This work provides the investing public, real estate practitioners, regulators and real estate and finance academics with up-to-date information on what modern scholarly research tells us about Real Estate Investment Trusts (REITs). REITs are credited to allow institutional and individual investors to invest in real estate via a corporate entity. The increasing interest in REITs as indicated by their growth in market capitalization and institutional holdings in the United States and

around the world suggests that REITs are becoming an increasingly important part of investors' diversified portfolio. *Real Estate Valuation: A Subjective Approach* highlights the subjective valuation components of residential and commercial real estate, which can lead to a range of acceptable property value conclusions. It discusses the causes of housing booms and goes in depth into the heterogeneity of commercial real estate property valuation via examples from owner-occupied, multifamily residential, hotel, office, retail, warehouse, condo conversion, and mortgage-backed security areas of real estate. Other topics explored include the role of machine learning and AI in real estate valuation, market participant value perceptions, and the challenge of time in the valuation process. The primary theoretical basis for the range of acceptable values and the subjectivity of property valuation focuses on the work of G.L.S. Shackle from the Austrian School of Economics. This illuminating textbook is suitable for undergraduate and master's students of real estate finance, and will also be useful for practitioners in residential and commercial real estate.

Holders of mortgage backed securities face risks on both sides of interest rate movements. Should interest rates fall, debtors refinance. If interest rates rise, debtors do not refinance, and the holders of mortgage backed securities suffer capital losses. Hedging strategies are required. Mortgage warrants and option pricing mechanisms are discussed, and various equity unlocking mechanisms, such as collateralized mort
