) are discussed the most comprehensively. Many problems are included whose level is from "fill in the steps" to long and challenging, and the text is equipped with references and several comments about experiments with figures and tables. This book constitutes the thoroughly refereed post-conference proceedings of the 5th Conference on Theory of Quantum Computation, Communication, and Cryptography, TQC 2010, held in Leeds, UK, in April 2010. The 15 revised papers presented were carefully selected during two rounds of reviewing and improvement. Focussing on theoretical aspects of quantum computation, quantum communication, and quantum cryptography - part of a larger interdisciplinary field embedding information science in a quantum mechanical framework - the papers present current original research. Topics addressed include quantum algorithms, models of quantum computation, quantum complexity theory, simulation of quantum systems, quantum cryptography, quantum communication, quantum estimation and measurement, quantum noise, quantum coding theory, fault-tolerant quantum computing, and entanglement theory.

This is a beautiful, gift book edition (with a ribbon marker) of a modern-day classic. Start Where You Are is an indispensable handbook for cultivating fearlessness and awakening a compassionate heart. With insight and humor, Pema Chödrön, author of The Wisdom of No Escape and When Things Fall Apart, presents down-to-earth guidance on how to make friends with ourselves and develop genuine compassion toward others. The author shows how we can "start where we are" by embracing rather than denying the painful aspects of our lives. Pema Chödrön frames her teachings on compassion around fifty-nine traditional Tibetan Buddhist maxims, or slogans, such as: • "Always apply a joyful state of mind" • "Don't seek others' pain as the limbs of your own happiness" • "Always meditate on whatever provokes resentment" Working with these slogans and through the practice of meditation, Start Where You Are shows how we can all develop the courage to work with our own inner pain and discover joy, well-being, and confidence.

What happens when you wake up one fine day and realise that you are all grown up, like 7-8 years older than what you think you should be. You don't remember what has happened in the past few years and you come across a diary in your handwriting. It tells you about the only person that you remember. You think that one might be happy, but what if the series of events that follow, reveal that you are not who you think you are??? Confused?? Read on to clear your confusion.
