Jesuits established a large number of astronomical, geophysical and meteorological observatories during the 17th and 18th centuries and again during the 19th and 20th centuries throughout the world. The history of these observatories has never been published in a complete form. Many early European astronomical observatories were established in Jesuit colleges. During the 17th and 18th centuries Jesuits were the first western scientists to enter into contact with China and India. It was through them that western astronomy was first introduced in these countries. They made early astronomical observations in India and China and they directed for 150 years the Imperial Observatory of Beijing. In the 19th and 20th centuries a new set of observatories were established. Besides astronomy these now included meteorology and geophysics. Jesuits established some of the earliest observatories in Africa, South America and the Far East. Jesuit observatories constitute an often forgotten chapter of the history of these sciences.

This well-established pilot, now in its third decade, covers the Azores, Canaries, Madeira and Cape Verde Islands. The sixth edition of Atlantic Islands builds on solid foundations - the author's long familiarity with the area, an invaluable network of local contacts, and the constant flow of information and feedback received from yachtsmen and women during the lifetime of the previous edition. For this edition the coverage has been extended to include Bermuda. This new section is an important development especially for US-based yachts and for the east-bound Atlantic crossing. New photos and new and revised harbour plans support the fully updated text. Whether you seek authoritative pilotage information, comprehensive details of available facilities, or simply suggestions for planning an enjoyable cruise, you will find them all in his new edition of Atlantic Islands. The most comprehensive guide to Tenerife's resorts, towns and villages available in the English language, written with insight and passion by travel writers who have spent years treading the streets of every town and village, trekking along goat trails in the mountains and revelling at fiestas until dawn (all in the name of research). In short exploring the Tenerife that visitors and even most residents never see...the Tenerife which lies beyond the holiday brochures. Much more than just a tourist guide, The Real Tenerife gives you the insiders' view of this surprising, beautiful and diverse Spanish island which lies off the coast of Africa. Inside you will discover: hidden treasures

beyond the tourist hotspots, a brief look into Tenerife's past and future, intimate guided tours of towns and villages across the island, personal photographs from the authors' travels, a guide to Tenerife culture and celebrations; hotel and restaurant recommendations; tips on when, where and how to enjoy the island's fiestas and much, much more... The Real Tenerife gives you everything that other travel guides to Tenerife don't. Previously published as Going Native in Tenerife - revised, updated and additional locations and photographs included as well as additional information on existing locations added in December 2012.

This guide to Chile refreshingly focuses on the country's natural history and culture. It encompasses every aspect of this geographically diverse country, from the immense deserts and peaks in the north, via the fertile central valleys, to the dense rainforests and glaciers of the south. There is opportunity to discover the culture of Chile, including mummies from the 5th century BC found in the Atacama Desert and Inca ruins. Travellers can hike the Andes, savour fine and affordable wine, and venture off shore to sail and kayak. This guide details every aspect of travel, from accommodation and eating out to national parks and sailing, in this most easy of Latin American countries for independent travellers. From 1814, linked to their educational work, Jesuits made significant contributions to the natural sciences, especially in the fields of astronomy, meteorology, seismology, terrestrial magnetism, mathematics, and biology in a worldwide network of universities, secondary schools and observatories.

November issue includes abridged index to yearly volume.

This is a pictorial diary of a once-in-a-lifetime motorbike trip across 35 countries, and a practical guide to motorcycling around the world - what to do first, what to plan for, and how to cope with the unexpected.

It was 1987 when the idea of sailing away into the sunset became a lot more than just a dream. I had spent my whole career enjoying my work as a TV cameraman, lighting director, and technical coordinator with BBC. During that time, I raised a family and saw Lucy and Chris grow into two fine adults. Alas, my marriage failed after twenty-one years, which led me to start thinking of a new beginning. I had been messing about in boats since the age of ten, so sailing was my passion. I was not yet ready to retire, but the opening of the new marina in Penarth made it possible to live aboard and still continue working. Eclipse of Penarth became my home, with Barney, our beloved four-legged friend, for company. Quite soon I met Evey, and even though I made it very clear that I had serious thoughts of sailing away, she was not deterred from the idea of living on a boat. We married on June 18, 1993, and with my prospects of early retirement looking good, after thirty years of service, the stage was set for us to leave on our first wedding anniversary and begin our twenty-year honeymoon around the world.

This easily accessible reference work reveals the workings of savage tropical storms, charts their actions and cycles, assesses their economic and environmental impact, and reviews the latest research on hurricanes.

This book constitutes refereed proceedings of the 8th Conference on Information and Communication Technologies of Ecuador, TICEC 2020, held in November 2020. Due to the COVID-19 pandemic the conference was held online. The 36 full and 7 short papers were carefully reviewed and selected from 117 qualified submissions. The papers are organized
