In the high-stakes world of magazine publishing, Judith Krantz weaves a dazzling tale of love and betrayal, and creates her most joyous character—sensational Maxi, an uninhibited woman who unexpectedly discovers that her talent for life is matched by a hunger to succeed. Gorgeous, flamboyant Maxi Amberville is twenty-nine and has already discarded three husbands on two continents. Life is a stream of endless pleasure in her lavish Trump Tower apartment—until her widowed mother married a man who plots to sell her father's magazine empire. And Maxi turns her incredible lust for living into a passionate quest for power. Maxi takes over the small weekly Buttons And Bows. She gathers her hot-blooded ex-husband, sassy daughter and a coterie of the powerful elite. Then, risking all, Maxi creates B&B—the glitziest, ritziest, most successful fashion magazine in the country. Here is a dramatic, sizzling story of love, family, ambition and one unforgettable woman who gives life and love everything she has.

This volume of the "Inter-American Yearbook on Human Rights" covers the year 1990, and contains all the documents and information (in English and Spanish) concerning the activities of the Organization of American States in the field of the promotion and protection of human rights. Like its predecessors, this "Yearbook" aims to contribute to a greater awareness of the functions and activities of the organs of the Inter-American system for the protection of Human Rights.

This book brings a unique perspective to animal movement studies because all cases came from tropical environments where the great diversity, either biological and structurally (trees, shrubs, vines, epiphytes), presents the animal with several options to fulfill its live requirements. These conditions have forced the evolution of unique movement patterns and ecological strategies. Movement is an essential process in the life of all organisms. Animals move because they are hungry, thirsty, to avoid being eaten, or because they want to find mates. Understanding the causes and consequences of animal movement is not an easy task for behavioural ecologists. Many animals are shy, move in secretive ways and are very sensible to human presence, therefore, studying the movements of mammals in tropical environments present logistical and methodological challenges that have recently started to be solved by ecologist around the world. In this book we are compiling a set of extraordinary cases where researchers have used some of the modern technology and the strongest methodological approaches to understand movement patterns in wild tropical mammals. We hope this book will inspire and encourage young researchers to investigate wild mammal ?s movements in some of the amazing tropical environments of the world.

"This publication represents a revision of the report entitled 'Feeding standards for Australian livestock. Ruminants' that was issued in 1990 by CSIRO Publishing in conjunction with the Standing Committee on Agriculture"--Introduction.

Routledge is now re-issuing this prestigious series of 204 volumes originally published between 1910 and 1965. The titles include works by key figures such as C.G. Jung, Sigmund Freud, Jean Piaget, Otto Rank, James Hillman, Erich Fromm, Karen Horney and Susan Isaacs. Each volume is available on its own, as part of a themed mini-set, or as part of a specially-priced 204-volume set. A brochure listing each title in the "International Library of Psychology" series is available upon request.

While traveling, Manguel was struck by how the novel he was reading seemed to reflect the social chaos of the world he was living in. He decided to keep a diary of these moments, reading a book a month and recording his observations, which provides an enthralling adventure in literature and life.

"A lively and well-researched analysis of women's roles in the kinship systems of precapitalist African societies turns out to be pertinent to women's struggle for equality everywhere."-- Ms.

"For any theorist of social organization this is an important book."-- American Anthropologist "For anthropologists, historians, social theorists, and .....

Understanding animal andrology is fundamental to optimising genetic breeding traits in domestic and wild animals. This book provides extensive coverage of male reproductive biology, discussing the essentials of sperm production, harvest and preservation before covering the applications to a range of animals including cattle, horses, pigs, small ruminants, camelids, cats and dogs, poultry and exotic species. It also examines the laboratory procedures that provide the basis of general fertility research.

Con esta obra John Gadd nos muestra cómo gestionar un negocio porcino de forma eficiente dando respuestas prácticas a problemas técnicos concretos. Es una actualización de las últimas técnicas e investigaciones en producción porcina y sus aplicaciones prácticas acompañadas de valoraciones económicas reales. Actualizada recopilación de temas para resolver problemas en porcino. Está estructurada en cinco apartados y 49 capítulos en los que se efectúa una completa revisión de todo el proceso productivo. En cada uno de ellos se desvelan los últimos avances y se dan prácticos consejos que servirán al lector para ampliar sus conocimientos, reflexionar sobre su trabajo y mejorar su cualificación.

A study of prostitution necessarily examines questions of power, class, gender, and public health. In *Sex and Danger in Buenos Aires* these questions combine with particular force. During most of the time covered in this provocative book, from the late nineteenth century well into the twentieth, prostitution was legal in Argentina. Fears and anxieties concerning the effect of female sexual commerce on family and nation were rampant. Donna J. Guy looks at many aspects of the debate that followed an escalating demand for prostitutes by Argentines and European immigrants. She discusses the widespread fear of white slavery, the merits of medically supervised municipal houses of prostitution, the rights of local governments to restrict the civil liberties of citizens and foreigners, the censorship of literature and music dealing with the plight of prostitutes, and the potential criminality of unsupervised working women who might abandon their families. Guy also describes attempts to deal with female prostitution: rehabilitation, modifications of municipal bordello laws, and medical programs to prevent the spread of venereal disease. She makes clear that the treatment of "marginal" women by liberal politicians and doctors helped promoted policies of repression and censorship that would later be extended to other unacceptable social groups. Her study of how both local and national government in Argentina dealt with these women reveals important links between gender, politics, and

economics.

Every day thousands of people are killed and injured on our roads. Millions of people each year will spend long weeks in the hospital after severe crashes and many will never be able to live, work or play as they used to do. Current efforts to address road safety are minimal in comparison to this growing human suffering. This report presents a comprehensive overview of what is known about the magnitude, risk factors and impact of road traffic injuries, and about ways to prevent and lessen the impact of road crashes. Over 100 experts, from all continents and different sectors -- including transport, engineering, health, police, education and civil society -- have worked to produce the report. Charts and tables.

Discusses the nature of moral disagreement, Nietzsche, Aristotle, heroic societies, and the virtue of justice.

This volume reviews the ecological effects of road, rail, marine and air transport. The focus ranges from identification of threats and repair of damaging effects to design of future transport systems that minimize environmental degradation. The scope of coverage extends from small ecosystems to the planet as a whole. Experts from a variety of disciplines address the topic, expressing views across the spectrum from deep pessimism to cautious optimism.

The pathbreaking investigation into motherhood and womanhood from an influential and enduring feminist voice, now for a new generation. In *Of Woman Born*, originally published in 1976, influential poet and feminist Adrienne Rich examines the patriarchic systems and political institutions that define motherhood. Exploring her own experience—as a woman, a poet, a feminist, and a mother—she finds the act of mothering to be both determined by and distinct from the institution of motherhood as it is imposed on all women everywhere. A “powerful blend of research, theory, and self-reflection” (Sandra M. Gilbert, *Paris Review*), *Of Woman Born* revolutionized how women thought about motherhood and their own liberation. With a stirring new foreword from National Book Critics Circle Award–winning writer Eula Biss, the book resounds with as much wisdom and insight today as when it was first written.

Solving problems on pig farms doesn't get any easier with the passage of time. This is an intensely practical book which deals with pig production problems all over the world. As well as compiling a series of checklists, the author provides the reasons why the actions should be considered and, where available, gives the back-up evidence from trial work. Equally important are the econometrics (cost-effectiveness) of the advice given - the author is a pioneer in this field.

The Chaldean Account of Genesis by George Smith, first published in 1876, is a rare manuscript, the original residing in one of the great libraries of the world. This book is a reproduction of that original, which has been scanned and cleaned by state-of-the-art publishing tools for better readability and enhanced appreciation. Restoration Editors' mission is to bring long out of print manuscripts back to life. Some smudges, annotations or unclear text may still exist, due to permanent damage to the original work. We believe the literary significance of the text justifies offering this reproduction, allowing a new generation to appreciate it.

Ancient Mesopotamia has often been cited as a model for the evolution of complex societies. In this volume, 12 contributions from field and theoretical archaeologists discuss recent research on Greater Mesopotamia during the late fifth and fourth millennia B.C.E. A sampling of topics includes the cross-cultural connections among the different subregions of Greater Mesopotamia, possible causes of the Uruk Expansion, and economic specialization in the Hacinebi subregion. Annotation copyrighted by Book News, Inc., Portland, OR.

This book aims to provide an updated overview on the most common pathogens responsible for porcine respiratory disease complex. The authors, all renowned and award-winning experts with a wide experience in respiratory diseases in pigs, have focused their efforts on gathering the latest information and data available on the topics covered while making the book as readable as possible.

*Worker in the Cane* is both a profound social document and a moving spiritual testimony. Don Taso portrays his harsh childhood, his courtship and early marriage, his grim struggle to provide for his family. He tells of his radical political beliefs and union activity during the Depression and describes his hardships when he was blacklisted because of his outspoken convictions. Embittered by his continuing poverty and by a serious illness, he undergoes a dramatic cure and becomes converted to a Protestant revivalist sect. In the concluding chapters the author interprets Don Taso's experience in the light of the changing patterns of life in rural Puerto Rico. This is the absorbing story of Don Taso, a Puerto Rican sugar cane worker, and of his family and the village in which he lives. Told largely in his own words, it is a vivid account of the drastic changes taking place in Puerto Rico, as he sees them.

*Humans at the End of the Ice Age* chronicles and explores the significance of the variety of cultural responses to the global environmental changes at the last glacial-interglacial boundary. Contributions address the nature and consequences of the global climate changes accompanying the end of the Pleistocene epoch—detailing the nature, speed, and magnitude of the human adaptations that culminated in the development of food production in many parts of the world. The text is aided by vital maps, chronological tables, and charts.

The first of the Havana quartet featuring Inspector Mario Conde, a tropical Marlowe. A young transvestite in a red evening dress is found strangled in Havana Park. Conde's investigation reveals the dark world of those born in the revolution who live without dreaming of exile and seek their identity in the midst of disaster. In a country plagued by corruption and economic breakdown everyone wears a mask to survive. 'A magnificent novel. An author haunted by the tragic story and the passion and emotion of his characters' - Magazine *Litteraire*

Annotation People are the backbone of projects and the most important resource in a project. To survive and grow in the twenty-first century, project managers must learn and use appropriate human skills to motivate and inspire all those involved in the project. This book offers practical guidelines that can be used to develop and implement the human skills appropriate to project management: communication, motivation, negotiation, conflict resolution, conflict and stress management, and leadership. This book is Volume Two of *The Human Aspects of Project Management* series.

This book is open access under a CC BY 4.0 license. This book provides a unique overview of the impacts of railways on biodiversity, integrating the existing knowledge on the ecological effects of railways on wildlife, identifying major knowledge gaps and research directions and presenting the emerging field of railway ecology. The book is divided into two major parts: Part one offers a general review of the

major conceptual and theoretical principles of railway ecology. The chapters consider the impacts of railways on wildlife populations and concentrate on four major topics: mortality, barrier effects, species invasions and disturbances (ranging from noise to chemical pollution). Part two focuses on a number of case studies from Europe, Asia and North America written by an international group of experts. This accessible undergraduate text is the first to make teaching the neuropsychology course easier. Rains provides adequate depth and explanatory material to inspire student interest and motivation, and his in-depth approach not only makes the material easier for students to grasp, but reveals the exciting questions of the field remaining to be answered. PRINCIPLES OF HUMAN NEUROPSYCHOLOGY's other hallmark is to foster an appreciation for the interdisciplinary nature of neuropsychology by employing a levels of analysis approach—from single cell recording to the effects of large lesions.

“General Relativity Without Calculus” offers a compact but mathematically correct introduction to the general theory of relativity, assuming only a basic knowledge of high school mathematics and physics. Targeted at first year undergraduates (and advanced high school students) who wish to learn Einstein's theory beyond popular science accounts, it covers the basics of special relativity, Minkowski space-time, non-Euclidean geometry, Newtonian gravity, the Schwarzschild solution, black holes and cosmology. The quick-paced style is balanced by over 75 exercises (including full solutions), allowing readers to test and consolidate their understanding.

Lauded for its contribution to the theory and conceptualization of the field of women's history and for its sensitivity to the differences of class, ethnicity, race, and culture among women, The Majority Finds Its Past became a classic volume in women's history following its publication in 1979. This edition includes a foreword by Linda K. Kerber, introducing a new generation of readers to Gerda Lerner's considerable body of work and highlighting the importance of the essays in this collection to the development of the field that Lerner helped establish.
