The study of Jesus has rarely looked at its own scholarly context, at how the representation of Jesus might be shaped by those who study him. 'Jesus beyond Nationalism' examines how - since the beginnings of historical Jesus studies in the nineteenth century - representations of Jesus have been used to promote hegemonic or mono-cultural views. The ideology behind such representation has operated to deny difference in society, difference in terms of race, ethnicity, gender, and sexuality. Examining depictions of Jesus in a range of contexts - from

the Russian Christ and Jesus as 'Holy Anarchist' to Jesus in Muslim thought - Jesus Beyond Nationalism reveals the politics behind the ways in which Jesus has been constructed and presented.

This book is the follow-up volume to Pentecostalism and Christian Unity: Ecumenical Documents and Critical Assessments. The first volume documented the history and ecumenical engagement of Pentecostals during the twentieth century. This new collection

traces the ecumenical developments, narratives, and conversations during the first decade of the twenty-first century. The ecumenical community and Pentecostals have consistently lamented the absence of a comprehensive gathering of resources for both groups. This particular volume provides two significant assets in this regard: (1) documentation of new and emerging conversations that have not yet produced official reports, and (2) official reports from continuing conversations. The book begins with an overview of a century of Pentecostal participation in Christian unity. Part One contains ecumenical narratives on the Joint Consultative Group of Pentecostals and the World Council of Churches, Lutherans and Pentecostals, the Global Christian Forum, and Christian Churches Together in the USA. Part Two contains the extensive reports from the official dialogue of Pentecostals with the Roman Catholic Church, the World Alliance of Reformed Churches, and the Oneness-Trinitarian Pentecostal dialogue. This collection presents an invaluable resource for teachers, scholars, and pastors interested in engaging the global Christian arena from the worldwide and ecumenical perspectives of Pentecostalism.

"The focus of this book has always been on the balancing and blending of research and clinical application and on the effort to involve the learner in the problem solving engaged in by clinicians and scientists. We continue to emphasize an integrated approach, showing how psychopathology is best understood by considering multiple perspectives and how these varying perspectives can provide us with the clearest accounting of the causes of these disorders as well as the best possible treatments. With the fifteenth edition, we have once again emphasized the recent and comprehensive research coverage that has been the hallmark of the book. Of equal importance, however, we have worked to make the prose ever

more accessible to a variety of students"--

`This book, edited by Keith Tudor (who is also one of the ten contributors) is excellent reading for a number of reasons: for those who know nothing about TA, it is a highly informative and readily accessible introduction. For those who read or studied it some time ago, it is an excellent refresher. I am impressed by the diversity of people and applications of TA, and the developments outlined in this book are, certainly for me, cause for hope because, as well as offering frameworks for making 'simple' sense of humans in action – and human inaction – TA is a complex and profound system that offers people a way of solving the problems of the present, re-evaluating the struggles of the past, and reshaping

the future with permission and power based on a greater sense of self' - Nurturing Potential`I wholeheartedly recommend this book to all therapists as enriching and interesting reading' - European Association for Transactional Analysis Newsletter`It is a book which would offer helpful introductions to both the practice of transactional analysis, and the attitude needed when planning brief therapy of any kind' - The Journal of Analytical Psychology Of all the approaches to therapy, transactional analysis is arguably one of those most suited to time-limited work. At a time when short-term therapy is increasingly dominant as a form of practice, Transactional Analysis Approaches to Brief Therapy provides an insightful guide which both informs and challenges. Rather than a single theory, TA has developed as a group of four schools which share a common philosophy, but place different emphasis on what occurs during the therapeutic process. Written by therapists at the leading edge of developments in TA, the book presents and differentiates each of these four approaches. Through transcripts and commentaries, it shows how theory applies to practice, for example in treating post-traumatic stress or in achieving a one-session cure. The book also includes a useful glossary of TA terms, as well as an appendix of Eric Berne's short script-questionnaire. In some ways critical of the zeitgeist of short-termism and the commercial pressures for therapy to be brief, the book seeks a

balance between the challenge TA offers as an actionistic approach to quick and efficient therapy and the importance of relationship in therapy which is time-conscious. It will be enlightening reading for all those training and those already trained as therapists and counsellors in TA.

Why do so many women of faith have such a strong aversion to feminism? And why do so many feminists have an ardent mistrust of religion? These questions are at the heart of Helen LaKelly Hunt's illuminating look at the alliance between spiritual conviction and social action. Intelligent and heartfelt, *Faith and Feminism* offers a perceptive look at the lives of five spirited and spiritual women of history, women who combined their undying faith with feminist beliefs and who made the world a better place by doing so. • St. Teresa of Ávila, a woman whose bravery in confronting her shadows gave her the strength to connect with the world and live a life of divine action. • Lucretia Mott, a Quaker minister, who rose from her quiet upbringing to become a passionate speaker and activist working tirelessly on behalf of justice and peace. • Sojourner Truth, a Christian slave, who spoke out with unwavering courage to claim her God-given rightful place as an African American and a woman. • Emily Dickinson, an extraordinary poet, who touched the world with her ability to capture and transform the experience of suffering. • Dorothy Day, a radical journalist, who lived a life of voluntary poverty as a way of

expressing her passion for the Christian faith and care for those in need. A remarkable book that focuses on the idea that spirituality and feminism are really different expressions of the same impulse to make life more whole, Faith and Feminism offers a powerful catalyst for reflecting on our sense of self -- and for living and loving according to our deepest values.

Shalit draws on the research he conducted as field psychologist in the Israeli military to offer an original behavioral model of combat that accounts for the fighting potential of an individual or group. His model is based on the appraisal process that the individual undertakes in combat conditions to assess a situation, whether it concerns him or not and regardless of his role. It is through this process that the individual makes a judgment, taking into consideration his past

experience, knowledge, and expectations, that in turn leads to a course of action. Shalit pinpoints and describes specific aspects of the psychology of combat and conflict including the motivation to act in combat with special reference to the aggression drive; the definition of an enemy and the effects such appraisals have on behavior; the situational factors in heroic acts; and discipline and its affects on combat efficiency.

This book endeavors to examine and critically assess the theological anthropology of Jonathan Edwards with a view to considering how this anthropology coheres with his apologetic methodology. Specifically, the question has been raised whether Edwards' doctrine of man is consistent with the picture painted of Jonathan Edwards by John Gerstner that he was the epitome of the classical apologist. It is argued that Edwards practiced an eclectic apologetic sans apologetic self-awareness. In other words, Edwards was a child of his training and time.

This book takes a comprehensive, analytic approach to understanding Juvenile Risk and Needs Assessment (JRNA), covering elements relevant to how the practice affects youths' cases and the juvenile justice system. The work draws on both analysis of the extensive research on risk and needs assessment in the juvenile justice system as well as data from the authors' recent work in the area. Authors Sullivan and Childs have

extensive experience in teaching about and doing research on the juvenile justice system, including multiple studies on juvenile risk and needs assessment tools and their implementation. This expansive, integrative book leaves readers with a realistic sense of "where things stand" on the theory, research, policy, and practice of JRNA. By bringing together existing ideas and assessing them in depth, it identifies possible future paths and sparks ideas for improving the juvenile justice response to delinquent and at-risk youths. The recent rise of populist politics represent a major challenge for liberal democracies. This important book explores the psychological reasons for the rise of populism, featuring contributions from leading international researchers in the fields of psychology and political science. Unlike liberal democracy based on the Enlightenment values of individual freedom, autonomy and rationality, both right-wing and left-wing populism offer collectivist, autocratic formulations reminiscent of the evolutionary history and tribal instincts of our species. The book offers a comprehensive overview of the psychology of populism, covering such phenomena as identity seeking, anger and fear, collective narcissism, grievance, norms, perceptions of powerlessness and deprivation, authoritarianism, nationalism, radicalism, propaganda and persuasion, ethnocentrism,

xenophobia and the effects of globalization. The book is divided into four parts. Part I deals with the motivational and emotional factors that attract voters to populist causes, and the human needs and values that populist movements satisfy. Part II analyzes the cognitive features of populist appeals, especially their emphasis on simplicity, epistemic certainty and moral absolutism. Part III turns to one of the defining features of populism: its offer of a powerful tribal identity and collectivist ideology that provide meaning and personal significance to its followers. Finally, in Part IV, the propaganda tactics used by populist movements are analysed, including the role of charismatic leadership, authoritarianism, and nationalism and the use of conspiracy narratives and persuasive strategies. This is fascinating reading on a highly topical issue. The book will be of interest to students, researchers, and applied professionals in all areas of psychology and the social sciences as a textbook or reference book, and to anyone interested in the global rise of populism.

In *The Intentional Leader*, Tim Herbert explores the various actions that define and shape leadership. From those decisive moments in which a difficult decision must be made, to the unguarded moments when our emotional, authentic selves manifest themselves for better or worse. This openness is key to genuinely effective leadership – as Emerson wrote, “The reason why the world lacks unity, and lies broken and in heaps, is because man is disunited with himself.” When leaders don't take time to self-reflect, connecting with their values and establishing what they stand for, they will almost always sit down when the world (or their organization/staff) need them to stand up. It's impossible for leaders to stay true to themselves, their values and their purpose when they don't fully recognise who they are. We have an overabundance of 'leaders'

in our world today. But those who truly stand out are the ones who lead in a way that inspires employees to rally behind the organizational cause – whether that be developing cutting-edge technologies or selling fast food. This is Intentional Leadership. Tim defines this as clear, aligned, compassionate guidance delivered with a strong core ideology. It's responsive, not reactionary. It's inclusive, not prejudiced. It's transformational, not transactional. It's innovative, daring and inspirational leadership. Drawing upon his extensive experience as a business leader and consultant, Tim Herbert provides practical advice and broadly applicable guidance that will bolster business leaders across all industries. With an engaging combination of high-profile case studies, first-hand experiences and enlightening research, *The Intentional Leader* is the essential guide to cultivating an authentic, effective and sustainable approach to leadership.

The Jewish mystical tradition regards the rituals and stories of the Holy Day cycle as symbolic representations of internal spiritual and psychological development, helping us to translate the experience into the language of contemporary psychological theories. Joel Ziff draws from his rich knowledge of psychology and his fluency with text to present us with *Mirrors in Time*, a practical guide that integrates the wisdom of the Jewish mystical tradition with contemporary psychological perspectives, illustrated with clinical examples. The Holy Days provide a context that offers similar opportunities to those experienced in psychotherapy, creating time to reflect upon the nature of challenges we face, and to consider how we might best respond. The texts of Jewish tradition describe a process through rituals, images, stories, and symbols. These can be difficult to understand because they are ancient, agrarian, hierarchical, and patriarchal in nature. Contemporary psychological perspectives can often articulate obscure mystical concepts. In his effort to translate the ideas of such mystical thinkers as Shneur Zalman of Lyady into a modern, twentieth-century framework, Ziff includes theories developed by Freud,

Jung, Assagioli, Perls, Erickson, and their students. The unique character of each Holy Day is experienced in the context of one's journey through the year; a journey that includes births and deaths beginnings and endings, opportunities and crises, successes and failures. We recreate and reinvent ourselves, giving birth to new identity. In *Mirrors in Time: A Psycho-Spiritual Journey through the Jewish Year*, Joel Ziff shows us how each Holy Day represents a specific milestone in this psychospiritual process. The unique rituals, symbols, and stories of each Holy Day help us identify the particular nature and challenges of each stage as well as connecting us with the appropriate aspect of Divinity to support us in meeting those challenges.

Terrorism of the past ten years has been driven by the interface of psychology, morality, faith, religion, and politics. This modern terrorism reflects terrorists' pursuit of their beliefs and the aggressive promotion of the exclusivity of their world-views at the expense of the lives of those who do not share them. In this sense, acts of terrorism are fueled by arguments of morality and views that are rooted in the psyches and beliefs of terrorists. Thus, it is critically important to examine the growing phenomenon of terrorism through not only a political lens, but a psychological one as well – where questions about the cognitive mappings of those who are considered terrorists are probed. The examination of the moral psychology of terrorism opens up new insights into the real threats that face the global community. This important volume brings out that discussion and seeks to understand what motivates people to kill both themselves and innocent bystanders. How can we better understand this tragic human path towards violence? Providing perspectives from several continents and academic disciplines, the editors and contributors of this work move the study of terrorism away from its traditional center in the academic worlds of political science and security studies and present a wide range of perspectives that focus on psychology, philosophy, and questions of morality,

linguistics, history, religious studies, and ethics. Intended for the academic community and the general public alike, these rich presentations and analyses are sure to foster a healthier, more productive, and more effective conversation about terrorism, the minds of terrorists, and how to reach a place where this violent phenomenon is less prevalent.

The Open Access version of this book, available at [www.taylorfrancis.com/books/9781472453983](http://www.taylorfrancis.com/books/9781472453983), has been made available under a Creative Commons Attribution-Non Commercial-No Derivative 4.0 license. Experiences of hearing the voice of God (or angels, demons, or other spiritual beings) have generally been understood either as religious experiences or else as a feature of mental illness. Some critics of traditional religious faith have dismissed the visions and voices attributed to biblical characters and saints as evidence of mental disorder. However, it is now known that many ordinary people, with no other evidence of mental disorder, also hear voices and that these voices not infrequently include spiritual or religious content. Psychological and interdisciplinary research has shed a revealing light on these experiences in recent years, so that we now know much more about the phenomenon of "hearing voices" than ever before. The present work considers biblical, historical, and scientific accounts of spiritual and mystical experiences of voice hearing in the Christian tradition in order to explore how some voices may be understood theologically as revelatory. It is proposed that in the incarnation, Christian faith finds both an understanding of what it is to be fully human (a theological anthropology), and God's perfect self-disclosure (revelation). Within such an understanding, revelatory voices represent a key point of interpersonal encounter between human beings and God.

In compiling this annotated bibliography on the psychology of terrorism, the author has defined

terrorism as "acts of violence intentionally perpetrated on civilian noncombatants with the goal of furthering some ideological, religious or political objective." The principal focus is on nonstate actors. The task was to identify and analyze the scientific and professional social science literature pertaining to the psychological and/or behavioral dimensions of terrorist behavior (not on victimization or effects). The objectives were to explore what questions pertaining to terrorist groups and behavior had been asked by social science researchers; to identify the main findings from that research; and attempt to distill and summarize them within a framework of operationally relevant questions. To identify the relevant social science literature, the author began by searching a series of major academic databases using a systematic, iterative keyword strategy, mapping, where possible, onto existing subject headings. The focus was on locating professional social science literature published in major books or in peer-reviewed journals. Searches were conducted of the following databases October 2003: Sociofile/Sociological Abstracts, Criminal Justice Abstracts (CJ Abstracts), Criminal Justice Periodical Index (CJPI), National Criminal Justice Reference Service Abstracts (NCJRS), PsycInfo, Medline, and Public Affairs Information Service (PAIS). Three types of annotations were provided for works in this bibliography: Author's Abstract -- this is the abstract of the work as provided (and often published) by the author; Editor's Annotation -- this is an annotation written by the editor of this bibliography; and Key Quote Summary -- this is an annotation composed of "key quotes" from the original work, edited to provide a cogent overview of its main points.

Motivation expert James Fell teaches readers how to skip the hard part and go directly from intention to committed action. After years of helping people change, James Fell had a sudden insight about sudden insight: significant life change doesn't often come from just putting one foot in front of the other, carefully observing and altering habits, slogging through baby steps toward new behavior. Rather, the research reveals that serious life turnaround usually happens in a moment, with a flash of inspiration. Epiphany arrives like a lightning strike, rapidly shifting the recipient of such enlightenment onto a new path that creates a better life. Motivational psychology has traditionally focused on slow and steady—gradual improvement over time to reach a desired goal, whether it's weight loss, career change, battling addiction, or success in relationships. We've been told since toddlerhood that the tortoise beats the hare. But, through compelling science and powerful stories, James Fell shows us that the hare has the edge; overwhelming desire can be awakened fast and furiously. When you learn to become attuned to that sensation of sudden awakening, a new path can be followed almost effortlessly, because it feels like destiny. Everyone has the ability to experience the lightning strike. The Holy Sh!t Moment will teach you how to create a life-changing epiphany and go directly from intention to action.
