Hoverdia Eighteen is first of its kind and a brand new Two-In-One logic-number puzzle. The main puzzle is best represented by 8 long horizontal blocks and 8 long vertical blocks, with each long horizontal block and each long vertical block consists of 8 small boxes, which give the total of 64 boxes. Each long horizontal or long vertical block which consists of 8 boxes must contain one of the numbers from 1 to 8 inclusively without repeating any thereof - This is Rule One. The main puzzle with 64 boxes is also alternatively represented by 4 sub-puzzles which are called Quadrants and each quadrant is made up of 4x4 short blocks. For Rule Two in any of the 4 quadrants, after having complied with Rule One, each block, consists of 4 boxes, must be added up to the sum of 18 horizontally, vertically and diagonally.

Excerpt from Diseases of the Skin: An Outline of the Principles and Practice of Dermatology The revised edition of this book, which appeared in 1898, has for some time been out of print. The

pressure of professional engagements and of other work has made it impossible till lately for the author to find time for the preparation of a new edition. A good deal of new matter has been added, but some redundances have been removed, and care has been taken not to alter the character of the volume by expanding it from an elementary manual into a treatise. Several new illustrations have been added, for some of which the author has to express his indebtedness to Dr. Gilchrist, of Baltimore, and Dr. Whitfield, of London. The index has been considerably enlarged with the object of enabling the practitioner to see at a glance the main lines of treatment available in a given disease. The first book focusing specifically on frequent and frequently disabling side effects involving the skin, hair and nails in cancer patients According to the World Health Organization, there are approximately thirty million people living with a diagnosis of cancer – the majority of whom will receive surgery, systemic therapy, and/or radiation, and who will suffer from dermatologic adverse events. Dermatologists and oncologists are only beginning to grapple with these events, which pose serious quality-of-life issues with so many patients, and will become more prevalent as survival rates improve, thanks in part to new cancer treatments and drug regimens. Concentrating on a topic that has only been briefly touched upon by other texts, this book offers a focused perspective on the clinical presentation, underlying pathophysiologic mechanisms, and management of skin, hair, and nail conditions for oncologists, dermatologists, and allied practitioners. Dermatologic Principles and Practice in Oncology: Conditions of the Skin, Hair, and Nails in Cancer Patients: • Covers in detail the dermatologic adverse events of oncologic therapies, clinical presentations, and treatment recommendations • Enables dermatologists and other practitioners to significantly improve the care of patients with cancer • Addresses the dermatologic adverse events of cancer therapies used globally, of which a large number are found in developing countries • Emphasizes prophylactic measures – based on treatments used and type of cancer – to prevent the appearance of adverse events • Provides built-in discussions on patient education for practical counseling during therapies • Offers rapid-reference sections on topical dermatology drugs The first book to present dermatologic conditions in cancer patients and survivors in a uniform and in-depth manner, Dermatologic Principles and Practice in Oncology is ideal for oncologists, oncology nurses, and dermatologists who wish to take better care of those with adverse skin, hair, and nail conditions.
