

Profitable Horse Racing Betting Systems Methods Uk Flat 2015 Volume 2 Trainer Insights Turf Profitable Horse Racing Betting Systems Methods Uk Flat 2015

Focusing on betting and horse racing, the author sets out to arm punters with a sweeping analysis of profitable approaches. He covers various aspects of betting successfully in the internet age including strategy, psychology, money management, spread betting, the exchanges, and practical recommendations to help you win money.

Nick Mordin estimates he has spent over 30,000 hours researching racing results over the years. His aim has been to uncover the principles that govern the betting market and racing results themselves. In conducting his research Nick has tested thousands of systems, both his own and those developed by academics, professional gamblers and others around the globe. In *Winning Without Thinking* he shares the fruits of this work. the results of horse-races; basic principles that govern racing results and the betting market; mistakes commonly made by the general betting public and how to exploit them; full details of betting systems used by professional gamblers to make millions; how to predict and profit from new trends; and how to use computers to increase your returns.

Thoroughbred horse racing is the most popular form of horse racing the whole world. It is so popular that some people do not know of any other form of horse racing. Thoroughbred horse racing is also known by some people as the port of kings? Usually, a thoroughbred horse owner would hire a trainer to condition the horse for only one type of race. This is because a good trainer knows that there is a best training regimen for every type of race. The owner may also opt to enter the horse in races that are somewhat similar to what it is in training for.

Introduction I have written many books around UK horse racing systems and this one I really enjoyed due to the simplicity of this horse racing dutching system and how easy it is to apply. The system uses the excellent free racing post website where you can obtain all the form data you need to use this system. Plus you do not have to be a form expert to understand it. You should aim at using Betfair to place your dutch bets due to the better prices and the ability to get even better prices pre-off the race. Understand the system before placing your horse dutching bets, I hope you enjoy it!

Introduction I have written a number of racing systems but this is the best one and I use this for most of my racing bets.

The key to this system is quality not quantity and looking for horses that tick all the four form variables LP OR CR WD which I will explain later. The system also only looks for horses that are carrying 8 pounds or more in weight which normally means a class drop or the horse has improved. Understand the system before placing bets, I hope you enjoy it!

The Legacy horse racing system is a selection method devised by full time professional gambler and author Anthony Gibson. The book contains a detailed look at an area of horseracing that must be totally overlooked by the majority of punters otherwise the prices of the winners to date and the level stakes profits made would not be so great. Our source for the selections could be backed blindly and good profits achieved but adding elements of form and a common sense approach cuts down the number of runners to look at each day as possible bets, once a horse qualifies for selection they can be backed with great confidence either to win the race outright or to be placed. No other method I have ever looked at comes close to making the profits achieved in this book, this is a priceless piece of work and my final publication

I have written many books about UK horse racing betting systems e.g horse laying in 6f 7f races, horse dutching to 35% book, large betfair place market decimal odds betting systems and many more. I have been able to do this as I have modelled these horse racing betting systems on my own database using my own computer code. I am fortunate I have I.T background and have computer science degree which has helped me a great deal in my quest for the perfect horse racing systems. This book is different as I feel that this horse racing betting system helps punters see the light when selecting horses for a bet. The system is so simple to follow that punters who have busy lives can apply this system very quickly and accurately. The system uses the free racing post on the internet so there are no further costs. The book is priced to reflect 'seeing the light' many punters are in the dark!

Beyer on Speed shows the way, explaining how to relate the numbers to such factors as pace, track bias, and track conditions. It reveals optimal uses of the figures based on computer analysis of more than 10,000 races. *Beyer on Speed* presents a revolutionary way to play the horses and win. Blending colorful anecdotes with incisive instruction, this is a landmark book by a master handicapper.

Exotic Betting at the Racetrack is unique as it covers the efficient-inefficient strategy to price and find profitable racetrack bets, along with handicapping that provides actual bets made by the author on essentially all of the major wagers offered at US racetracks. The book starts with efficiency, accuracy of the win odds, arbitrage, and optimal betting strategies. Examples and actual bets are shown for various wagers including win, place and show, exacta, quinella, double, trifecta, superfecta, Pick 3, 4 and 6 and rainbow pick 5 and 6. There are discussions of major races including the Breeders' Cup, Pegasus, Dubai World Cup and the US Triple Crown from 2012-2018. Dosage analysis is also described and used. An additional feature concerns great horses such as the great mares Rachel Alexandra, Zenyatta, Goldikova, Treve, Beholder and Song Bird. There is a discussion of horse ownership and a tour through arguably the world's top trainer Frederico Tesio and his stables and horses in Italy. Related Link(s)

The Gambler Who Cracked the Horse-Racing Code Bill Benter did the impossible: He wrote an algorithm that couldn't lose at the track. Close to a billion dollars later, he tells his system. This book examines the elements necessary for a practical and successful computerized horse race handicapping and wagering system. Data requirements, handicapping model development, wagering strategy, and feasibility are addressed. A logit-based technique and a corresponding heuristic measure of improvement are described for combining a fundamental handicapping model with the public's implied probability estimates. The author reports significant positive results in five years of actual implementation of such a system. This result can be interpreted as evidence of inefficiency in pari-mutuel racetrack wagering. This paper aims to emphasize those aspects of computer handicapping which the author has found most important in practical application of such a system. Also included the Bill Benter "What Are My Odds?" Presentation at ICCM in 2004.

Discover the irresistible allure of horse racing and the thrill of winning. This invaluable book shares a proven, easy to learn system that you can use to beat the odds and win big at the racetrack. It helps you determine which horse to pick and what size your wager should be based on tote board data, and it reveals strategies for maximizing your winnings. With clear writing and entertaining real-world examples, authors William Ziemba and Donald Hausch explain the fundamentals of track racing and show how patterns of public inefficiency in betting pools can lead to you reaping big payoffs. Rather than focusing on the complicated details of thoroughbred handicapping, the groundbreaking "Dr. Z" system offers mathematical models based on stock-market analysis. After their initial scientific analysis of historical data from past races, the authors verified their betting method by testing it with real bets--and it worked. It teaches you when to bet and what a good bet is, and advises how much to wager based on your betting stake. When properly applied, the method's average profit per dollar wagered is about 10%. Using it, you will be able to minimize risk and increase your winnings. "This book is for people who want to win. The gambling system it presents is one of the few I have ever seen that I think really works. I am convinced enough to bet my own money on it." Edward O. Thorp, from the book's introduction

Horse Race Betting A Systematic Approach to Beating the Bookies Learn how to make money fro betting on horse races This is the book the betting industry don't want you to read Last year in the UK the British gambling public lost 12bn. That is over 500 per household. Only 2% of those punters who bet on horse racing ever make a regular profit If you are not one of those clever 2% of people who make money from horse race betting but would like to be then read this book now. Your bookmaker does not want you to do this because he is quite happy the way things are now, but are you? Is there a magic way to win on the horses? No there is not. There is no magic formula that will turn you overnight into a money-generating machine? Magic is for Harry Potter and his friends. Horse Race Betting- a systematic approach to beating the bookies is not full of fanciful notions or pie in the sky ideas but simply shows how you can approach horse race betting in a logical and turn it into a profitable past time. Robin "Birdie" Crow gives you the benefit of his years of experience of horse racing and betting to help you become one of the successful 2% It does not get any better than this In this book you will learn the 11 factors to consider when looking for a winner. You will get Birdies views on both commercial and self-created horse race systems, horse racing tipsters and be shown how to use the Internet to find the important information to help you find winners. and there is much, much more. No false promises or exaggerated claims simply the facts from a man with years of experience who has learnt from his own mistakes before adopting the systematic approach to betting. Mindset, money management, trusting your own judgment and visualization are just a few of the topics that are covered in this book. Becoming a successful punter is so much more than simply opening the paper at the racing page and trying to pick the winner. That is what the majority of the 98% do but having read this book you will know there is a better and more profitable way to go about it. About The Author Robin "Birdie" Crow no longer goes to very many race meetings, now in semi retirement and living in the North of England he is happy to sit at home watching the racing on TV and passing on his knowledge and experience to others. This is his second book having published Horse Race Betting- How to make it pay using the bookies money earlier this year. The longer you leave it before buying this book the more money will be going into your bookies pockets: Scroll up and buy now."

The book shows the methods used by Gavin Pearce long time professional punter on the Northern Horseracing circuits in the UK when running his invitation only tipping service called the ROUND TEN RACING CLUB. Gavin took a year out to run the club which produced astronomical profits for himself and the 100 invited members only. Details of how these bets were arrived at and the 100% accurate back checkable results are explained in detail in this must have book. For any punter who wants to take on the bookies this is a must read. Take an Alternative View. NOTE THAT LIMITED COPIES OF THIS BOOK ARE BEING SOLD so get your copy while it remains on the shelves

Introduction I must thank you for buying my book and appreciate any comments on the system. I have inserted my email address at the end of the book. Plus feel free to email me if you have any questions or need any help. This horse racing system took me approximately 12 months to computer model and test primarily around UK handicap horse races. This would have not been possible without my 10 years database of horse form and my I.T. computer skills. Handicap horse racing fascinates me I find it a great puzzle to solve and love form variables like weight, official rating and many more. This horse racing system has four simple steps that find winners daily and I have outlined tips to get more profit. I like using this system for betting singles and doubles which are lethal and produce massive profits! In the book I have covered a horse race in extensive detail so that you understand the system and how to apply the horse racing system to each race quickly and thus finding winners easily.

"An elegant and amusing account" of how gambling has been reshaped by the application of science and revealed the truth behind a lucky bet (Wall Street Journal). For the past 500 years, gamblers-led by mathematicians and scientists-have been trying to figure out how to pull the rug out from under Lady Luck. In The Perfect Bet, mathematician and award-winning writer Adam Kucharski tells the astonishing story of how the experts have succeeded, revolutionizing mathematics and science in the process. The house can seem unbeatable. Kucharski shows us just why it isn't. Even better, he demonstrates how the search for the perfect bet has been crucial for the scientific pursuit of a better world.

It is NOT a betting system which claims to make you a fortune overnight but it will show you how to create your own betting systems to profit from your betting. It is NOT about providing a single approach that works for everyone but you but it will show you a range of techniques allowing you to pick the ones that suit your lifestyle, time available and risk levels to maximise your betting profit. The Really Useful Betting Book is A BETTING BIBLE Whether you've never placed a bet or are a seasoned bettor, this book is your guide to making profits from horse racing. There is no single process that will work for everyone. You are a unique individual and have your own risk levels, styles of betting, time available and approaches that will suit you. Inside you will find techniques, strategies and methodologies to find selections, manage bankrolls, staking, controlling emotions and everything related to surviving as a profitable bettor. You are able to choose the approaches that most suit you. "Wow! ... I thought I ought to thank you for all the words of wisdom I have read avidly over the last year or so and for the pleasure of logging onto the Racing Advisor. My bankroll is indeed growing ... You're never too old to learn new tricks believe me ... So thanks again Michael and the team." - Josephine "I just want to take a few minutes out to thank you for all your help and support. Your knowledge and the effort you make to share it is first class and very much appreciated. Like so many I used to throw away money by stupidly betting without any real focus or structure. Now with all your help I am completely structure focused and driving forward in the right direction. I am relatively new to betting only starting when I retired as a sort of hobby about 3 years ago. As I say, with all your help I actually can see where I am going now. Its like you have lifted the fog in betting terms." - Bob Graham MICHAEL WILDING started The Race Advisor in 2009. Within a year it had become one of the leading sports betting blogs and now boasts nearly one million visitors every year. For six years he's been helping people to start making profits from their betting.

"Not only is this a very serious book on a topic of broad interest, but, even better, it is quite readable." Management Accounting
This is a sequel to Ken Osterman's Sports and Horse Racing Betting Systems That Work!. As with Ken's first book, there are methods for handicapping both horse races and sports. In this book, he has an angle for handicapping each of the popular breeds of horse racing: thoroughbred, quarter horse and harness. With sports betting, he provides a profitable method for NHL hockey that focuses on road teams who are the underdogs, going off in the middle odds range. His other method involves a fascinating angle on college basketball. In fact, this method does not involve handicapping teams at all. You are handicapping the betting public, so you don't need to be an expert to use this system. There are plenty of examples that allow you to follow this method in step-by-step fashion. Here is the list of systems included in this book. Horse racing The Quarter Horse Speed Index Method The B6 Sprint System for Thoroughbreds The Quick Rating Method for Harness Racing Betting Favorites Using the Modified d'Alembert Betting Method Sports Betting The NHL Road Dog Method College Basketball The Betting Odds Analysis Method

Just as football evolved with the introduction of the forward pass and basketball with the development of the jump shot, so too was handicapping forever changed by the use of speed figures--and it all started with Andrew Beyer's Picking Winners. This edition features a new foreword in which the author discusses the changes that have swept the sport since the book's original publication. Picking Winners remains a classic in the field of thoroughbred racing.

I wrote this book after getting numerous questions from both experienced and occasional horse players regarding horse racing systems or handicapping tips they wanted when they would visit the local race track. Let's face it, if you are going to spend a day at the track, you'd rather come out a few bucks ahead than making the typical "donation". The first question I ask anyone looking for advice is "What is your expectation?" By that I mean so you want to walk into the track with \$50 and leave with a remarkable return of 10-50%, or do you want to walk in with \$50 and leave with 10 times that amount? If your answer is the 10-50% return, then this is the book for you. I do have a jackpot system, but that is a different book. Horse racing betting can be confusing, but my system makes it simple and easy for anyone to use. So to all you conservative players. Looking to have some fun and earn a smart return let's get started!

A reprint of one of the classic volumes on racetrack efficiency, this book is the only one in its field that deals with the racetrack betting market in-depth, containing all the important historical papers on racetrack efficiency. As evidenced by the collection of articles, the understanding of racetrack betting is clearly drawn from, and has correspondingly returned something to, all the fields of psychology, economics, finance, statistics, mathematics and management science.

This book contains the best sports and horse racing betting systems from Ken Osterman previously published in two separate books: Sports and Horse Racing Betting Systems That Work! and More Sports and Horse Racing Betting Systems That Work!. These are systems that Ken Osterman has used successfully at race and sports books. The rules for each system are clearly explained, so it is understood why they work. Tips for improving these systems are also provided. There are 10 systems in the first half of the book that cover horse racing, football and baseball. Here is a list of the systems with the sport that is covered and the title of the system. Horse racing Quarter Horse - The Hidden Speed Horse Angle Thoroughbred - Best Jockey - Long shot Method Thoroughbred - Bet the Fastest Horse Thoroughbred - Show a profit down under Harness - The qualifier advantage Harness - Morning Line Overlay Sports Betting NFL Football - The Injured Star NFL Football - The Hat Trick Baseball - The AAA Surprise Baseball - The Underdog Advantage The second half of the book continues with more horse racing systems, and then expands the offering of sports betting angles with a profitable method for NHL hockey that focuses on underdogs playing on the road. His other method involves a fascinating angle on college basketball. In fact, this method does not involve handicapping teams at all. You are handicapping the betting public, so you don't need to be an expert to use this system. There are plenty of examples that allow you to follow this method in step-by-step fashion. Here is the list of systems included in the second half of the book. Horse racing The Quarter Horse Speed Index Method The B6 Sprint System for Thoroughbreds The Quick Rating Method for Harness Racing Betting Favorites Using the Modified d'Alembert Betting Method Sports Betting The NHL Road Dog Method College Basketball The Betting Odds Analysis Method

Based on an array of published and hitherto unpublished evidence, the author pinpoints techniques that will aid the bettor in formulating a successful and consistent betting strategy. The whole is presented in an informative but entertaining way, which should appeal to all those interested in betting as a hobby or as a way of earning a second income. Betting to Win covers: * The various forums that are available to UK residents for betting on the myriad of sports events, financial and specialist markets that are currently available. * Covers the wide variety of fixed-odds markets across the world, but also spread betting, pari-mutuel and Tote betting, and focuses also on the recent explosion of interest in person-to-person betting exchanges. It also identifies other novel betting mediums. * The latest academic and professional research on the operation and analysis of horseracing, greyhound racing, football betting and numerous other sports betting markets is collated, summarized and made accessible in a non-technical form. * Explores betting opportunities in less traditional markets.

Most Profitable Horse Racing System Mark Horrocks

How to enjoy a day at the races--and bet to win! The last two years have seen a record number of Americans tune in for climatic Triple Crown races featuring Smarty Jones and Funny Cide; in 2004, television viewership jumped a whopping 61 percent over the record set in 2003, and the Belmont Stakes race itself drew a record crowd of more than 120,000! This easy-to-understand guide shows first-time visitors to the track how to enjoy the sport of horse racing--and make smart bets. It explains what goes on at the track, what to look for in horses and jockeys, how to read a racing form and do simple handicapping, and how to manage betting funds and make wagers that stand a good chance of paying off. Complete with coverage of off-track and online betting, it's just what anyone needs to play the ponies--and win! Richard Eng (Las Vegas, NV) is a racing writer and handicapper for the Las Vegas Review-Journal, a columnist for the Daily Racing Form, and the host of a horseracing radio program in Las Vegas. He was formerly a part of the ABC Sports team that covered the Triple Crown.

Matched Betting Book 2 - More Strategies To Make Even Greater Profit and Boost Long-term success Free bonus! Read inside on how to get a free explanation of how I made over 100 on one recent football game and more importantly, how you could do exactly the same! This book is the next book in the Matched Betting series by Jack Green. Building on the 20 strategies in Book 1, this book looks even more closely at advanced strategies that will give you an extra edge to exploit and make yourself that extra income. Introduction The title of this book is a bold statement and one cannot really state this unless you put your money where your mouth is! I have

written many books around UK horse racing systems and this one I really enjoyed due to the simplicity of this horse racing system and how easy it is to apply. The system uses the excellent free racing post website where you can obtain all the form data you need to use this system. Plus you do not have to be a form expert to understand it. I personally think horse racing pundits make heavy weather of horse racing form, i.e. looking at a horse's breeding and many other factors. I think this information just confuses the average punter. I have added a special bonus horse laying system in this book and I think you will enjoy it! This laying system is so easy to follow you will look back at all the bets you have placed in the past and wonder how did I get it so wrong! Yes it will hurt knowing how much money you lost when you should have not. Moving back onto the horse backing system, picking winners will be very easy for you and even more you will gain confidence and control in your betting. This horse racing system normally picks 2 to 3 horses per day in UK handicap horse racing markets. You should aim at using Betfair to place your bets due to the better prices and in-play tactic I will show you in this book. Understand the system before placing bets, I hope you enjoy it!

Discover the secrets of Lay The Field betting. Profit on horse racing when horses don't win. This low risk strategy can be very profitable but only when you know which courses and races to choose. In this book I share with you my in depth research and let you use my years of real life experience of using this strategy to make a full time living from low risk betting. You will be taken step-by-step through the process of selection and I will jump start your learning curve by giving you the most profitable courses, distances and number of runners. You will learn which factors influence whether or not your Lay The Field bet will win or lose and using my own records built up over many years you will get access to the most profitable selections saving you from building your own database through trial and error. I share the exact same information I use to make my winning selections every day along with a percentage probability of each selection winning. Other guides on this style of betting give you vague statements on guesses on which are the best races to use. I cut through all the guess work by giving you the benefit of my actual past bets to identify the real criteria that will make a winning bet more likely and I will give you my up to date statistics for every profitable course in the UK and Ireland so you can find multiple winning selections with little effort every day. This information has never been available before and no other horse racing expert is willing to share this information with the general public. Grab your copy today before I change my mind and keep my profitable information to myself.

My Background I graduated from University with a computer science degree many years ago when a degree meant something! I was always interested in horse racing and was fascinated in solving the UK horse racing form puzzle. I started my own computer business in my early 20's where I made good money and travelled across Europe. It was at this point in my life I decided to start a horse tipping business where I had weekly full page colour adverts in the Racing Post at £2K per advert and offices. I left the running of this horse tipping business to staff who were responsible for all parts of the business while I concentrated on my computer business. In my late 30's around 1990 I decided to use my computer skills to computerise and model UK horse racing form using a database built with 10 years of detailed horse racing form. It was over a period of 2 years that I concentrated my efforts on UK handicap races in conjunction with the betting exchange Betfair. This is where I believed maximum profit could be gained. The computer model allowed me to process 100's of handicap races per day and then formulate my system tweaking a horse's weight and BHB or OR (Official Rating). I must confess this was a difficult puzzle to crack even with a computer program that I wrote to crunch the data. I eventually found the correct weight and BHB rating for a horse based on it's last performances in handicap races. This eBook outlines this system and can be manually applied easily using the Racing Post on the internet. Punter's can be fickle people which 95% of them have no understanding of horse form and probability. If you can back horses at higher prices then you will make money! I regularly back horses that have a starting price of 2/1 and get 10/1! Most punters want winners everyday regardless of the price and the horse's real chance of winning that race, this is where the bookmakers clean up.

I will make this bold statement straight away, "This book finds big priced winners in UK handicap horse races" easily and consistently! I need to make a very important statement here backing double figure priced horses can return some huge profits but you must remember they all do not win, more will lose races which is to be expected. There is a reason why the horse is such a big price it is mainly due to the fact the horse has not won for a long time. Another reason is that a horse could be out of its depth in other words running in a higher class of race. Most punters want winners every day at any odds this makes them feel good. They think they are making a profit, how wrong they are and the bookmakers take their money every day with a smile on their faces. Another mistake the average punter makes is that they will take current SP starting price of a horse and not look for a larger price. So say a horse is 2/1 that's decimal odds 3.0 on the Betfair betting exchange. They will readily take these odds. A more profitable approach is to take higher odds like decimal odds 3.5. Ok you might think there is not much difference between decimal odds 3.0 and 3.5 but it adds up over a year and that is where your profit is. The only way to profit in horse racing is to back horses at larger odds than what is being offered. The betting exchanges show the true odds of a horse just before the race starts. As these odds are derived from many punters and bookmakers who are using the betting exchanges then the price of the horse before the race starts is its true odds. This price is a consolidated view and it is normally correct and near the mark. This system also finds large priced horses that are placed 1st 2nd 3rd or 4th regularly in a horse race and these can be exploited in the Betfair place market at some juicy odds. I have taken decimal odds of 7.0 on four places in a horse race and mopped up.

Thinking, and betting, like the pros "Most people in sports betting are looking at things the wrong way." - Peter Webb, founder of Bet Angel "Some people only ever seem to want to hit the sexy six, and not take the singles" - Compton Hellyer, founder of Sporting Index This is a book that teaches you how to bet on sports with the same discipline and mindset as the professionals. Lots of books and websites give advice on profitable strategies - and tipsters and systems proliferate. But this is the only guide that helps you make your trades and bank your wins for the long term, avoiding the perennial dangers of overconfidence, irrationality and emotion. However successful your selections, you are never safe from crippling losses until you know how to bet with the clear head and calm approach of the masters. The simple fact is that most people betting on sports lose over the long term. Performance errors currently hamper the majority of bettors: they lose their bets because they first lose their heads. The only answer is to think differently. With chapters ranging across motivation, performance analysis, the betting process and going pro, this book is the definitive guide to achieving this: - Use dozens of exercises to sharpen your thinking and refine your betting processes. - Share in the exclusive

insights of professional sports bettors, who reveal for the first time how they have built successful gambling careers. - Benefit in every chapter from one-to-one training from the author, a professional sports and trading performance coach. Sports Betting to Win is your own personal course for establishing a firm psychological foundation for long-term betting success.

Can you beat the bookies with a system? Ricky Taylor thinks you can and puts science and maths to work and comes up with some often startlingly profitable methods. His systems are not complex and he keeps things simple and bases his methods around fundamental form factors that most professional punters would agree are the key to picking winners. Profitable Betting Systems for Horseracing contains many novel and intriguing systems for both flat and jump racing, including those based around a horse's recent form and class. You will also discover why it pays to follow certain trainers in particular types of race, and why big profits can be earned by studying a horse's pedigree. Studying the betting market can be a profitable source of systems, and the book also details a number of methods that exploit weaknesses in other punter's reasoning - must reading for those who like to back and lay horses on the exchanges. And for those of you that like to bet horses at fancy prices, there are examples of the circumstances to look for when you can win big by betting long-shots. Profitable Betting Systems for Horseracing doesn't just spell out winning methods; it also explains how you can develop your own successful systems. So if you want to start betting profitably on systems then read this book first. "Precision ... Statistical and Mathematical Methods in Horse Racing" thoroughly discusses the mathematical and statistical methods in handicapping and betting techniques. Differentiations, combinatorics, normal distribution, kernel smoothing and other mathematical and statistical tools are introduced. The jargons and equations are kept to a minimum so that it is easy to understand for most readers. More than 20 professional programs are freely available to download, which can allow readers to easily apply the methodology introduced in the book. This book can be divided into three main parts: horse handicapping (Chapters 2-6), wagering (Chapters 7-9) and theories in practices (Chapters 10-11). Chapter 1 will explain why long term gains are possible in horse racing. About horse handicapping, we will start with analysing racing forms in Chapter 2. Other handicapping factors such as weight carried, jockeys, trainers and pedigrees will be discussed in Chapter 3. Some advanced statistical methods, such as chi-square test and kernel smoothing, will be introduced in Chapter 4 to further analyse those handicapping factors discussed in previous chapters. The following two chapters are about probability estimations. In Chapter 5, normal distribution and multinomial logistic regression are introduced in estimating winning probability of each race horse. In Chapter 6, we will talk about some methods in misconceptions in estimating placed probability. Two main concepts in wagering, Kelly criterion and hedging, will be discussed in Chapters 7 and 8. To hit exotic pools, those theories in combinatorics in Chapter 9 will definitely help the readers. The author will share his experiences in betting syndicate in Chapter 10, and tell you how to be a successful professional horseplayer in the last Chapter. Some readers may find the mathematics in this book difficult, but the free program will take your pain away and do all the calculations. You can simply apply all the professional formulae by no more than a click, and pick your horses like an expert analyst. As an awardee in Asian-Pacific Mathematics Olympiad, the author abandoned his career as an actuary and became a key member in a gambling syndicate. This book was reprinted in the 4th edition in Hong Kong, ranked #2 in the best-selling chart in the international Chinese weekly Yazhou Zhoukan, and now available worldwide.

This UK and Irish Handicap horse racing betting system contains 4 simple steps to identify potential winning horses in a horse race. I wrote this system so that busy punters using the excellent racing post on the internet for free can find profitable horses quickly in handicap horse races. I like this book because I have added some optional extra filters to the horse racing system to improve the quality of selections and to achieve a better strike rate. I have written numerous books on horse racing but this is my favourite and most profitable UK and Irish horse racing system.
