The Combined Geo-Scientist and Geologist Examination is now renamed as Combined Geo-Scientist exam. The Prelims Exam for these posts will be online from 2020.

This book is the first to apply the theory of translanguaging to multilingual classrooms in an Asian context, offering strategies for teaching specific grammatical and comprehension skills to students struggling to read in English. It also enriches the methodology of coding bilingual transcripts with ideas resulting from a detailed analysis of a large and rich data set. Lastly, the author discusses growth areas in the emerging field of translanguaging and challenges for teachers implementing a translanguaging approach in a superdiverse classroom.

This book discusses the importance of identifying and addressing misconceptions for the successful teaching and learning of science across all levels of science education from elementary school to high school. It suggests teaching approaches based on research data to address students' common misconceptions. Detailed descriptions of how these instructional approaches can be incorporated into teaching and learning science are also included. The science education literature extensively documents the findings of studies about students' misconceptions or alternative conceptions about various science concepts. Furthermore, some of the studies involve systematic approaches to not only creating but also implementing instructional programs to reduce the incidence of these misconceptions among high school science students. These studies, however, are largely unavailable to classroom practitioners, partly because they are usually found in various science education journals that teachers have no time to refer to or are not readily available to them. In response, this book offers an essential and easily accessible guide.

Criteria for Awarding School Leaving Certificates: An International Discussion focuses on formal and official evaluation of school learning and student achievement at the time schooling is discontinued. The book is based on the proceedings of the 1977 Conference of the International Association for Educational Assessment held at the Kenyatta Conference Center in Nairobi, Kenya on May 23-28, 1977. The selection first discusses school leaving examinations as a function of external and educational factors and the terms of reference for school leaving examinations. The book also takes a look at the comparability of grading standards in public examinations in England and Wales; basic assessment issues in school-leaving examination programs; and the case for school leaving examinations in The Netherlands. The text reviews the alternatives to school leaving examinations in Sweden and Brazil, as well as the abolition of final examination, transition from secondary school to higher education, and support structures. The book also ponders on the structure of secondary school system in Austria, Australia, Bermuda, Cyprus, Hong Kong, India, and Ireland. The selection is a dependable reference for readers interested in school learning and student achievement measurements.

Secondary education is the final stage of compulsory education, preceded by primary education and followed by higher education. It is characterised by transition from the typically compulsory, comprehensive primary education for minors to the optional, selective tertiary, 'post-secondary', or 'higher' education (e.g., university, vocational school) for adults. Depending on the system, schools for this period or a part of it may be called secondary schools, high schools, gymnasiums, lyceums, middle schools, colleges, vocational schools and preparatory schools, and the exact meaning of any of these varies between the systems. The exact boundary between primary and secondary education varies from country to country and even within them, but is generally around the fifth to the tenth year of education. Secondary education occurs mainly during the teenage years. In the United States and Canada primary and secondary education together are sometimes referred to as K-12 education. The purpose of secondary education can be to give common knowledge, to prepare for either higher education or vocational education, or to train directly for a profession. This new book presents the latest research in the field.

This book provides an overview of language education in Malaysia, covering topics such as the evolution of the education system from pre-independence days to the present time, to the typology of schools, and the public philosophy behind every policy made in the teaching of

languages. The book consists of chapters devoted to the teaching of languages that form separate strands but are at the same time connected to each other within the education system. These chapters discuss: Implementing the national language policy in education institutions English in language education policies and planning in Malaysia Chinese and Tamil language education in Malaysia Teaching of indigenous Malaysian languages The role of translation in education in Malaysia It also discusses the development of language which enables the national language, Malay, to fulfil its role as the main medium of education up to the tertiary level. This book will be of interest to researchers studying language planning, teacher education and the sociology of education, particularly, within the Malaysian context.
