

Rasa Shastra Evam Bhaishajya Kalpana Cotasy

Ancient treatise on Ayurveda system in Indic medicine. Volume 1 is Sutrasthana. Sanskrit text with English translation and interpretation.

This book focuses on RFID (Radio Frequency Identification), IoT (Internet of Things), and WSN (Wireless Sensor Network). It includes contributions that discuss the security and privacy issues as well as the opportunities and applications that are tightly linked to sensitive infrastructures and strategic services. This book addresses the complete functional framework and workflow in IoT-enabled RFID systems and explores basic and high-level concepts. It is based on the latest technologies and covers the major challenges, issues, and advances in the field. It presents data acquisition and case studies related to data-intensive technologies in RFID-based IoT and includes WSN-based systems and their security. It can serve as a manual for those in the industry while also helping beginners to understand both the basic and advanced aspects of IoT-based RFID-related issues. This book can be a premier interdisciplinary platform for researchers, practitioners, and educators to present and discuss the most recent innovations, trends, and concerns as well as practical challenges encountered, and find solutions that have been adopted in the fields of IoT and analytics.

Text with translation of the ?yurvedasaukhya, one of the 22 sections of To?ar?nanda, encyclopaedic work compiled under the guidance of To?aramalla, d. 1589.

Ayurveda, the ancient Indian System of Healing, lays great stress upon the psychosomatic constitution as a whole in solving various problems of health and disease. This book has been written with sufficient detail, outlining the principles of Indian medicine, to create an interest for the Western trained scientist and doctor and will also be of use to Western laypersons as an introduction to one of the longest practised healing paradigms.

Still unique in the field, this text combines color photographs and full-color artwork in one convenient resource. The dissections are amazingly clear, almost 3-D in appearance, and color-coded artwork next to each photo makes anatomy easy to interpret and identify. Spanish version of 2nd edition also available, ISBN: 84-8086-118-5

Bhavaprakash Nighantu is nucleus of Ayurvedic Materia Medica. It is one of the most indispensable works on Ayurveda. This work on English translation of the ancient Ayurvedic text has been divided into two parts: Part A, deals with principle Ayurvedic drugs of plant and animal origin. It covers twenty chapters on various gana (classification) of Bhavaprakash. Here, Ayurvedic parameters applicable to drugs have been tackled in detail. Classification of drugs according to medicinal activity, Description of gana according to Ayurveda, Brief monographs of medicinal plants used in Ayurveda, Certain miscellaneous Ayurvedic drugs, Plants used in other alternative systems of medicine, Drugs of animal origin. It will serve a handy reference book for all those involved in ayurvedic and medicinal plant research.

Ayurveda UpacharTreatmentVaidya Cint?ma?i: A??ath?na par?k?a to A?mari prakar?am

On use and purification of metals in Ayurvedic medicines.

Sanskrit text on ayurvedic system in Indic medicine with English translation.

The third edition of this book incorporates thoroughly revised and updated text, organized into twelve sections and arranged in three parts. Illustrated by more than 1100 clear line diagrams. Complemented with numerous tables and flowcharts for quick comprehension. Applied aspects, highlighted in the boxes, have been expanded and updated with recent molecular concepts on pathophysiology, advances in investigations and therapeutic principles. Additional important information has been highlighted as important notes. The above features of this book make it an indispensable text for postgraduates in Physiology. Candidate preparing for PG entrance examination would also find it as an authentic reference source.

Complimentary access to full e-book.

This book gives all sided information about modern and Ayurveda anatomy, physiology , Disorders , Comparative review of female reproductive system. Hepatotoxic effects of modern drugs used as ovulation inducers . Detail information about Ayurvedic Medicines for gynaecological diseases. Fertility control and Ayurveda .Research articles are included.

Materia medica of Ayurveda.

This present volume is the first of the Todarananda Ayurveda Saukhyam Series. It deals with the portion of the Materia Medica which is generally known as Nighantu. The Materia Medica of Ayurveda represents a rich storehouse of knowledge of drugs based on centuries of experience. Scientists, research workers, physicians and students interested in Ayurveda will appreciate this volume as it is translated into a language which is generally understood by all.

In ancient India, learning spanned four quarters of one's life. Learning was sought from the teacher, from one's individual effort, from fellow students and in the last quarter, from the school of life itself. This book belongs to the third quarter for students of Ayurveda regardless of their background in medicine, science, or humanities. Apart from topics in the eight branches of Ayurveda, the book also deals with ?yurvedic Biology which seeks to study the concepts and procedures of Ayurveda with the tools of modern biology.

Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. We are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

This handbook is an important reference work in understanding education systems in the South Asia region, their development trajectory, challenges and potential. The handbook includes the SAARC (South Asian Association for Regional Cooperation) countries for discussion---Afghanistan, Pakistan, India, Nepal, Bhutan, Bangladesh, and Sri Lanka---while also considering countries such as Myanmar and the Maldives that have considerable shared history in the region. Such a comparative perspective is largely absent within the literature given the present

paucity of intra-regional interaction. South Asian education systems are viewed primarily through a development lens in terms of inequalities, challenges and responses. However, the development of modern institutions of education and the challenges that it faces requires cultural and historical understanding of indigenous traditions as well as indigenous modern thinkers and education movements. Therefore, this encompassing reference work covers indigenous education traditions, formal education systems, including school and preschool education, higher and professional education, education financing systems and structures, teacher education systems, addressing huge linguistic and other diversities, and marginalization within the formal education system, and pedagogy and curricula. All the countries in this region have their own unique geographical, cultural, economic and political character and histories of interest and significance, and have responded to common issues such as overcoming the colonial legacy, language diversity, or girls' education, or minority rights in education, in uniquely different ways. The sections therefore include country-specific perspectives as far as possible to highlight these issues. Internationally renowned specialists of South Asian education systems have contributed to this important reference work, making it an invaluable resource for researchers and students of education interested in South Asia.

The new edition of this successful reference offers both cutting-edge and classic pharmacological methods. Thoroughly revised and expanded to two volumes, it offers an updated selection of the most frequently used assays for reliably detecting the pharmacological effects of potential drugs. Every chapter has been updated, and numerous assays have been added. Each of the more than 1,000 assays comprises a detailed protocol outlining purpose and rationale, and a critical assessment of the results and their pharmacological and clinical relevance.

Developed by WHO and the International Committee of the Red Cross in collaboration with the International Federation for Emergency Medicine Basic Emergency Care (BEC): Approach to the acutely ill and injured is an open-access training course for frontline healthcare providers who manage acute illness and injury with limited resources. BEC teaches a systematic approach to the initial assessment and management of time-sensitive conditions where early intervention saves lives. It includes modules on: the ABCDE and SAMPLE history approach trauma difficulty in breathing shock and altered mental status. The practical skills section covers the essential time-sensitive interventions for these key acute presentations. The BEC package includes a Participant Workbook and electronic slide decks for each module. BEC integrates the guidance from WHO Emergency Triage Assessment and Treatment (ETAT) for children WHO Pocket Book of Hospital Care for Children WHO Integrated Management of Pregnancy and Childbirth and the Integrated Management of Adult/Adolescent Illness (IMAI).
