Leprosy is a scary disease. Most people have a serious aversion to losing their sense of touch and growing numb and unable to feel another's touch, or even sensing hot and cold temperatures. They have an aversion to losing fingers, toes, and noses. They have an aversion to losing their eyesight, their ability to walk or to pick up a penny, and even their ability to have a sexual relationship. Hopefully, you don't have the physical disease of Leprosy. Did you know, though, that you might have "Spiritual Leprosy?" Your lifestyle may be creating numbness to the activities that are unacceptable to family, to friends, and to God. You are living a life that has become self-serving, addictive, and destructive to the extent that those in your life want nothing more to do with you. You're becoming immobile and non-functional in life because of a slavery to sin that has overtaken you. You are dying and may not even realize it yet. At one point in our lives, we are all leprous. The Ten Lep

Drawing the Nude presents an exciting approach to drawing the human body. Divided into three parts, on structure, anatomy and observation, it introduces a set of principles and develops a treasury of ideas for the artist to follow. Whilst recognizing the importance of observation, it focuses more on a conceptual understanding of the construction of the body in anatomical terms. In doing so, it encourages the cultivation of more informed observation and accommodates those who work from memory, imagination and invention. Contents: the drawing of elementary forms that can then be distorted, transformed and combined, leading on to compound forms; explains the use of light and shadows to express form; explains the gesture of the figure through short drawings that analyse the flow of movement through the body; studies the musculo-skeletal form and provides a set of tools for analysing its parts; uses direct and concise drawings, alongside images of digital sculptures of human anatomy; gives practical instruction relevant to both the novice and the experienced figure artist, as well as those working within the visual effects and game industries. Superbly illustrated with 199 images that include digital sculptures of human anatomy and concise drawings.

Robert Peurifoy was a giant in the field of construction engineering and authored several books during his lifetime. This book last published in 1989 and will capitalize on the well-known name of the author. In this edition, computer calculations of costs and of

modeling have been added as well as updated statistics, computer related examples and new problems. Civil, Environmental, and Construction Management Engineering Majors and Professionals will benefit from having this title on their shelf. This edition retains the conceptual strengths of the Peurifoy approach and organization from the previous edition but the new problems and computer-based examples and new up-to-date construction data make it the only choice in academia or industry.

Be more effective with less effort by learning how to identify and leverage the 80/20 principle: that 80 percent of all our results in business and in life stem from a mere 20 percent of our efforts. The 80/20 principle is one of the great secrets of highly effective people and organizations. Did you know, for example, that 20 percent of customers account for 80 percent of revenues? That 20 percent of our

time accounts for 80 percent of the work we accomplish? The 80/20 Principle shows how we can achieve much more with much less effort, time, and resources, simply by identifying and focusing our efforts on the 20 percent that really counts. Although the 80/20 principle has long influenced today's business world, author Richard Koch reveals how the principle works and shows how we can use it in a systematic and practical way to vastly increase our effectiveness, and improve our careers and our companies. The unspoken corollary to the 80/20 principle is that little of what we spend our time on actually counts. But by concentrating on those things that do, we can unlock the enormous potential of the magic 20 percent, and transform our effectiveness in our jobs, our careers, our businesses, and our lives.

The Global Status Report on Road Safety 2018, launched by WHO in December 2018, highlights that the number of annual road traffic deaths has reached 1.35 million. Road traffic injuries are now the leading killer of people aged 5-29 years. The burden is disproportionately borne by pedestrians, cyclists and motorcyclists, in particular those living in developing countries. The report suggests that the price paid for mobility is too high, especially because proven measures exist. Drastic action is needed to put these measures in place to meet any future global target that might be set and save lives.

(Publisher-supplied data) Drug abuse is a serious national health concern that costs American society billions of dollars and countless lives each year. Though it attracts the attention of politicians, mental health professionals, the media and members of the general public, little real progress has been made toward understanding the nature of the problem. Providing a perspective on alcohol and other drug abuse that should be of value to practitioners, course instructors, and students of psychology, counselling and sociology, this book should also be useful for anyone interested in developing a comprehensive understanding of substance abuse difficulties and their treatment. The organizing theme is that drug abuse can be conceptualized as a lifestyle, in which the individual demonstrates an increasing level of both commitment and preoccupation with drug-related activities, goals and relationships.; The lifestyle model considers three primary categories of influence in offering a working model of drug- seeking behaviour. These three factors, commonly referred to as the "three C's", are conditions internal and external influences that increase or decrease a person's future risk of abusing

drugs, choice decision-making processes of an individual, and cognition thinking patterns the individual uses to justify his or her decisions and subsequent drug use behaviour.; The first section of this book probes biological, psychological, and sociological roots of drug abuse, and is followed by a discussion of developmental origins, features and progressions of drug lifestyle involvement. Finally, potential avenue of intervention and prevention are investigated in an effort to construct a comprehensive programme of lifestyle change. Applicable case studies are also examined in relation to these issues.
