Quantum Jump was written for individuals trying to make sense of the rapid social and political changes overtaking their lives. Clement explains how our civilization is undergoing a translation similar to the European Renaissance, the development of managed agriculture or the invention of writing. Each of these eras brought about new world-views and broadened the intellectual scope through which we perceive our world. The Renaissance was triggered by the discovery of perspective OCo the means to manipulate three dimensions OCo and implemented by the bill of exchange and new mathematics. Our newest era began in 1900 with the discovery that the universe exists in many more than three dimensions. Exploration of this realm via mathematics and computers will drive the immediate future. This is a guide to surviving the jump from the industrial age to the onrushing era of hyperspace. The changes wrought by this era transition are already formidable OCo the rise of global capitalism and new industries, the collapse of the Soviet Union OCo but they are only the beginning. History shows that era transitions are juggernauts, imposing massive individual, cultural and social adaptation. Clement analyzes current responses, from retreats into tribalism to the erection of a "New World Order" of global corporatism and trading blocs; he concludes that

neither is viable. Instead, he points to skills like tangential and lateral thinking that will better equip individual readers with the points of view required in tomorrow's world."

Quantum Leaps is a how-to book for creating fundamental change in both ourselves and our organizations. Charlotte Shelton's basic premise is that organizational change happens one person at a time. Our workplaces simply mirror our individual and collective beliefs. Therefore, we change ourselves, our workplaces, and the world by changing our minds. As our beliefs change, we not only see the world differently, we begin to be in the world in a different way, thus creating a new reality. Shelton uses the basic principles of quantum mechanics as the foundational metaphor for a new quantum skill set that recognizes the highly complex, constantly changing, totally unpredictable nature of life. She demonstrates the inadequacy of our time-honored skills of planning, organizing, directing and controlling. She shows how these skills are directly tied to an obsolete view of reality ignoring the now fundamental requirements of extreme imagination and radical innovation. *Quantum Leaps* introduces seven new skills: skills that are compatible with life and work in the twenty-first century. These seven Quantum Skills enable us to see, think, feel, know, act, trust and be radically different ways. Collectively they form a comprehensive model for change. These skills integrate quantum mechanical principles, state-of-the-art psychology, and universal spiritual practices. They balance the traditional

left-brain business skills with a new skill set that more fully utilizes both hemispheres of the brain. As we master these skills, Shelton states, "We create balanced lives and whole-brain organizations and we become authentic change masters, changing ourselves and our organizations from the inside out." The Seven Quantum Skills are: Quantum Seeing, Quantum Thinking, Quantum Feeling, Quantum Knowing, Quantum Acting, Quantum Trusting and Quantum Being. These 7 skills introduce a new way to access underutilized brain capacities as they acknowledge the role of intention, intuition and interconnectivity.

About The Book: This publication is the first of two books planned to cover specific aspects of the sales processes, models and methodologies as taught by ESP concerning selling value, known as Payback Consultative Selling® (TM registered). This first publication deals with the selling aspect utilising ESP's ESPIRE® model. The second aspect of Payback Consultative Selling deals with negotiating prices to maximise margins having submitted a Payback Proposal (value proposition). Sample commendation: "This business book is ahead of its time. As a Managing Director of some 30 years within the competitive arena of Materials Handling, I wholeheartedly both recommend and applaud the principles of this publication. Adapting Payback Consultative Selling is a quantum leap from all traditional approaches and, when fully embraced, delivers high value to customers, all human

resources and shareholders alike. Its principles require changes to many processes, including management, sales, marketing and support, particularly in the way in which they think and act, changes which have to come if the role of selling through people is to continue profitably. Well done ESP!" Larry Blackwell, former MD of Atlet UK

The deliverables: Today effective sellers need to use the Payback Consultative Selling Process as the face to face value add tactical approach with decision makers in order to outposition and outperform those competitors who insist on conducting their business by providing quotations accompanied by brochures or specification detail. The latter outdated approach in effect asks Buyers to work out for themselves how a product or service might improve their business based on a description with or without a technical specification together with a price. Payback Consultative Selling applies measurable processes for calculating to what extent a service or a product will improve a customer's business in financial terms if, indeed, it can be done via the Seller's offerings. Quantum Leap uses key events in the life of Polkinghorne to introduce the central ideas that make science and religion such a fascinating field of investigation. Sir John Polkinghorne is a British particle physicist who, after 25 years of research and discovery in academia, resigned his post to become an Anglican priest and theologian. He was a professor of mathematical physics at Cambridge University, and was elected to the Royal Society in 1974. As a physicist he participated in the research that led to the discovery of the quark, the smallest known particle. This cheerful biography-cum-appraisal of his life and work uses Polkinghorne's story to approach some of the most important questions: a scientist's view of God; why we pray, and what we expect; does the universe have a point?; moral and scientific laws; what happens next? Owning their own business is many peoples dream. However, statistics show that the greatest majority of these new enterprises will fail - some with huge financial, heath and family costs. The Quantum Leap has been written for those contemplating this endeavor. It covers subjects usually overlooked in a business book and the knowledge has been gleaned over many years of personal experiences and a lifetime spent establishing and managing a variety of businesses as a consultant. Written in a conversational manner with a little humor being used to lighten the tone, the author, Colin Mackie, has witnessed the effects of businesses failing and with

some of the victims of 'business ignorance' paying the ultimate price. It covers topics such as attitude, aptitude, compassion, honesty, ethic and morality. Hopefully, reading this book before taking the leap into business ownership may save a lifetime of regret and many years of angst and humiliation. 'This book should become essential reading for anyone contemplation business ownership.' CR Australia.

A journey in search of the primary forces that either fuel or destroy progress in companies today. Scientists changed our world by proving that the complex world of physics is ruled by only a few forces which obey simple Laws. This allowed a quantum leap in our progress. In this business novel an Eastern woman teams up with a Western turnaround guy to master the forces that are limiting their progress in business. They set their aim as high as the imagination will allow: *For their traditional products company to achieve a Viable Vision - to turn its sales into its net profits in 4 years, and *To encourage their people to escape from the rat race by becoming millionaires - free to pursue their real purpose in life. They use ancient Laws and wisdoms to defeat the forces that stand in their way. Is it possible that a traditional business is also ruled by a few distinct forces - which could be mastered to allow for a quantum leap in the performance of the business and its people?

This book theorizes that models based on the classical sciences have misguided educational leadership. Dr. Rettig sees the open dynamics of twentieth-century science—specifically, quantum mechanics — as a better and more natural model, and describes what he sees as a method of leadership light years beyond those of today. Dr. Rettig illustrates his critique of the contemporary school administration structure with the story of Leslie O'Connor, a fictional administrator, who
