“YOU HAVE CHANGED MY LIFE” is a common refrain in the emails Walter Lewin receives daily from fans who have been enthralled by his world-famous video lectures about the wonders of physics. “I walk with a new spring in my step and I look at life through physics-colored eyes,” wrote one such fan. When Lewin’s lectures were made available online, he became an instant YouTube celebrity, and The New York Times declared, “Walter Lewin delivers his lectures with the panache of Julia Child bringing French cooking to amateurs and the zany theatricality of YouTube’s greatest hits.” For more than thirty years as a beloved professor at the Massachusetts Institute of Technology, Lewin honed his singular craft of making physics not only accessible but truly fun, whether putting his head in the path of a wrecking ball, supercharging himself with three hundred thousand volts of electricity, or demonstrating why the sky is blue and why clouds are white. Now, as Carl Sagan did for astronomy and Brian Green did for cosmology, Lewin takes readers on a marvelous journey in *For the Love of Physics*, opening our eyes as never before to the amazing beauty and power with which physics can reveal the hidden workings of the world all around us. “I introduce people to their own world,” writes Lewin, “the world they live in and are familiar with but don’t approach like a physicist—yet.” Could it be true that we are shorter standing up than lying down? Why can we snorkel no deeper than about one foot below the surface? Why are the colors of a rainbow always in the same order, and would it be possible to put our hand out and touch one? Whether introducing why the air smells so fresh after a lightning storm, why we briefly lose (and gain) weight when we ride in an elevator, or what the big bang would have sounded like had anyone existed to hear it, Lewin never ceases to surprise and delight with the extraordinary ability of physics to answer even the most elusive questions. Recounting his own exciting discoveries as a pioneer in the field of X-ray astronomy—arriving at MIT right at the start of an astonishing revolution in astronomy—he also brings to life the power of physics to reach into the vastness of space and unveil exotic uncharted territories, from the marvels of a supernova explosion in the Large Magellanic Cloud to the unseeable depths of black holes. “For me,” Lewin writes, “physics is a way of seeing—the spectacular and the mundane, the immense and the minute—as a beautiful, thrillingly interwoven whole.” His wonderfully inventive and vivid ways of introducing us to the revelations of physics impart to us a new appreciation of the remarkable beauty and intricate harmonies of the forces that govern our lives.

"The book of Lilith tells the real story of creation. Lilith is the first human to be given a soul by God following a thirteen billion year process of mechanical, soulless evolution. Her job is to give souls to all things and awaken them to the Watcher that watches the watcher, watching the world. The first person she grants a soul to is Adam, who is given a job of his own: to invent the definition of sin, create a moral sense in a world that utterly lacks one, and hence bring about the rule of law in a compassionate society. Unfortunately, Adam has a hard time accepting the fact that he was given his soul second, instead of first, and by Lilith, not God. The conflict this engenders leads to the destruction of Eden, the creation of Eve, and a voyage of self-discovery that spans a world"--P. [4] of cover.

This life-changing manifesto shows how you have the potential to make a huge difference wherever you are. Few authors have had the kind of lasting impact and global reach that Seth Godin has had. In a series of now-classic books that have been translated into 36 languages and reached millions of readers around the world, he has taught generations of

readers how to make remarkable products and spread powerful ideas. In Linchpin, he turns his attention to the individual, and explains how anyone can make a significant impact within their organization. There used to be two teams in every workplace: management and labor. Now there's a third team, the linchpins. These people figure out what to do when there's no rule book. They delight and challenge their customers and peers. They love their work, pour their best selves into it, and turn each day into a kind of art. Have you ever found a shortcut that others missed? Seen a new way to resolve a conflict? Made a connection with someone others couldn't reach? Even once? Then you have what it takes to become indispensable, by overcoming the resistance that holds people back. Linchpin will show you how to join the likes of... · Keith Johnson, who scours flea markets across the country to fill Anthropologie stores with unique pieces. · Jason Zimdars, a graphic designer who got his dream job at 37signals without a résumé. · David, who works at Dean and DeLuca coffee shop in New York. He sees every customer interaction as a chance to give a gift and is cherished in return. As Godin writes, "Every day I meet people who have so much to give but have been bullied enough or frightened enough to hold it back. It's time to stop complying with the system and draw your own map. You have brilliance in you, your contribution is essential, and the art you create is precious. Only you can do it, and you must."
