The British Isles Derek Sellen, 2011 Describes the history of England, Wales, Scotland and Ireland, including the most important events in their history.

Long Live Latin Nicola Gardini, 2019-11-12 A “fascinating” meditation on the joys of a not-so-dead language (Los Angeles Review of Books). From acclaimed novelist and Oxford professor Nicola Gardini, this is a personal and passionate look at the Latin language: its history, its authors, its essential role in education, and its enduring impact on modern life—whether we call it “dead” or not. What use is Latin? It’s a question we’re often asked by those who see the language of Cicero as no more than a cumbersome heap of ruins, something to remove from the curriculum. In this sustained meditation, Gardini gives us his sincere and brilliant reply: Latin is, quite simply, the means of expression that made us—and continues to make us—who we are. In Latin, the rigorous and inventive thinker Lucretius examined the nature of our world; the poet Propertius told of love and emotion in a dizzying variety of registers; Caesar affirmed man’s capacity to shape reality through reason; Virgil composed the Aeneid, without which we’d see all of Western history in a different light. In Long Live Latin, Gardini shares his deep love for the language—enriched by his tireless intellectual curiosity—and warmly encourages us to engage with a civilization that has never ceased to exist, because it’s here with us now, whether we know it or not. Thanks to his careful guidance, even without a single lick of Latin grammar, readers can discover how this language is still capable of restoring our sense of identity, with a power that only useless things can miraculously express. “Gardini gives another reason for studying classical languages: ‘The story of our lives is just a fraction of all history . . . life began long before we were

born.’ This is the very opposite of a practical argument—it is a meditative, even self-effacing one. To learn a language because it was spoken by some brilliant people 2,000 years ago is to celebrate the world; not a way to optimize yourself, but to get over yourself.” —The Economist “Nicola Gardini’s paean to Latin belongs on the shelf alongside Nabokov’s Lectures on Literature. With a similar blend of erudition, reverence, and impeccable close reading, he connects the dots between etymology and poetry, between syntax and society. And he proves, in the process, that a mysterious and magnificent language, born in ancient Rome, is still relevant to each and every one of us.” —Jhumpa Lahiri, Pulitzer Prize winner and New York Times–bestselling author of Roman Stories

The Fear of Barbarians Tzvetan Todorov, 2010-10-15 The relationship between Western democracies and Islam, rarely entirely comfortable, has in recent years become increasingly tense. A growing immigrant population and worries about cultural and political assimilation—exacerbated by terrorist attacks in the United States, Europe, and around the world—have provoked reams of commentary from all parts of the political spectrum, a frustrating majority of it hyperbolic or even hysterical. In *The Fear of Barbarians*, the celebrated intellectual Tzvetan Todorov offers a corrective: a reasoned and often highly personal analysis of the problem, rooted in Enlightenment values yet open to the claims of cultural difference. Drawing on history, anthropology, and politics, and bringing to bear examples ranging from the murder of Theo van Gogh to the French ban on headscarves, Todorov argues that the West must overcome its fear of Islam if it is to avoid betraying the values it claims to protect. True freedom, Todorov explains, requires us to strike a delicate balance between protecting and imposing cultural values, acknowledging the primacy of the law, and yet strenuously protecting minority views that do not interfere with its aims. Adding force to Todorov’s arguments is his own experience as a native of communist Bulgaria: his admiration of French civic identity—and Western freedom—is vigorous but non-nativist, an inclusive vision whose very flexibility is its core strength. The record of a penetrating mind grappling with a complicated, multifaceted problem, *The Fear of Barbarians* is a powerful, important book—a call, not to arms, but to thought.

The Story of Human Rights Marcello Flores, 2011 How did the culture of human rights develop? How did different schools of thought influence the legal documents and measures over the centuries? Was the French Revolution truly the turning point for human rights? This book analyses these fundamental questions and outlines the history of human rights from the 18th century to the present day. It captures in one lucid source the essential aspects of the subject and is both an introduction to the arguments, and the key to in-depth study of the concepts and principles. While pushing the traditional boundaries between philosophical histories of rights and legal ones, Flores provides an objective approach to the modern-day, westernised concept, and expands it to analyze the contributions from African, Asian and Islamic cultures.

Spotlight on First Jon Naunton, John Hughes, 2014 Spotlight on First is a fully comprehensive course that has been revised to be in line with the new Cambridge English exam specifications for January 2015. It prepares adults and younger learners to excel in the revised exam. An exciting new feature of this revised edition is the Ideas Generator. Test takers need to generate ideas to pass the Speaking and Writing papers of the exam. The Ideas Generator uses National Geographic videos to stimulate students' interest in common exam topics, help them build ideas about these topics and gather the language they need to effectively write or speak about them. After each video lesson students will have a bank of ideas, functional language and vocabulary tied to eight topics that commonly appear in the exam. One of the most difficult parts of

the exam for students is the Speaking Test. The Speaking Test videos and worksheets prepare students to deal with this challenge by getting them to engage with simulations of all four parts of the Speaking test.
