Tommy Newberry's message is simple, relevant, powerful, and timeless. In this New York Times bestseller, Newberry takes a single biblical principle and teaches us how one simple truth can magnify the joy we experience in our marriage, with our parenting, and in our life as a whole. Unfortunately, we live in a society bent on nursing old wounds and highlighting what is wrong with just about everything. As a result, we have grown accustomed to viewing the world, our lives, and ourselves through a lens of negativityand that negativity stands in direct contrast to the passionate, purpose-filled people God wants us to be. This is where The 4:8 Principle grabs our attention. First, the author skillfully persuades us to acknowledge the link between the thoughts we choose to think and the joy we experience. Next, he shows us how we can grow our potential for joy by refusing to dwell upon the problems and pressures that are enduring and inevitable. Finally, he challenges us to pay the price of joy by becoming extraordinarily picky about what we read, watch, and listen to on a consistent basis. The strength of the book, though, is in Newberry's ability to clearly explain how to put this principle into daily practice through a series of quick, easy and even fun adjustments. The 4:8 Principle is loaded with specific suggestions and helpful advice for going beyond the ordinary and experiencing life as it was meant to be. 'Catastrophe Risk Financing in Developing Countries' provides a detailed analysis of the imperfections and inefficiencies that impede the emergence of competitive catastrophe results in developing countries. The book demonstrates how results are that impede the emergence of competitive catastrophe results.

donors and international financial institutions can assist governments in middle- and low-income countries in promoting effective and affordable catastrophe risk financing solutions. The authors present guiding principles on how and when governments, with assistance from donors and international financial institutions, should intervene in catastrophe insurance markets. They also identify key activities to be undertaken by donors and institutions that would allow middle- and low-income countries to develop competitive and cost-effective catastrophe risk financing strategies at both the macro (government) and micro (household) levels. These principles and activities are expected to inform good practices and ensure desirable results in catastrophe insurance projects. 'Catastrophe Risk Financing in Developing Countries' offers valuable advice and guidelines to policy makers and insurance practitioners involved in the development of catastrophe insurance programs in developing countries.

Written by a practicing emergency physician, The White Coat Investor is a high-yield manual that specifically deals with the financial issues facing medical students, residents, physicians, dentists, and similar high-income professionals. Doctors are highlyeducated and extensively trained at making difficult diagnoses and performing life saving procedures. Most mental health professionals and behavioral scientists enter the field with a strong desire to help others, but clinical practice and research endeavors often involve decision-making in the context of ethical ambiguity. Good intentions are important, but unfortunately, they do not always protect the practitioner and client from breaches in ethical conduct. Academics, researchers, and students also face a range of ethical challenges from the classroom to the laboratory. Now in a new expanded edition, Ethics in Psychology and the Mental Health Professions, the most widely read and cited ethics textbook in psychology, has emerged with a broadened scope extending across the mental health and behavioral science fields. The revised volume considers many of the ethical questions and dilemmas that mental health professionals encounter in their everyday practice, research, and teaching. The book has been completely updated and is now also relevant for counselors, marriage and family therapists, social workers, and psychiatrists, and includes the ethics codes of those groups as appendices. Providing both a critical assessment and elucidation of key topics in the APA's guidelines, this comprehensive volume takes a practical approach to ethics and offers constructive means for both preventing problems, recognizing, approaching, and resolving ethical predicaments. Written in a highly readable and accessible style, this new edition retains the key features which have contributed to its popularity, including hundreds of case studies that provide illustrative guidance on a wide variety of topics, including fee setting, advertising for clients, research ethics, sexual attraction, how to confront observed unethical conduct in others, and confidentiality, among others. Ethics in Psychology and the Mental Health Professions will be important reading for practitioners and students-in training. An instructors manual is available for professors on

What can one person do when a powerful industry censors the person's views? That is the question Joseph M. Belth tries to answer in this memoir about his publication of an independent monthly periodical called The Insurance Forum. He started the periodical with the January 1974 issue after he had experienced 31 incidents of censorship over a period of eight years. The censorship was the work of trade press periodicals, professional journals, professional organizations, insurance companies, and others who wanted to prevent him from expressing his views. He ended the Forum when he published the December 2013 issue after 40 consecutive years of publication. This memoir reveals the inside story of Belth's victories, partial victories, and defeats. His memoir explains why and how the Forum began and describes significant events that occurred during the four decades of operation, including those relating to life insurance, annuities, company operations, and regulation. Belth also describes his adolescent years and education prior to joining the faculty of Indiana University in 1962, and his long association with the University. -- From book jacket.
