Children are inherently musical. They respond to music and learn through music. Music expresses children's identity and heritage, teaches them to belong to a culture, and develops their cognitive well-being and inner self worth. As professional instructors, childcare workers, or students looking forward to a career working with children, we should continuously search for ways to tap into children's natural reservoir of enthusiasm for singing, moving and experimenting with instruments. But how, you might ask? What music is appropriate for the children I'm working with? How can music help inspire a well-rounded child? How do I reach and teach children musically? Most importantly perhaps, how can I incorporate music into a curriculum that marginalizes the arts? This book explores a holistic, artistic, and integrated approach to understanding the developmental connections between music and children. This book guides professionals to work through music, harnessing the processes that underlie music learning, and outlining developmentally appropriate methods to understand the role of music in children's lives through play, games, creativity, and movement. Additionally, the book explores ways of applying music-making to benefit the whole child, i.e., socially, emotionally, physically, cognitively, and linguistically. (Music Sales America). From The Beginning teaching scheme.

Turlough O'Carolan was born in County Meath, Ireland in 1670. He was trained as a youth to play the harp, and throughout his life composed a large number of songs. O'Carolan developed a personal style, containing melodic elements of Irish folk music, courtly harp music and Italian baroque music. O'Carolan's music was not published during his lifetime; therefore, various versions of his melodies have been handed down through the aural tradition. It is also not known how he accompanied his melodies. This collection presents 39 favorite O'Carolan melodies in easily playable, lively arrangements for alto (treble) recorder, with guitar chords above the staves. Included are four original melodies by Richard Voss inspired by and in the style of the early master.

Written specifically for elementary students by elementary band teachers with extra-large sized notation, letter names inside the note heads, limited material per page, fun, child-centered graphics and play-a-long videos.

Learn alto or sopranino recorder with this e-book with large, easy-to-read music in standard notation. (Schott). The best way to learn any instrument is to have lessons from a good, experienced teacher. Although, happily, the number of such teachers is constantly growing, the recorder is still frequently taught by enthusiastic but inexperienced teachers and many players start by teaching themselves. This series of books sets out to help learners of all ages in all three situations. Experienced teachers, who may choose to disregard much of the text as personal demonstration is always clearer than the written word, will find exercises and fine tunes a-

Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In Ditch That Textbook, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. Ditch That Textbook is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.
