The Microsoft Technology Associate MTA certification is an entry-level certification which serves as a good starting point for students and educators who may eventually progress to the Microsoft Technology Specialist MCTS or higher programs. Simply put, it assesses the foundational knowledge necessary to pursue MCTS, MCITP or MCPD certifications. The certification focuses more on knowledge and a little less on skills. However, the knowledge areas are all based on MS products so you must know those products inside and out. Questions on the general knowledge are relatively easy. Product and technology specific technical questions, however, are way more difficult. This is why we developed this study product - we focus on those difficult topics that involve difficult technical skills. We want you to be able to answer these difficult questions and secure exam success accordingly. Software Development Fundamentals EXAM 98-361 covers: Core Programming Object-oriented Programming General Software Development Web Applications Desktop Applications Databases Web Development Fundamentals EXAM 98-363 covers: Programming web applications Working with data and services Troubleshooting and debugging web applications Working with client-side scripting Configuring and deploying web applications HTML5

Application Developer Fundamentals EXAM 98-375 covers: Platform fundamentals Manage the state of an application Debug and test Publish an application Build the UI using HTML5 Core CSS concepts Using JavaScript: Update the UI Code animations Access data Code additional HTML5 APIs We give you knowledge information relevant to the exams specifications. To be able to succeed in the real exams, you'll need to apply your earned knowledge to the question scenarios. Many of the exam questions are written to be less straight forward. They tend to be framed within the context of short scenarios. The exams are not too difficult. However, coverage is very comprehensive - a wide range of topics are presented in the official topic lists. The exams do not ask you to answer hundreds of questions. In other words, only a small fraction of the official topics will be presented. This Exam FOCUS book focuses on the more difficult topics that will likely make a difference in exam results. The book is NOT intended to guide you through every single official topic. You should therefore use this book together with other reference books for the best possible preparation outcome.

When people encounter an argument for or against God's existence, it often raises

more questions than it answers. In *Letters to Doubting Thomas*, C. Stephen Layman offers a fresh, insightful approach to the issue of God's existence--a way to organize what can seem like a blizzard of claims and concepts--bringing clarity to a debate often mired in confusion. Layman explores the evidence for the existence of God in a series of fictionalized letters between two characters--Zachary, a philosopher, and Thomas, an old college friend who appeals to Zach for help in sorting out his thoughts about God. As their correspondence grows, Zachary leads Thomas through an informal and highly readable comparison of Naturalism (the belief that there is no God and that ultimate reality is physical reality), and Theism (the idea that there is an almighty, perfectly good God). In engaging letters that break down complex philosophical arguments into easily digestible bits, the two friends delve into such weighty topics as the reliability of religious experience, various arguments for God's existence (such as the cosmological, design, and moral arguments), the question of free will, and the problem of evil. A piece at a time, they build an argument that shows that Theism, on balance, provides a better explanation of the world and human life than does Naturalism. Here then is a highly accessible account of the major arguments for and against the existence of God, capturing some of the best new insights of modern philosophy in a marvelously clear and engaging format.
