This volume offers research-based studies on English for Specific Purposes in higher education from across the world. By drawing on international studies, the book brings together diverse ESP practices and aspects of relevant issues in the development of ESP programs, teachers and learners in a coherent fashion. There is a growing need for undergraduate students to develop their proficiency of ESP skills and knowledge in the increasingly globalized world. Knowledge of ESP is an important factor in subject matter learning by students, and also closely related to the performance of university graduates in the relevant sectors. Careful planning and efficient implementation are essential to ensure the quality of the language learning process. For a variety of reasons, it proves difficult to maintain ESP instruction in higher education. These reasons include the incompetence of teachers, lack of materials for that specific context, as well as lack of opportunities for ESP teachers to develop their skills. The chapters in this book, taken from a wide variety of countries, shed light on the diversity of current practices and issues surrounding ESP.

Addressing a wide range of issues in applied linguistics, sociolinguistics, and multilingualism, this volume focuses on language users, the 'people.' Making creative connections between existing scholarship in language policy and contemporary theory and research in other social sciences, authors from around the world offer new critical perspectives for analyzing language phenomena and language theories, suggesting new meeting points among language users and language policy makers, norms, and traditions in diverse cultural, geographical, and historical contexts. Identifying and expanding on previously neglected aspects of language studies, the book is inspired by the work of Elana Shohamy, whose critical view and innovative work on a broad spectrum of key topics in applied linguistics has influenced many scholars in the field to think "out of the box" and to reconsider some basic commonly held understandings, specifically with regard to the impact of language and languaging on individual language users rather than on the masses.

The Official Guide to the TOEFL iBT, Third Edition McGraw Hill Professional

The Complete Idiot's Guide to the TOEFL provides students of English as a foreign language with a highly simplified approach to mastering the standard test of English-language proficiency for admission to undergraduate programs at more than 8,500 universities in English-speaking countries. Unlike the key competition, the book aims to cover both the paper-based test and the Internet-based test. It breaks down the reading, listening, speaking, and writing portions of the test into easily digested chapters using simple, clear prose; ample practice questions; and the proven Idiot's Guide formula that makes this book the easiest way to prepare for this important test. Text instruction will be supplemented with online podcasts for extra listening practice and two full practice tests.

The study investigated the criterion-related validity of the "Test of English as a Foreign Language"[TM] Internet-based test (TOEFL[R] iBT) Listening section by examining its relationship to a criterion measure designed to reflect language-use tasks that university students encounter in everyday academic life: listening to academic lectures. The design of the criterion measure was informed by students' responses to a survey on the frequency and importance of various classroom tasks that require academic listening, and the relationship of these tasks to successful course completion. The criterion measure consisted of three videotaped lectures (in physics, history, and psychology) and included tasks created by content experts who are former university professors of the relevant content area. These tasks reflected what the content experts expected students to have comprehended during the lecture. The criterion measure and the TOEFL iBT Listening section were administered to nonnative speakers of English who were enrolled in undergraduate and graduate programs. Data from 221 participants were analyzed. Substantial correlations were observed between the criterion measure and the TOEFL iBT Listening section score for the entire sample and for subgroups (Pearson correlation coefficients ranging from .56 to .74 and disattenuated correlations ranging from .62 to .82). Moreover, the analysis of the mean scores on the criterion measure for different ability groups indicated that participants who scored at or above typical cut scores for international student admission to academic programs (i.e., TOEFL iBT Listening section score of 14 or above) scored, on average, nearly 50% or more on the criterion measure, demonstrating reasonable comprehension of the academic lectures. Ten appendices are included: (1) Survey Instrument for the University Student Survey; (2) Incidence of Various Activities Requiring Student Listening in the Classroom (N = 136); (3) Importance of Various Activities Requiring Student Listening in the Classroom (N = 136); (4) Frequency of Course Assignments and Their Percentages Composed of Final Course Grade (N = 136); (5) Information Source for Completing Course

Assignments (N = 136); (6) Characteristics of Video Lectures; (7) Physics Video Exercise; (8) History Video Exercise; (9) Psychology Video Exercise; and (10) Questions on Student Familiarity With Lecture Content (Sample Taken From the Psychology Video Set). (Contains 9 tables, 8 figures and 15 notes.

The Test of English as a Foreign Language™ (TOEFL®) is used by more universities worldwide than any other test to assess English language proficiency for academic admission and placement decisions, and to guide English language instruction. This landmark volume provides a detailed description and analysis of Educational Testing Service's research and development efforts to develop a major revision of the TOEFL® test. The result is a book that serves as a case study of test design drawing upon theory in the complex domain of English language proficiency while attempting to meet standards of educational measurement. Building a Validity Argument for the Test of English as a Foreign Language™ is distinctive in its attempt to develop a coherent story of the rationale for a test or its revision, explain the research and development process, and provide the results of the validation process. Through its treatment of one test, it expands on and tests principles and approaches to educational measurement, providing an in-depth, integrated perspective on the overall process of test revision. Moreover, because the conceptual foundation and history are presented alongside the empirical studies and validity argument, these sometimes disparate areas are presented in a way that demonstrates their connections – an approach which represents a departure from, or extension of, conventional materials on test revision. This volume is particularly relevant for professionals and graduate students in educational measurement, applied

linguistics, and second language acquisition as well as anyone interested in assessment issues.
