

Questionnaire On Capacity Building United Nations

a. The set generally Since the publication of its first edition in 1950, the Annual Review of United Nations Affairs has stood as the authoritative resource for scholars, students, and practitioners researching the latest developments of that august body. From the insightful introduction, prepared each year by a distinguished expert on UN affairs, to the full-text presentation of reports and resolutions and the helpful subject index, ARUNA provides a practical tour of each year's U.N.actions and debates. The expert selection of documents by Joachim Muller and Karl Sauvant and the topic-based organization of those documents make any researcher's task much easier than the vast searching, sorting, and pruning required by the U.N.'s website. The series' topic-based organization of the materials and subject index lend invaluable guidance to all researchers. ARUNA presents comprehensive documentation of the work of the UN on an annual basis, starting in September of each year with the beginning of the regular sessions of the General Assembly. Coverage of the UN's key organs is provided, including the General Assembly, the Security Council, the Economic and Social Council (ECOSOC), the International Court of Justice, and the UN

Get Free Questionnaire On Capacity Building United Nations

Secretariat. In addition, selected reports of intergovernmental bodies and expert groups are included. Solely official UN documentation is used. ARUNA occupies a special place in the publications on the work of the UN, as it allows readers to obtain an overview of the principal developments in its key organs. This makes it an important reference source for policy-makers and academic researchers. b. The 2009-2010 volumes This year's edition continues to focus on the world financial crisis and the reaction of the United Nations and the international financial system to that crisis. The Overview to this year's edition, written by Joachim Muller and Karl Sauvant, examines the changing role of the United Nations and explores ways in which the management of the financial crisis has impacted that role. The Introduction to this year's edition also examines the effects of this crisis; this Introduction is drawn from the "Report of the Commission of Experts of the President of the United Nations General Assembly on Reforms of the International Monetary and Financial System," as well as a slightly edited version of a Preface to that report written by Professor Joseph E. Stiglitz. The Introduction discusses the findings of the Commission and proposes the creation of a new institution, a Global Economic Coordination Council, which would be supported by an International Panel of Experts with a geographically diverse membership that would

Get Free Questionnaire On Capacity Building United Nations

represent the interests of emerging and developing countries as well as those of developed countries. Dr. Joseph E. Stiglitz, who served as Chairman of the Commission and wrote the Preface to the Commission's Report, holds joint professorships at Columbia University's Economics Department and its Business School. He is also Co-founder and Co-President of the Initiative for Policy Dialogue. From 1997 to 2000 he was the World Bank's Senior Vice President for Development Economics and Chief Economist. From 1995 to 1997 he served as Chairman of the U.S. Council of Economic Advisers and as a member of President Clinton's cabinet. From 1993 to 1995 he was a member of the Council of Economic Advisers. He was previously a professor of economics at Stanford, Princeton, Yale, and All Souls College. Dr. Stiglitz is also a leading scholar of the economics of the public sector and was awarded the Nobel Prize in Economics in 2001 in addition to the American Economic Association's biennial John Bates Clark Award in 1979. His recent publications include *Freefall: America, Free Markets, and the Sinking of the World Economy* (2010), *Making Globalization Work* (2006), *Fair Trade for All* (2005), and *Globalization and its Discontents* (2002). The 2009-2010 volumes of ARUNA therefore also devote considerable attention to the financial crisis as well as other international crises. Among the documents in the 2009-2010

Get Free Questionnaire On Capacity Building United Nations

volumes are the complete General Assembly resolutions, as well as the Report and Resolutions of the Security Council and the Economic and Social Council (ECOSOC). Annual Reports of note include reports of the United Nations Children's Fund (UNICEF), the UN Development Programme and UN Population Fund, the UN High Commissioner for Human Rights, the UN High Commissioner for Refugees, the UN Relief and Works Agency for Palestine Refugees in the Near East, and the World Food Programme. Mr. Muller and Dr. Sauvant have also selected progress reports on key peacekeeping, peace-building, and political missions, including those for Afghanistan, the Democratic Republic of the Congo, Haiti, Iraq, the Middle East, Sudan, and West Africa. c. Volume VI (this volume) This volume contains the following: Chapter 1: General Assembly, Sixty-fourth Session (continued) 3. Resolutions Adopted by the General Assembly at Its Sixty-fourth Session (continued) (Resolutions 64/104 through 64/199) d. Guest Authors of previous years' editions Each annual edition of ARUNA is introduced by a Guest Author, a distinguished expert on UN affairs, who highlights the outstanding themes of the year in review. Together with an overview provided by the editors, this introduction is intended to facilitate access to the material and, above all, to make it easier for users of ARUNA to "see the forest for the trees." This year's ARUNA includes excerpts

Get Free Questionnaire On Capacity Building United Nations

from the "Report of the Commission of Experts of the President of the United Nations General Assembly on Reforms of the International Monetary and Financial System" (21 Sept. 2009), and from a slightly edited version of a Preface to that report written by Professor Joseph E. Stiglitz. However, the roster of distinguished experts who have contributed this introduction in the past is also worthy of mention: Jose Antonio Ocampo: ARUNA 2008/2009 edition

Professor Jose Antonio Ocampo is Co-President of the Initiative for Policy Dialogue. He is also Professor in the School of International and Public Affairs and Fellow of the Committee on Global Thought at Columbia University. Professor Ocampo previously held the positions of Under-Secretary-General of the United Nations for Economic and Social Affairs, Executive Secretary of the United Nations Economic Commission for Latin America and the Caribbean, and Minister of Finance, Agriculture, and Planning of Colombia. In 2009, he was a member of the Commission of Experts of the President of the United Nations General Assembly on Reforms of the International Monetary and Financial System. Professor Ocampo is also the author of numerous books and articles on macroeconomics policy and theory, economic development, international trade, and economic history. His recent publications include *Stability with Growth: Macroeconomics, Liberalization and Development*, with Joseph E.

Get Free Questionnaire On Capacity Building United Nations

Stiglitz, Shari Spiegel, Ricardo Ffrench-Davis and Deepak Nayyar (New York: Oxford University Press, 2006). Jeffrey D. Sachs: ARUNA 2007/2008 edition
Professor Jeffrey D. Sachs is Director of the Earth Institute at Columbia University and Special Advisor to the Secretary-General of the UN on the Millennium Development Goals. Professor Sachs's introduction to ARUNA 2007/2008 was titled "Towards a New Global Protocol on Climate Change," in which he argued that solving the climate change problem will demand four steps: scientific consensus, public awareness, the development of alternative technologies, and a global framework for action. He dealt, in particular, with the science underpinning the negotiations for a new global protocol on climate change, as a successor to the Kyoto Protocol. Professor Sachs argued that climate change crises can only be solved through the goals, leadership, and treaty mechanisms of the UN.

Edward C. Luck: ARUNA 2006/2007 edition
Professor Edward C. Luck is UN Special Advisor on the Responsibility to Protect and Vice President and Director of Studies at the International Peace Academy. From 1984 to 1994, he served as President and Chief Executive Officer of the UN Association of the USA (UNA-USA). Professor Luck's introduction to ARUNA 2006/2007 covered "The responsible sovereign and the responsibility to protect," in which he addressed the scope and

Get Free Questionnaire On Capacity Building United Nations

content of what was agreed at the 2005 World Summit, the implications of the responsibility to protect (RtoP) for notions of state sovereignty, and some of the conceptual, architectural, and policy challenges then facing UN Secretary-General Ban Ki-moon's commitment to "operationalizing" the responsibility to protect and translating it "from words to deeds." Louise Frechette: ARUNA 2005/2006 edition Ms Louise Frechette is Distinguished Fellow at the Centre for International Governance Innovation, Waterloo, Ontario. Until March 2006, she was the first Deputy Secretary-General of the UN; before that, she was Permanent Representative of Canada to the UN. Ms Frechette's introduction to ARUNA 2005/2006 covered "United Nations reform: an unfinished story." As the first Deputy Secretary-General of the UN, Ms Frechette was uniquely positioned to undertake a personal assessment of what has changed and what has not changed in the past decade at the UN and why. She examined if the UN is functioning better than it was 15 years ago, why reform is so difficult to achieve and what the future holds for the institutions. Rubens Ricupero: ARUNA 2004/2005 edition Mr Rubens Ricupero is Dean of the Fundacno Armando Alvares Penteado (FAAP), Sao Paulo and was formerly Secretary-General of UN Conference on Trade and Development (UNCTAD) and Minister of Finance of Brazil. Mr Ricupero's introduction to ARUNA

Get Free Questionnaire On Capacity Building United Nations

2004/2005 covered "The difficulty of building consensus in an age of extremes" and examined the mysteries of the negotiating process leading to the outcome of the 2005 World Summit. Rather than a "Grand Bargain" of a comprehensive UN reform in the areas of development, security and human rights, it is argued that the Summit ended more on a note of lamentation and regret over a missed opportunity. Mr Ricupero concludes that contrary to the daring proclamation at the outset by the Secretary-General, the conditions indispensable to succeed were not in place. Indeed, it was hard to imagine that an ambitious and balanced reform package for the UN could have had any real chance of succeeding.

Since 1995, Danish International Development Assistance Has Been Organising International Workshops On Watershed Development Every Alternate Year. During The Course Of This Workshop, Numerous Papers, Including A Variety Of Case Studies, Were Presented. This Publication Is A Comprehensive Compilation Of All The Papers Presented At The Workshop, Along With The Group Reports And Task Force Recommendations. As a part of Grenada's Blue Week 2016 and Investment Conference, the Global Ocean Forum, FAO, and the project partners of the Common Oceans ABNJ Capacity Project organized a workshop on Capacity Development to Improve the

Get Free Questionnaire On Capacity Building United Nations

Management of Marine Areas beyond National Jurisdiction (ABNJ): Needs, Experiences, Options, and Opportunities, held from May 18–21, 2016 in St. George's, Grenada. The workshop aimed at 1. discussing and exchanging information and perspectives towards a broader understanding of the needs and opportunities in the development of capacity regarding ABNJ; 2. contributing information on capacity development to the global deliberations towards a legally binding international instrument on BBNJ under UNCLOS; and 3. formulating the next steps towards advancing capacity development regarding ABNJ, building on past and ongoing initiatives and experiences (especially the outputs of the Common Oceans Program), and responding to global prescriptions on capacity development in relation to marine resources and their management. This Sourcebook was developed as part of a UNEP project funded by the European Union and the Government of Switzerland that aimed to provide NFPs and other stakeholders with options to achieve enhanced implementation through strengthened cooperation. It focuses on six global Conventions: the Convention on the Conservation of Migratory Species of Wild Animals (CMS); the Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES); the Ramsar Convention on Wetlands (Ramsar Convention); the Convention Concerning the Protection of the World Cultural and

Get Free Questionnaire On Capacity Building United Nations

Natural Heritage (WHC); the International Treaty on Plant Genetic Resources for Food and Agriculture (ITPGRFA); and the Convention on Biological Diversity (CBD).

In recent years, the European Commission has attached increasing importance to the use of financial engineering instruments rather than traditional grant-based financing for the microcredit sector, considering these to be the most efficient option available. This book presents a study of capacity building and structural funds in public managing authorities for the microcredit sector. It presents two surveys to highlight the strengths and weaknesses of the managing authorities' capacity building. The first survey investigates the authorities' need for and interests in capacity building activities, assessing the areas in which capacity building support is needed, and explores the different types of support offered. The second survey analyses the results of the microcredit and microfinance programming activity, investigating its target groups and other operational features. It examines the key monitoring and reporting issues involved in this activity, before analysing the regulatory framework of the microcredit and microfinance sector. This book presents an in-depth analysis of structural funds and their management by policy-makers in the European convergence regions. It explores the interests of managing authorities, microcredit institutions,

Get Free Questionnaire On Capacity Building United Nations

operators and other financial intermediaries involved in microcredit programming activities, and offers some core strategic and operational recommendations for the use of structural funds in the microcredit sector.

The world economy is increasingly driven by technological innovations. UNCTAD's Information Economy Report 2007-2008 analyses the current and potential contributions of information and communications technology (ICT) to knowledge creation and diffusion. It looks at how developing countries use technology to generate innovations that improve the livelihoods of the poor and support enterprise competitiveness. It also examines the impact of ICTs on productivity and growth, international trade and employment in developing countries.

With its comprehensive coverage of political and security matters, human rights issues, economic and social questions, legal issues, and administrative and budgetary matters, the Yearbook of the United Nations stands as the authoritative reference work on the annual activities and concerns of the Organization. Fully indexed, the Yearbook includes all major General Assembly, Security Council and Economic and Social Council resolutions and decisions, uniquely placing them in a narrative context of United Nations consideration, deliberation and action. This sixty-eighth volume presents the work of the United Nations in dealing with recurring conflicts with severe humanitarian consequences including in the Syrian Arab Republic, where more than 12 million people were in need of basic food, clothing and shelter. The volume also highlights the Organization's rapid response to an escalatory global health emergency—the Ebola virus disease outbreak across West Africa. It documents the Organization's coordination of policy discussions to finalize a

Get Free Questionnaire On Capacity Building United Nations

global sustainable development agenda, with the security of future generations as the core concern; and its efforts to rebuild societies emerging from conflict while keeping the fragile peace in other places. It further details the entry into force of the landmark Arms Trade Treaty, the missile downing of a passenger airliner in the midst of a geopolitical crisis in eastern Ukraine, and securing international human rights and humanitarian law and prosecuting abusers.

A research-based guide for educators to the practical methods of understanding, evaluating and facilitating the change process. Significantly revised based on student and instructor feedback, the new third edition of *Implementing Change* continues to examine the ways in which change processes are experienced by those "on the ground" while adding new features, new material and the most current research. Based primarily on the Concerns Based Adoption Model (CBAM), this user-friendly text focuses on introducing constructs that can be used by those engaged in facilitating change processes as well as those who are evaluating and studying change. Rather than maintaining a bird's eye view of change processes, each chapter introduces a research-based, research-verified construct about change that captures the complexity of implementing change and the diversity of reactions to it. With a stress on pedagogical aids, each chapter incorporates practical examples, sample research, case studies, reflection questions and examples of common roadblocks to change.

This Global Survey conducted by the Special Representative of the Secretary-General on Violence against Children confirms that recommendations made in the 2006 UN Study on Violence against Children (VAC) are as urgent as they were at the time of the Study's release and continue to serve as a fundamental reference for child protection initiatives the world over. It highlights some progress including awareness

Get Free Questionnaire On Capacity Building United Nations

raising laws and policies to prevent and address VAC. However, progress has been slow, uneven and too fragmented to bring violence to an end. Most children exposed to violence live in isolation, loneliness, and fear and do not know where to turn for help, especially when the perpetrator is someone close and on whom they depend for their protection and well-being. Governments must increase efforts to practice these recommendations identified in the 2006 UN Study to make them a reality for every child in every country. This comprehensive survey provides important examples of initiatives that successfully shield children from violence and address the attitudes that allow it to flourish. It is being issued as Member States deepen their efforts to define a post-2015 development agenda and ensure an appropriate institutional response.

The purpose of this Research Topic is to share the latest developments in the methods and application of implementation science. Briefly, implementation science is the study of methods to promote the adoption and integration of evidence-based practices, interventions, and policies into routine health care and public health settings. Implementation research plays an important role in identifying barriers to, and enablers of, effective health systems programming and policymaking, and then leveraging that knowledge to implement evidence-based innovations into effective delivery approaches.

The Addressing Fisheries and Aquaculture in National Adaptation Plans Supplement provides technical guidance on the integration of fisheries and aquaculture in the formulation and implementation of National Adaptation Plans (NAPs) and complements FAO's Addressing agriculture, forestry and fisheries

Get Free Questionnaire On Capacity Building United Nations

in National Adaptation Plans – Supplementary guidelines (referred to as NAP-Ag Guidelines, FAO 2017a). It aims to draw the attention of policy makers and government officers responsible for NAP planning and processes generally, as well as fisheries and aquaculture officers at country level, specifically. It collates and analyses relevant information from fisheries and aquaculture to support the sector's ability to take part in national climate change adaptation planning processes.

The publication aims at presenting best practices and lessons learned from two programmes implemented in Kenya and in the United Republic of Tanzania which capitalized on FAO's experience and knowledge in inclusive food systems development, targeting both the policy and institutional level and the direct support to value chain actors (i.e. SMEs). The focus of the programme was twofold, covering both the policy level (through improved inter-sectoral coordination and capacity building of institutions) and the pilot of inclusive investments strategies by small and medium agro-industries to source from small-scale producers. Four food subsectors were selected, based on their nutrition relevance in the national and local consumption patterns and on their economic potential for small-scale actors (red meat, white meat, soybean, rice, maize and edible oils).

Capacity development interventions in support of agricultural innovation are more effective when based on systematic and participatory assessments of existing skills and capacity needs. Recognizing that, an instrument has been developed in the context of the Capacity Development for Agricultural Innovation Systems (CDAIS) project. It consists of a capacity scoring tool that allows assessing innovation capacities, identifying strengths and weaknesses and monitoring capacity changes over time. This paper describes the scoring tool and provides guidelines on how to apply it successfully. The scoring tool focuses on the soft capacities needed to collaborate, reflect, learn and think strategically. These skills are captured by 21 indicators and build on the key innovation capacities identified in the Common Framework of the Tropical Agriculture Platform, a G20 initiative led by FAO. The scoring tool also addresses technical skills and the enabling environment for agricultural innovation. The UN is able to recognize key global challenges, but beset by difficulties in trying to resolve them. In this, it represents the current global political balance, but is also the only international institution that could move it forward. Civil society can be a catalyst for this kind of change. In this book, Nora McKeon

Get Free Questionnaire On Capacity Building United Nations

provides a comprehensive analysis of UN engagement with civil society. The book pays particular attention to food and agriculture, which now lie at the heart of global governance issues. McKeon shows that politically meaningful space for civil society can be introduced into UN policy dialogue. The United Nations and Civil Society also makes the case that it is only by engaging with organizations which legitimately speak for the 'poor' targeted by the Millennium Development Goals that the UN can promote equitable, sustainable development and build global democracy from the ground up. This book has strong ramifications for global governance, civil society and the contemporary debate over the future of food. Food safety and quality are essential for food security, public health and economic development. These guidelines have been developed by the FAO, in collaboration with the WHO, to assist countries to identify capacity building needs in the core components of a national food control system, in relation to: food control management; legislation; inspection; official food control laboratories; food safety and quality information, education and communication. Released every three years since March 2003, the United Nations World Water Development Report (WWDR), a flagship UN-Water report published by UNESCO, has become the voice of the United Nations system in terms of the state, use and management of the world's freshwater resources. The report is primarily

Get Free Questionnaire On Capacity Building United Nations

targeted at national decision-makers and water resource managers, but is also aimed at educating and informing a broader audience, from governments to the private sector and civil society. It underlines the important roles water plays in all social, economic and environmental decisions, highlighting policy implications across various sectors, from local and municipal to regional and international levels. Similarly to the first two editions, this report includes a comprehensive and up-to-date assessment of several key challenge areas, such as water for food, energy and human health, and governance challenges such as institutional reform, knowledge and capacity-building, and financing, each produced by individual UN agencies.

The United Nations World Water Development Report 3Water in a Changing World (Two Vols.)Routledge With contributions from nearly 80 international experts, this comprehensive resource covers diverse issues, aspects, and features of public administration and policy around the world. It focuses on bureaucracy and bureaucratic politics in developing and industrialized countries and emphasizing administrative performance and policy implementation, as well as political system maintenance and regime enhancement. The book covers the history of public administration and bureaucracy in Persia, Greece, Rome, and Byzantium and among the Aztecs, Incas, and Mayas, public administration in small island states, Eastern Europe, and ethics and other contemporary issues in public administration.

With its comprehensive coverage of political and security matters, human rights issues, economic and social

Get Free Questionnaire On Capacity Building United Nations

questions, legal issues, and institutional, administrative and budgetary matters, the Yearbook of the United Nations stands as the most authoritative reference work on the activities and concerns of the Organization. Fully indexed, the Yearbook includes the texts of all major General Assembly, Security Council and Economic and Social Council resolutions and decisions, putting all of these in a narrative context of United Nations consideration, decision and action.

A case study of an increasingly necessary "military operation other than war"

Argues that building the educational, industrial, and economic capacities of societies, while fostering indigenous talents and skills, allows developing nations to direct their destinies through their own policies and collaborative efforts.

The United Nations World Water Development Report, published every three years, is a comprehensive review providing an authoritative picture of the state of the world's freshwater resources. It offers best practices as well as in-depth theoretical analyses to help stimulate ideas and actions for better stewardship in the water sector. It is the only report of its kind, resulting from the collaboration and contributions of the 26 UN agencies, commissions, program, funds, secretariats and conventions that have a significant role in addressing global water concerns. The news media are full of talk of crises - in climate change, energy and food and troubled financial markets. These crises are linked to each other and to water resources management. Unresolved, they may lead to increasing political insecurity and conflict.

Get Free Questionnaire On Capacity Building United Nations

Water is required to meet our fundamental needs and rising living standards and to sustain our planets fragile ecosystems. Pressures on the resource come from a growing and mobile population, social and cultural change, economic development and technological change. Adding complexity and risk is climate change, with impacts on the resource as well as on the sources of pressure on water. The challenges, though substantial, are not insurmountable. The Report shows how some countries have responded. Progress in providing drinking water is heartening, with the Millennium Development Goal target on track in most regions. But other areas remain unaddressed, and after decades of inaction, the problems in water systems are enormous and will worsen if left unattended. Leaders in the water sector can inform decisions outside their domain and manage water resources to achieve agreed socioeconomic objectives and environmental integrity. Leaders in government, the private sector and civil society determine these objectives and allocate human and financial resources to meet them. Recognizing this responsibility, they must act now! Two volume set: 336 + 96 pages (case studies). Includes CD-ROM. Published jointly with UNESCO Publishing.
