Dussehra, New Year, etc. They take hours, and in some cases, days to make and is a process the author terms 'immensely enjoyable'. However, since the lives of these rangolis are very short, this book is created to give longevity to these designs, and in that process, be used as a coffee table book, adding aesthetic value to the décor of the place or perhaps inspire other artists in any way possible. Featured in this book are mostly freehand rangolis along with some traditional kolams with a twist, galicha (carpet) rangoli design, portrait rangoli and pookalam. This book is intended for aesthetic use, and this is not a rangoli tutorial book.

Over It is a high-octane dose of encouragement, storytelling, and hard-won advice from Lolo Jones, three-time Olympian and world champion hurdler and bobsledder. Lolo is perhaps better known today not for all the races she's won but for the millisecond mistake that cost her an Olympic gold medal over a decade ago. With stunning authenticity about her own struggles, longings, and losses, she shows us how to face our challenges head-on and keep working to overcome them. Lolo challenges us to: handle failure while pursuing our dreams; recognize the difference between achieving a goal and experiencing success; turn our most painful moments into the most successful; use thankfulness and faith to develop healthy hindsight; and give and receive forgiveness as the path back to life. Growing

up in a broken home, Lolo learned to shoplift at a young age just to eat at night and sometimes slept on the basement floor of the Salvation Army. While her father was in prison, her mother worked multiple jobs, and Lolo realized she needed to be self-motivated, singularly focused, and unwilling to quit if she wanted to succeed. Reflecting on her own challenging spiritual journey, Lolo invites us to rest in God who can make all the difference in overcoming obstacles with both strength and joy.

A bold new account of how celebrity works Why do we care so much about celebrities? Who decides who gets to be a star? Do celebrities deserve the outsized attention they receive? Sharon Marcus challenges everything you thought you knew about our obsession with fame. Drawing on scrapbooks, diaries, and vintage fan mail, she traces celebrity culture back to its nineteenth-century roots, when people the world over found themselves captivated by celebrity chefs, bad-boy poets, and actors such as the "divine" Sarah Bernhardt, as famous in her day as the Beatles in theirs. The Drama of Celebrity reveals how journalists, the public, and celebrities themselves all compete to shape the stories we tell about celebrities and fans, resulting in a high-stakes drama as endless as it is unpredictable.

A shift in perspective can change everything. This brilliant novel from the author of *The Seventh Most Important Thing* celebrates kids who see the world a little differently. April is looking for an escape from the sixth-grade lunch hour, which has become a social-scene nightmare, so she signs up to be a "buddy bench monitor" for the fourth graders' recess. Joey Byrd is a boy on the fringes, who wanders the playground alone,

dragging his foot through the dirt. But over time, April realizes that Joey isn't just making random circles. When you look at his designs from above, a story emerges... Joey's "bird's eye" drawings reveal what he observes and thinks about every day. Told in alternating viewpoints--April's in text and Joey's mostly in art--the story gives the "whole picture" of what happens as these two outsiders find their rightful places.

Party competition for votes in free and fair elections involves complex interactions by multiple actors in political landscapes that are continuously evolving, yet classical theoretical approaches to the subject leave many important questions unanswered. Here Michael Laver and Ernest Sergenti offer the first comprehensive treatment of party competition using the computational techniques of agent-based modeling. This exciting new technology enables researchers to model competition between several different political parties for the support of voters with widely varying preferences on many different issues. Laver and Sergenti model party competition as a true dynamic process in which political parties rise and fall, a process where different politicians attack the same political problem in very different ways, and where today's political actors, lacking perfect information about the potential consequences of their choices, must constantly adapt their behavior to yesterday's political outcomes. Party Competition shows how agent-based modeling can be used to accurately reflect how political systems really work. It demonstrates that politicians who are satisfied with relatively modest vote shares often do better at winning votes than rivals

who search ceaselessly for higher shares of the vote. It reveals that politicians who pay close attention to their personal preferences when setting party policy often have more success than opponents who focus solely on the preferences of voters, that some politicians have idiosyncratic "valence" advantages that enhance their electability--and much more.

We, the children of India— Former Chief Justice Leila Seth makes the words of the Preamble to the Constitution understandable to even the youngest reader. What is a democratic republic, why are we secular, what is sovereignty? Believing that it is never too early for young people to learn about the Constitution, she tackles these concepts and explains them in a manner everyone can grasp and enjoy.

Accompanied by numerous photographs, captivating and inspiring illustrations by acclaimed illustrator Bindia Thapar, and delightful bits of trivia, *We, the Children of India* is essential reading for every young citizen.

"Blazingly original, wry, and perfectly attuned to the oddness—and the profundity—of life" (Cristina Henríquez), Claire Luchette's debut, *Agatha of Little Neon*, is a novel about yearning and sisterhood, figuring out how you fit in (or don't), and the unexpected friends who help you find your truest self. Agatha has lived every day of the last nine years

with her sisters: they work together, laugh together, pray together. Their world is contained within the little house they share. The four of them are devoted to Mother Roberta and to their quiet, purposeful life. But when the parish goes broke, the sisters are forced to move. They land in Woonsocket, a former mill town now dotted with wind turbines. They take over the care of a halfway house, where they live alongside their charges, such as the jawless Tim Gary and the headstrong Lawnmower Jill. Agatha is forced to venture out into the world alone to teach math at a local all-girls high school, where for the first time in years she has to reckon all on her own with what she sees and feels. Who will she be if she isn't with her sisters? These women, the church, have been her home. Or has she just been hiding? Disarming, delightfully deadpan, and full of searching, Claire Luchette's *Agatha of Little Neon* offers a view into the lives of women and the choices they make.

For the majority of cultures around the world, religion permeates and informs everyday rituals of survival and hope. But religion also has served as the foundation for national differences, racial conflicts, class exploitation, and gender discrimination. Indeed, religious spirituality, having been transformed by contemporary economic and political events, remains both empowering and controversial. Religions/Globalizations examines the extent to which globalization and religion are inseparable terms, bound up with each other in a number of critical and mutually revealing ways. As the contributors to this work suggest, a crucial component of globalization—the breakdown of familiar boundaries and power balances—may open a space in which religion can be deployed to help refabricate new communities. Examples of such deployments can be found in the workings of liberation theology in Latin America. In other cases, however, the operations of globalization have provided a space for strident religious nationalism and identity disputes to flourish. Is there in fact a

dialectical tension between religion and globalization, a codependence and codeterminism? While religion can be seen as a globalizing force, it has also been transformed and even victimized by globalization. A provocative assessment of a contemporary phenomenon with both cultural and political dimensions, *Religions/Globalizations* will interest not only scholars in religious studies but also those studying Latin America, the Middle East, South Asia, and Africa. "For hundreds of years, Indian women have passed to their daughters the knowledge of the ritual wall and ground paintings and decorations of the home that function as messages to the deities for the health and well-being of Indian families. Some ground paintings are daily rituals, made every morning at dawn, while wall paintings and mud bas-reliefs are often made for special festivals to honor the deities and attract their benevolent attentions. It is the women of India who are responsible for communication with the gods on behalf of their families, governing the activities of family members, and maintaining the sanctity and order of the home." "This book is a splendid gallery of this diverse aspect of Indian art and a pictorial tour of the India travelers rarely see.

Designs vary between the representational and the purely graphic: painted and sculpted images such as mounds of rice are drawn from local iconography, while elephants, peacocks and lotus blooms are symbols of the deities. Colors ranging from earth tones to reds, blues, yellow, green, and white make the designs stand out from the mud-covered walls and dusty streets, a vibrant testament to centuries of Indian women's artistic voices."--BOOK

Now available in an affordable softcover edition, this classic in Springer's acclaimed Virtual Laboratory series is the first comprehensive account of the computer simulation of plant development. 150 illustrations, one third of them in colour, vividly demonstrate the spectacular results of the algorithms used to model plant shapes and developmental processes. The latest in computer-generated images allow us to look at plants growing, self-replicating, responding to external factors and even mutating, without becoming entangled in the underlying mathematical formulae involved. The authors place particular emphasis on Lindenmayer systems - a notion conceived by one of the authors, Aristid Lindenmayer, and internationally recognised for its exceptional elegance in modelling biological phenomena. Nonetheless, the two authors take great care to present a survey of alternative methods for plant modelling.

Inspired by traditional arts and antiquities as well as vintage wallpapers, mosaics, and pottery motifs, these 31 images also include original designs.

The advent of the digital economy has the potential to dramatically change the conventional interrelationships among individuals, enterprises and society. There can be little doubt that to achieve vigorous socioeconomic developments in the 21st century, people will have to aggressively use information technology to boost innovation and to organically link the results of that innovation to solutions to global environmental issues and social challenges such as the opportunity divide. We are responsible for taking advantage of the opportunities opened up by the digital economy and for turning those opportunities into things that reflect our values and goals. The book examines the overall impact of the digital economy and the development of a practical institutional design.

production, animal health and parasitism, etc., up to the effects of goat products on human health. In this book, several parts of them are presented within 18 different chapters. Molecular genetics and genetic improvement of goats are the new approaches of goat development. Several factors affect the passage rate of digesta in goats, but for diet properties, goats are similar to other ruminants. Iodine deficiency in goats could be dangerous. Assisted reproduction techniques have similar importance in goats like in other ruminants. Milk and meat production traits of goats are almost equally important and have significant positive impacts on human health. Many factors affect the health of goats, heat stress being of increasing importance. Production systems could modify all of the abovementioned characteristics of goats.
