Psychic power is an ability to perceive, that which is beyond the normal human senses and through extrasensory perception. Humans have five senses: sight, smell, taste, sound, and touch. Although some call psychic abilities the sixth sense, people with psychic abilities generally have over-exaggerated human senses. An empath is a person with the special gift of perceiving the emotions and feelings of other people as though they were their own without even trying. They are naturally tuned in to the energies floating around them. If an empath walks into a room and sits next to a person who's quietly mourning, the empath will pick up on the sorrow and experience it as though it were their own. An empath who lacks awareness of their gift can be deeply conflicted, as they cannot tell apart their own feelings from those of others. Humans are born with psychic senses or psychic power but because this ability is not encouraged to grow, people tend to forget about it. Those who continue to pursue this power tap into it mostly when they grow up and begin looking into their spirituality or when they have a desire to connect with a higher being. A number of people can experience their psychic abilities on a day-to-day basis. Others cannot comprehend the weird senses they get while others chose to give psychic power other names such as intuition or gut feeling. If life is a resume, then psychic abilities can be considered valuable points in it. Even so, it's not their

recognizing their own judgments and accepting more intelligence than just the processes of their rational mind. Everybody is likely to have been touched by at least one psychic ability. You should become familiar with a few, including seeing visions, déjà vu, and sensing danger. You will work on trusting the information you pick up psychically, focusing on accepting impressions into your mind without filtering them, writing them written down before beginning analysis. You will start to practice recognizing messages in your daily life, making a habit of tuning in to your senses. We will discuss the importance of distinguishing whether you created your sensory impressions. We rehearse six specific terms referred to as the "clairs" for different kinds of psychic sensing, reviewing applications, tools, and the chakras that pertain to each one. We talk about why we should keep track of our dreams and why we should say aloud that we will remember, every night. Next we introduce the value of carrying crystals, and suggest a few with desired properties and protective energies to help us. In this book, we will explore what we mean when we say a person "is psychic", some different manifestations of psychic phenomena, and the main types of psychic perception. You will learn how to recognize, awaken and stimulate your own psychic abilities through a number of techniques. You will discover tools and practice exercises to strengthen and harmonize your body's energy fields, explore the world, and

Approximately 20% of the population is sensitive or in some way psychic. Being sensitive or psychic can allow you to understand the world in a way that most people can't, and to see beyond what others are able to. But for many of you sensitivities are a burden, causing overwhelm or even physical ailments. Most information about psychic abilities on the market is aspirational, meaning that all of the books out there focused on "opening your third eye" or "becoming psychic" are not meant for the highly sensitive person. You don't want to become more sensitive, you may in fact be holding on for dear life because you are overwhelmed, panicked, have issues with sleep, body pain, headaches, digestive issues, and constantly shifting emotions. Or you might be mildly sensitive, but still need skills to manage going to work, or want to know more
