In Pagan Theology, Michael York provides an introduction to, and expansion of, the concept of Paganism and provides an overview of its theological perspective and practice. He demonstrates it to be a viable and distinguishable spiritual perspective found today in such forms as Chinese folk religion, Shinto, tribal religions, and neo-Paganism in the West. While adherents of many of these traditions do not use the word "pagan" to describe their beliefs or practices, York contends that there is an identifiable position possessing characteristics and understandings in common for which the label "pagan" is appropriate. He outlines these characteristics and also explores paganism as a general form of religious behavior which may be found in other religions which are not themselves pagan. In the course of examining such behavior, York provides descriptions of religions in action, including Buddhism and Hinduism.

The four Mystery Dramas were created, produced and printed one each year, one after the other, from 1910-1913. They took place in different theatres in Munich but always in the month of August. The writing of the dramas, the creating of the scenery, the making of the costumes, the learning of roles, the general directing, the organization of the printing and all the other innumerable things connected with such a major production happened within a matter of weeks before the main performance. There was a literal whirlwind of activity, and it is reported that often the scenes were written during the night before a scheduled rehearsal, and that at five or six in the morning a boy would come from the press to pick up the manuscript for the printing of the scene for that day's rehearsal. All this activity centered around Rudolf Steiner who gave directions or advice on every aspect of the production down to the smallest details. He not only wrote the dramas themselves, but also indicated how such soul and spiritual pictures could be presented and played on stage. A fifth drama was also planned, which was to include scenes from Ancient Greece and its mystery centers, but the outbreak of the First World War in August 1914 meant that it had to be postponed. Rudolf Steiner's early death in 1925 resulted in it never coming to production, nor ever being written down. The First Mystery Drama For ten years, Johannes has been working with Maria on art and on spiritual understanding. They both have the intention to make available the spiritual truths, which she is trying to research, in an artistic way, which he is trying to carry out, to the general public. Johannes has already had a relationship with a woman previously when he was younger, but he left her in order to work with Maria. She and Johannes had no intimate love relationship to begin with, but as time passed, Johannes has fallen in love with Maria and wishes to have such a relationship. She, however, wishes it to remain a platonic working partnership, since her main interest is in his art and in spiritual development. As Johannes reaches the crisis point where he has to admit to himself that the relationship he wishes with Maria will not come about, he is also thrown into uncertainty about the whole purpose and significance of his artistic development and the spiritual knowledge that he has also striven to master. Yet these two areas of crisis in his life do not, significantly, cause his complete emotional/ personal break down. At the key moment when these two crisis reach a peak, Johannes hears an address by Benedictus that illuminates very significant aspects of his soul life. This also causes him to be able to see other people in a new light, and on the basis of this, to be able to painfully reassess himself and his path in life. One consequence is that Johannes recognises that he is responsible for the moral failures that he has committed in the past, and the other consequence is that he recognises that how he acts with regard to other human beings now, will have consequences for their and his own soul-spiritual development in the future. This in turn allows him to see further into the realm of soul and spirit where he is able to understand that spiritual beings can and will act through us if we do not fully comprehend and lead ourselves. He sees how Maria is possessed by a certain being which takes advantage of something in her she is not aware of. When Benedictus, through his words, makes her aware of it, that being must leave Maria, and she is able to make a major step in her development. Johannes is also able to see how other characters meet certain spiritual beings, whether fully consciously or only partly consciously, and these perceptions then allow further progress in his development. Thus he enters right into the soul-spiritual realm and eventually can perceive those who have full consciousness in that realm and their activities. He ca

'By far the safest and most rational exposition of Eastern metaphysics and the practice of mental discipline that I have read.' Spectator The Quest of the Overself shows Western readers how to achieve serenity of mind, control of thought and desire, and the power to use higher forces by means of simple exercises. These include breathing and visualisation as well as mental control through meditation. These ideas, which the author gained by extensive travel in India, are as relevant to us today as they were when first published in 1937. Paul Brunton was a British philosopher, mystic and traveler. He left a successful journalistic career to live among yogis and holy men and studied a wide variety of Eastern and Western esoteric spiritual traditions. As he explains in the still fresh and fascinating The Quest of the Overself, meditation and the quest for inner peace are by no means exclusively for monks and hermits but also support those living everyday, active lives in the West. The 1980s saw the emergence of New Age and neo-paganism as major new religious movements. In the first book-length study of these movements, Michael York describes their rituals and beliefs and examines the similarities, differences and relationships between them. He profiles particular groups, including the Church Universal Triumphant, Nordic pagans, and the Covenant of Unitarian Pagans, and questions the adequacy of existing sociological categories for describing these largely amorphous phenomena.

In these four remarkable lectures, Rudolf Steiner contends that Christ has been working on humanity's behalf since the very beginnings of its existence, long before the inception of the Christian religion. Steiner indicates how - in both the ancient Mystery schools and in the miraculous events depicted in the Old Testament - the guiding hand of Christ shaped and developed peoples' cognition. The ultimate divine intervention took place in the incarnation of Christ in human form - God in man - which culminated in the Mystery of Golgotha. Through this mighty event, opportunity is given for every soul to develop immortal individuality and consciousness of self. Steiner clarifies the difficult concepts of sin, guilt and karma, and explains the meaning of 'forgiveness of sins' and 'resurrection of the body'. Looking forward to future great periods of evolution, he speaks of the separation of humanity into two races of good and evil, and describes how Christ will continue to work in this critical time of human development./

A groundbreaking study that distinguishes the natural time of the cosmos from artificial mechanistic time. • Reveals September 11 as the signal of the end of artificial time according to the Law of Time. • Long awaited sequel to the author's bestselling book *The Mayan Factor*. • Explains the Great Calendar Change of 2004 and its enormous potential for the future of humanity. In *Time and the Technosphere*, José Argüelles presents a groundbreaking study that distinguishes the natural time of the cosmos from the artificial mechanistic time under which we currently live. Argüelles defines the actual nature of time as the frequency of synchronization. Applying this Law of Time to an understanding of the entire system of life on Earth, he shows that in order to not destroy Earth's ability to sustain life, we must change our definition of time and adopt a natural harmonic calendar based on the 13-moon 28-day cycle. Until the creation of the Gregorian calendar and the 60-minute hour, most of humanity lived by the 28-day cycle of natural time. The adoption of artificial time has subjected us to a 12:60 time frequency that governs the entire global industrialized civilization--the technosphere. With the collapse of the Twin Towers on September 11, a fissure was created in this artificial technosphere, opening up the noosphere (Earth's mental envelope). Humanity has a golden opportunity to leave the strife of the past and enter a time of peace by adopting a harmonious natural calendar that will repair the damages caused by the irregular tempo of technospheric time. Our last best chance to adopt this natural time and step into the bright new future promised by the galactic shift of 2012 is the Great Calendar Change of 2004, a new discovery based on the author's mathematical research into the Mayan calendar first begun in his landmark work *The Mayan Factor*. In *Time and the Technosphere*, Argüelles reveals the clear distinction between third-dimensional astronomical time and the fourth-dimensional synchronic order of the Law of Time, which holds enormous potential for the future of humanity.

In this book, philosopher Paul Brunton (1898-1981) encounters the mysteries and magic of Egypt in the 1930s, including an eerie yet illuminating night spent alone inside the Great Pyramid. Alongside his explorations of ancient Egypt's monuments and gods, Brunton encounters a variety of occultists, fakirs, and dervishes, and even manages to become initiated into the deadly art of snake charming. His frank interviews with Muslim leaders remain relevant today, and his description of the Hajj reflects the beauty and inspiring faith of Mohammad's true followers. Brunton's journey to discover the furthest reaches of what the mind and body are capable of--and to distinguish various forms of yoga and magic from true spirituality--lead him to the myth of Osiris and to the mystery that is the Sphinx itself. In the end, Brunton turns his attention to his own spiritual path, connecting all of his experiences into a single discovery: that we are more than the body and that the freedom of our spirit can be experienced here and now. This new edition has been updated to incorporate Brunton's final revisions and includes an introduction by the Paul Brunton Philosophic Foundation. "Paul Brunton was a great original and got to a place of personal evolution that illumines the pathways of a future humanity." --Jean Houston, author of *A Passion for the Possible* and *A Mythic Life* "Any serious man or woman in search of spiritual ideas will find a surprising challenge and an authentic source of inspiration and intellectual nourishment in the writings of Paul Brunton." --Jacob Needleman, author of *What is God?*

'The treasure-trove of the real self is within us, but it can be lifted only when the mind is still.' Paul Brunton was one of the 20th century's greatest explorers of, and writers on, the spiritual traditions of the East. He travelled widely throughout India (in particular) and met gurus and teachers who enriched his life immeasurably. By passing on to us the wisdom he learned directly from these holy men, he is widely credited as having introduced yoga and meditation to the West. In *The Secret Path*, Paul Brunton explains in simple language how to meditate, and how this will transform your everyday existence. He also describes the remarkable experiences and understandings he himself gained from meditation and how, by making this ancient practice a part of your life, you will be able to experience a valuable kind of freedom and a deep inner peace. The classic work - which has been reprinted many times - is a very special pointer towards your inner world, and one written by a most unusual and adventurous man of insight.

Sarah Pike traces the history of New Age and Neopagan religions in the United States from their origins in the nineteenth century to their reemergence in the 1960s counterculture. She also considers the differences and similarities between the New Age and Neopagan movements as well as the antagonistic relationship between these two practices and other religions in America, particularly Christianity. Covering such topics as healing, gender and sexuality, millennialism, and ritual experience, she offers a sympathetic yet critical treatment of religious practices often marginalized yet soaring in popularity. Her book is a rich analysis of these spiritual worlds and social networks and questions why these faiths are flourishing at this point in American history.

This book begins with a comprehensive historical section that places the New Age within the context of its predecessor movements. It then focuses on specialized aspects of this subculture, from essays on the convergence of New Age spirituality with women's spirituality, to an essay on how Evangelical Christians have responded to the movement. The book also examines the international impact of the New Age.

In the year 2000--and beyond--what will the church be like? What challenges will it face? Will the church be able to provide a strong sense of community? Will it be an ethical force in the lives of Americans? And what role will religion play in politics and in the marketplace? In *Christianity in the 21st Century* Robert Wuthnow reflects on these provocative questions as he seeks to identify changes that are taking place now in American society that churches must address if they are to remain vital in the future. He foresees five critical areas--institutional, ethical, doctrinal, political, and cultural--in which major challenges will arise, then meets the thorny issues head-on. How will churches' resource bases, their very identity, and their capacity to carry on their spiritual traditions be altered? Will they continue to function as sources of caring in a needy world? What impact will the resurgence of fundamentalism have, and how will moderate and liberal congregations react? How will the political activities of churches influence their capacity to be heard in the public arena, and what will the impact be of pluralism and the prevailing materialism of our society? Drawing on a wide range of first-hand observations and research, Wuthnow demonstrates that in each of these five areas people of faith have strong reasons to enter the next century with confidence in their religious institutions. But he also highlights worrisome signs, and points to specific areas that need to be addressed to ensure the continuing vitality for Christianity in America--not least among these are the rampant individualism that erodes spiritual communities and the religious infighting that diminishes the Christian sense of unity. The onset of a new millennium affords a historic opportunity to take stock of the present situation and to plan for the future--in the years ahead, much reflection is likely to occur about all our major institutions. Christianity in the 21st Century aims to contribute to those reflections by offering a sobering, realistic, and ultimately hopeful assessment of where the church is now, and where the church is headed.
