CONQUER COMPREHENSION WORKBOOK 1 is designed for students to practise and work on answering the different types of comprehension questions found in the multiple-choice and open-ended formats. The passages are carefully graded into three levels: Basic, Intermediate, Advanced. The main objective of the Basic level is to lay the foundation to build up a student's confidence in tackling comprehension. In the Intermediate level, the passages encourage higher-level thinking and understanding. The Advanced level challenges a student to think beyond the ideas presented in the passages. The wide variety of themes and genres also serve to widen a student's exposure to the different text types which are currently taught in schools. The different questioning techniques aim to develop a student's comprehension and inference skills. Thinking questions are incorporated to allow a student to exercise his opinions and make his conclusions. A glossary is included after every exercise to help students comprehend the passage better. It also increases a student's vocabulary and will aid in other writing, reading and comprehension exercises. These varied and useful exercises should give a student greater confidence when doing comprehension tests. In this book you will find a wealth of exciting classroom-tested lessons that will aid you in teaching the comprehension strategies.

Quick Cloze Passages for Boosting Comprehension Grades 4-6 Teaching Resources
This volume represents the first effort to present, and teach, the descriptive processes, philosophy, and values developed at the Prospect Archives and Center for Education and Research in North Bennington, Vermont. Through story and essay, it introduces a disciplined, collaborative method for understanding children as thinkers and learners called the descriptive review of the child. Developed through the Prospect Center, under the leadership of Patricia F. Carini, the descriptive review is a mode of inquiry that draws on the rich, detailed knowledge teachers and parents have of children and on their ability to describe those children in full and balanced ways, so that they become visible as complex persons with particular strengths, interests, and capacities. In an educational climate that calls increasingly for standardization, this book is a timely resource for educators, parents, and administrators who value individual human capacity.

Donalyn Miller says she has yet to meet a child she couldn't turn into a reader. No matter how far behind Miller's students might be when they reach her 6th grade classroom, they end up reading an average of 40 to 50 books a year. Miller's unconventional approach dispenses with drills and worksheets that make reading a chore. Instead, she helps students navigate the world of literature and gives them time to read books they pick out themselves. Her love of books and teaching is both infectious and inspiring. The book includes a dynamite list of recommended "kid lit" that helps parents and teachers find the books that students really like to read.

Quick, critical reading is an essential skill needed in the classroom and is critical to succeed on all standardized tests.
