The Order of Things: The Realism of the Principle of Finality is an exploration of the metaphysical principle, "Every agent acts for an end." In the first part, Fr. Garrigou-Lagrange sets forth the basics of the Aristotelian metaphysics of teleology, defending its place as a central point of metaphysics. After defending its per se nota character, he summarizes a number of main corollaries to the principle, primarily within the perspective established by traditional Thomistic accounts of metaphysics, doing so in a way that is pedagogically sensitive yet speculatively profound. In the second half of The Order of Things, Garrigou-Lagrange gathers together a number of articles which he had written, each having some connection with themes concerning teleology.

Thematically, the texts consider the finality and teleology of the human intellect and will, along with the way that the principle of finality sheds light on certain problems associated with the distinction between faith and reason. Finally, the text ends with an important essay on the principle of the mutual interdependence of causes, *causae ad invicem sunt causae, sed in diverso genere*.

Database Aesthetics examines the database as cultural and aesthetic form, explaining how artists have participated in network culture by creating data art. The essays in this collection look at how an aesthetic emerges when artists use the vast amounts of available information as their medium. Here, the ways information is ordered and organized become artistic choices, and artists have an essential role in influencing and critiquing the digitization of daily life. Emphasizing that administrative law must be understood within the context of the political system, this core text combines a descriptive systems approach with a social science focus. Author Kenneth F. Warren explains the role of administrative law in shaping, guiding, and restricting the actions of administrative agencies. Providing comprehensive coverage, he examines the field not only from state and federal angles, but also from the varying perspectives of legislators, administrators, and the public. Substantially revised, the fifth edition features approximately one hundred new and current cases that place administrative law in the context of the Obama administration. Each chapter concludes with an edited exemplary case that highlights major themes and helps students understand important points made in the chapter. Using straightforward prose and avoiding unnecessary legal jargon, Administrative Law in the Political System, fifth edition provides students with an informed and accessible overview of a difficult subject matter.

This long-awaited new edition has been fully updated and revised by the original authors as well as two new members of the author team. Based on many years of active research and teaching it takes the discipline's most difficult aspects and makes them accessible and interesting. Each chapter builds up an understanding of the different ways of looking at the world. The clarity of presentation allows students to rapidly develop a theoretical framework and to apply this knowledge widely as a way of understanding both more advanced theoretical texts and events in world politics. Suitable for first and second year undergraduates studying international relations and international relations theory.

Paris was the epicenter of art during the latter half of the nineteenth century, luring artists from around the world with its academies, museums, salons, and galleries. Despite the city's cosmopolitanism and its cultural stature, Parisian society remained strikingly conservative, particularly with respect to gender. Nonetheless, many women painters chose to work and study in Paris at this time, overcoming immense obstacles to access the city's resources. 'Women Artists in Paris, 1850-1900' showcases the remarkable artistic production of women during this period of great cultural change, revealing the breadth and strength of their creative achievements. Guest Curator Laurence Madeline (Chief Curator at Musées d'art et d'histoire, Geneva) has selected close to seventy compelling paintings by women of varied nationalities, ranging from well-known artists such as Berthe Morisot, Mary Cassatt, and Rosa Bonheur, to lesser-known figures such as Kitty Kielland, Louise Breslau, and Anna Ancher.

A spidery network of mobile online media has supposedly changed people, places, time, and their meanings. A prime case is the news. Digital webs seem to have trapped "legacy media," killing off newspapers and journalists' jobs. Did news businesses and careers fall prey to the digital "Spider"? To solve the mystery, Kevin Barnhurst spent thirty years studying news going back to the realism of the 1800s. The usual suspects--technology, business competition, and the pursuit of scoops--are only partly to blame for the fate of news. The main culprit is modernism from the "Mister Pulitzer" era, which transformed news into an ideology called "journalism." News is no longer what audiences or experts imagine. Stories have grown much longer over the past century and now include fewer events, locations, and human beings. Background and context rule instead. News producers adopted modernism to explain the world without recognizing how modernist ideas influence the knowledge they produce. When webs of networked connectivity sparked a resurgence in realist stories, legacy news stuck to big-picture analysis that can alienate audience members accustomed to digital briefs.

By the turn of the century, however, local color fiction was fading from the scene, supplanted by writers of adventure fiction and historical romances, with whom local colorists increasingly merged, and opposed by the naturalists.

An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students.

America Moved: Booth Tarkington's Memoirs of Time and Place, 1869-1928 brings together for the first time all of the autobiographical writings of Booth Tarkington, one of the most successful and best-loved writers in American history. These are the memoirs of one of America's greatest literary figures--and one of the keenest interpreters of American manners and mores. During his lifetime, Tarkington was immensely popular. From 1902 to 1932, nine of his books were top ten bestsellers, The Magnificent Ambersons and Alice Adams won Pulitzer Prizes, and Tarkington's Penrod stories became widely recognized as young-adult classics. America Moved demonstrates that Tarkington's writing and powers of social observation stand the test of time. Written in a genial, easygoing style, America Moved gently but consistently interrogates the values of the new commercial-industrial age, especially its obsessions with speed, growth, and efficiency. The humane skepticism Tarkington directs in these pages toward the automobile, sprawl, and the cult of Progress identifies him as a voice quite at home in the twenty-first century. America Moved will delight readers with an enjoyable eyewitness account of the vast social and cultural changes that transformed America between the Civil War and the Great Depression.

The definitive and essential collection of classic and new essays on analytic theories of truth, revised and updated, with seventeen new chapters. The question "What is truth?" is so philosophical that it can seem rhetorical. Yet truth matters, especially in a "post-truth" society in which lies are tolerated and facts are ignored. If we want to understand why truth matters, we first need to understand what it is. The Nature of Truth offers the definitive collection of classic and contemporary essays on analytic theories of truth. This second edition has been extensively revised and updated, incorporating both historically central readings on truth's nature as well as up-to-the-moment contemporary essays. Seventeen new chapters reflect the current trajectory of research on truth.

Daisy Miller is the story of a young woman from New York's willful yet innocent flirtation with a young Italian, and its unfortunate consequences. The novella was the first big success for author Henry James who would repeat the theme of a venturesome American girl in the treacherous waters of European society in his later masterpiece, The Portrait of a Lady.

On female sexual morality

"What is truth?" has long been the philosophical question par excellence. The Nature of Truth collects in one volume the twentieth century's most influential philosophical work on the subject. The coverage strikes a balance between classic works and the leading edge of current philosophical research. The essays center around two questions: Does truth have an underlying nature? And if so, what sort of nature does it have? Thus the book discusses both traditional and deflationary theories of truth, as well as phenomenological, postmodern, and pluralist approaches to the problem. The essays are organized by theory. Each of the seven sections opens with a detailed introduction that not only discusses the essays in that section but relates them to other relevant essays in the book. Eleven of the essays are previously unpublished or substantially revised. The book also includes suggestions for further reading. Contributors Linda Martin Alcoff, William P. Alston, J.L. Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

The Victorian era of the United Kingdom and its overseas Empire was the period of Queen Victoria's rule from June 1837 to January 1901. The era was preceded by the Georgian period and succeeded by the Edwardian period. Victorian Era is seen as the link between Romanticism of the 18th century and the realism of the 20th century. The period was marked by many important social and historical changes that altered the nation in many ways. The population nearly doubled, the British Empire expanded exponentially and technological and industrial progress helped Britain become the most powerful country in the world.

This book introduces a novel version of realism--Measured Realism--that characterizes the kind of theoretical progress in the social and psychological sciences that is uneven but indisputable. Trout proposes a theory of measurement--Population-Guided Estimation--that connects natural, psychological, and social scientific inquiry.

Chronicles the theories created by religion and science to explain creationism, and discusses how communication efforts and debates between the two fields have helped or hindered further knowledge of the topic.

Madame Bovary is the French writer Gustave Flaubert's debut novel. The story focuses on a doctor's wife, Emma Bovary, who has adulterous affairs and lives beyond her means in order to escape the banalities and emptiness of provincial life. Though the basic plot is rather simple, even archetypal, the novel's true art lies in its details and hidden patterns. Flaubert was a notorious perfectionist and claimed always to be searching for le mot juste ("the precise word"). Madame Bovary takes place in provincial northern France, near the town of Rouen in Normandy. The story begins and ends with Charles Bovary, a stolid, kindhearted man without much ability or ambition. Gustave Flaubert (1821-1880) was an influential French writer who was perhaps the leading exponent of literary realism of his country. The celebrated short story writer Maupassant was a protégé of Flaubert. Chesnutt and Realism provides an important examination of Charles Chesnutt as a practitioner of realism.

A set of books on the Industrial Revolution, these comprehensive volumes cover the history of steam shipping, iron and steel production, and railroads-three interrelated enterprises that helped shift the Industrial Revolution into overdrive.

This new book explains why the international community has responded with a sense of fatalistic passivity to climate change. It presents a distinct critique of realism through the study of this topic, commonly overlooked in international relations. The author argues that the realist view rests on a dangerous contradiction; far from delivering security it serves to limit the way we think about the new generation of risks we face. The book also provides a detailed case study evaluating US climate politics under the Clinton and Bush administrations.

Written for pre-service and in-service early childhood professionals in child care, preschool, or kindergarten through third grade settings, ART & CREATIVE DEVELOPMENT FOR YOUNG CHILDREN, 8th Edition, takes a child-centered approach to art education. Updated throughout, the book includes an in-depth discussion of technology to aid teachers in understanding the role that technology can play in children's visual art appreciation and production. Guidelines for establishing an inclusive art program in classrooms for young children are included for early childhood professionals. Activities and recipes make the text a valuable resource for in-service teachers. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Topics include: Clara Bow, Rudolph Valentino, Hollywood in the 1920s.

Uncommon Friendships explores the often-overlooked dynamic of interreligious friendships, considering their significance for how we think about contemporary religious thought. By exploring the dynamics of three relationships between important religious thinkers--Franz Rosenzweig and Eugen Rosenstock-Huessy, Emmanuel Levinas and Maurice Blanchot, and Julia Kristeva and Catherine Clement--this study demonstrates the ways such friendships enable innovation and transformation within religious traditions. For each pair of thinkers, the sustained engagement and disagreement between them becomes central to their religious and philosophical development, helping them to respond effectively and creatively to issues and problems facing their communities and societies. Through a rereading of their work, Young shows how such friendships can help us rethink religion, aesthetics, education, and politics--as well as friendship itself.

British literary tradition is very rich. It unites the heritage of its own classics, such as medieval and Shakespeare productions, as well as the cultural influences of the various colonies and peoples who, throughout history, have mixed into British imagination. The critic August Nemo brings an excerpt of this rich cultural heritage through seven specially

This authoritative catalogue of the Corcoran Gallery of Art's renowned collection of pre-1945 American paintings will greatly enhance scholarly and public understanding of one of the finest and most important collections of historic American art in the world. Composed of more than 600 objects dating from 1740 to 1945.

The American state, with its various instruments of policy-making and implementation, has found itself wrestling with various policy challenges related to matters of marginalization. Administration and the Other uses historical cases to examine the social construction of groups in American policy and proposes using the various lessons that are often unspoken in discussions of the history and evolution of the field to launch a discourse of inclusion and connectivity.

The Spanish-American War of 1898 seems to mark a turning point in both geopolitical and literary histories. The victorious American empire ascended and began its cultural domination of the globe in the twentieth century, while the once-mighty Spanish empire declined and became a minor state in the world republic of letters. But what if this narrative relies on several faulty assumptions, and what if key modernist figures in both America and Spain radically rewrote these histories at a foundational moment of modern literary studies? Following networks of American and Spanish writers, translators, and movements, Gayle Rogers uncovers the arguments that forged the politics and aesthetics of modernism. He revisits the role of empire—from its institutions to its cognitive effects—in shaping a nation's literature and culture. Ranging from universities to comparative practices, from Ezra Pound's failed ambitions as a Hispanist to Juan Ramón Jiménez's multilingual maps of modernismo, Rogers illuminates modernists' profound engagements with the formative dynamics of exceptionalist American and Spanish literary studies. He reads the provocative, often counterintuitive arguments of John Dos Passos, who held that "American literature" could only flourish if the expanding U.S. empire collapsed like Spain's did. And he also details both a controversial theorization of a Harlem–Havana–Madrid nexus for black modernist writing and Ernest Hemingway's unorthodox development of a version of cubist Spanglish in *For Whom the Bell Tolls*. Bringing together revisionary literary historiography and rich textual analyses, Rogers offers a striking account of why foreign literatures mattered so much to two dramatically changing countries at a pivotal moment in history.

This book addresses a critically neglected genre used by women writers from Gaskell to Woolf to complicate Victorian and modernist notions of gender and social space. Their innovative short stories ask Britons to reconsider where women could live, how they could be identified, and whether they could be contained.

This textbook provides a global, chronological mapping of significant areas of theatre, sketched from its deepest history in the evolution of our brain's 'inner theatre' to ancient, medieval, modern, and postmodern developments. It considers prehistoric cave art and built temples, African trance dances, ancient Egyptian and Middle-Eastern ritual dramas, Greek and Roman theatres, Asian dance-dramas and puppetry, medieval European performances, global indigenous rituals, early modern to postmodern Euro-American developments, worldwide postcolonial theatres, and the hyper-theatricality of today's mass and social media. Timelines and numbered paragraphs form an overall outline with distilled details of what students can learn, encouraging further explorations online and in the library. Questions suggest how students might reflect on present parallels, making their own maps of global theatre histories, regarding geo-political theatrics in the media, our performances in everyday life, and the theatres inside our brains.

Taking a thematic approach, this new companion provides an interdisciplinary, cross-cultural, and international study of American literary journalism. From the work of Frederick Douglass and Walt Whitman to that of Joan Didion and Dorothy Parker, literary journalism is a genre that both reveals and shapes American history and identity. This volume not only calls attention to literary journalism as a distinctive genre but also provides a critical foundation for future scholarship. It brings together cutting-edge research from literary journalism scholars, examining historical perspectives; themes, venues, and genres across time; theoretical approaches and disciplinary intersections; and new directions for scholarly inquiry. Provoking reconsideration and inquiry, while providing new historical interpretations, this companion recognizes, interacts with, and honors the tradition and legacies of American literary journalism scholarship. Engaging the work of disciplines such as sociology, anthropology, African American studies, gender studies, visual studies, media studies, and American studies, in addition to journalism and literary studies, this book is perfect for students and scholars of those disciplines.

Fun and easy art-appreciation activities abound in this resource that features 75 American artists from colonial times to the present. A brief biography for each artist tells why his or her work is important, and a kid-tested art activity tries out the artist's approach. For Georgia O'Keeffe, the activity is a desert painting; for Frederic Remington, a face cast; for Leroy Nieman, a sketch of athletes; and for James Whistler, a clay engraving. Projects stress the creative process and encourage kids to try unusual techniques such as block printing, soak-stain, and stone carving as they learn about architecture, drawing, painting, photography, and sculpture. A resource guide provides a glossary of art terms, a list that groups the artists by style, a list of the artists' birthdays, an index of art supplies, and websites for viewing art online.
