"There has been a steady flow of controversies since the IRS issued its regulations on qualified appraisers and qualified appraisals. The IRS has developed a body of law relating to the qualifications needed to satisfy the Government that an appraisal is adequate to support the taxable event on the taxpayer's return. This book discusses elements related to testifying experts and introduces a novel form of expert testimony: hot tubbing. The book identifies the law, analyzes the cases, identifies the problems and provides insight and solutions to help appraisers do work which will be accepted by the IRS"--

The word "mission" can suggest a distant and dangerous attempt to obtain information for the benefit of the home left behind. However, the term also applies to the movement of information in the opposite direction, as the primary motivation of those on religious missions is not to learn about another culture, but rather to teach their own particular worldview. In *Masters and Students*, Micah True considers the famous Jesuit Relations (1632-73) from New France as the product of two simultaneous missions, in which the Jesuit priests both extracted information from the poorly understood inhabitants of New France and attempted to deliver Europe's religious knowledge to potential Amerindian converts. This dual position of student and master provides the framework for the author's reflection on the nature of the Jesuits' "facts" about Amerindian languages, customs, and beliefs that are recorded in the Relations. Following the missionaries through the process of gaining access to New France, interacting with Amerindian groups, and communicating with Europe about the results of their efforts, *Masters and Students* explores how the Relations were shaped by the distinct nature of the Jesuit approach to their mission - in both senses of the word.

Gait analysis is the systematic study of human walking, using the eye and brain of experienced observers, augmented by instrumentation for measuring body movements, body mechanics, and the activity of the muscles. Since Aristotle's work on gait analysis more than 2000 years ago, it has become an established clinical science used extensively in the healthcare and rehabilitation fields for diagnosis and treatment. Forensic Gait Analysis details the more recent, and rapidly developing, use of gait analysis in the forensic sciences. The book considers the use of observational gait analysis, based on video recordings, to assist in the process of identification or exclusion. With the increase in use of CCTV and surveillance systems over the last 20 to 30 years, there has been a steady and rapid increase in the use of gait as evidence. Currently, gait analysis is widely used in the UK in criminal investigations, with increasing awareness of its potential use in the US, Europe, and globally. The book details the history of the science, current practices, and of the emergent application to establish best-practice standards that conform to those of other forensic science disciplines. Engagement with the Forensic Science Regulator, and the Chartered Society of Forensic Sciences in the UK, and the International Association for Identification has helped to ensure and enhance the quality assurance of forensic gait analysis. However, there remains a fundamental lack of standardized training and methodology for use in evidentiary and investigative casework. This book fills that void, serving as one of the first to describe the current state of practice, capabilities and limitations, and to outline methods, standards of practice and expectations of the gait analyst as a forensic practitioner.

Forensic Gait Analysis reflects current research and forensic practice and will serve as a state-of-the-art guide to the use of gait analysis in the forensic context—for both education and training purposes. It will be a welcome addition to the libraries of professionals in the areas of podiatry, gait analysis, forensic video analysis, law enforcement, and legal practice.

Problem-solving assessment is an essential component of multi-tiered systems of support such as response to intervention (RTI) and positive behavioral interventions and supports (PBIS). In the media and medical literature, managing cancer as a chronic disease is fast becoming the focus of care. Patients who manage their cancer have the best chance of staying alive, having a good quality of life, or of being cured. They seek second opinions, research all types of cancer treatments, ask the right questions, protect themselves against errors

during treatment, and change their lifestyles. This book provides patients with more than 200 things they need to know and elaborates on more than 200 things they can do. Doing only a few of these things may save your life. This book teaches patients how to increase their odds, how to go about making treatment decisions, how to find what they need on the Internet, why research services are worth their weight in gold, and much more. *Managing Cancer: Managing to Stay Alive* gives patients the following: information about what to do first; forms to help keep track of medical information; lists of questions to use to evaluate treatment options (traditional, integrative, alternative, and experimental); questions to have answered before deciding on a treatment, when given a new medication, and before having a biopsy procedure; questions to ask conventional doctors, alternative doctors, the oncologist initially, and yourself before beginning a treatment; information on how to help avoid becoming one of the 50,000 Americans who die from medical errors in hospitals or one of the 100,000 patients who die from hospital infections each year; and concise listings of symptoms of medical emergencies such as infection, anemia, blood clotting problems, allergic reactions, and adverse reactions to drugs.

*Revealing Minds* is a practical, hands-on guide to assessing learning problems, based on the approach of *All Kinds of Minds*, the groundbreaking nonprofit institute co-founded by Mel Levine. Whereas most assessments of struggling learners focus on what is "broken" within a student and needs to be fixed, *All Kinds of Minds* has adopted a more positive and comprehensive approach to the process. Rather than labeling children or categorizing them into certain pre-defined groups, their optimistic and helpful path creates a complete picture (or "profile") of each student, outlining the child's assets along with any weaknesses, and identifying specific breakdown points that lead to problems at school. The process of assessment should be able to answer a question such as, "Why is my son struggling with reading?" with a better answer than, "Because he has a reading disability." *Revealing Minds* shows how to discover hidden factors—such as language functioning, memory ability, or attention control—that are impeding a student's learning. It goes beyond labels and categories to help readers understand what's really going on with their students and create useful learning plans. Providing scores of real-life examples, definitions of key terms, helpful diagrams, tables, and sample assessments, Pohlman offers a useful roadmap for educators, psychologists, and other professionals to implement the *All Kinds of Minds* approach in their own assessments.
