

Red Dawn Timeline 10 27 62 Book 4

Michael Chenault, award-winning investigative journalist with the New York Times, is roused in the middle of the night by NYPD detectives and accused of the bizarre murder of a complete stranger. After clearing himself, Chenault finds that Martin Koplanski, the retired history professor he'd been accused of murdering, was likely killed for a mysterious Mormon relic long thought to be just a myth. Twenty-four hours later, Chenault receives an email with a photo of the recently murdered wife of Presidential candidate, Brockston Ratchford. She too appears to have been ritually killed in the exact manner as Koplanski, right down to having the same cryptic character scrawled in blood across her forehead. With way more than just a hunch to now go on, Chenault heads out to Salt Lake City, the site of the Ratchford murder investigation, to find out what, if any, connection there is between the murders. With the help of a beautiful young reporter he meets along the way, Chenault comes to learn the dark family secrets of a rising political star, along with the rather strange but true history of the Mormon church. As he pieces the story together of what appears to be an ever-growing conspiracy, Chenault is pursued by The Brothers, two murderous zealots who will stop at nothing to retrieve the Mormon relic Chenault is also trying to find. What Chenault eventually discovers is that what he's uncovered may not only affect the outcome of the next Presidential election, but decide the fate of an entire religion-if he can manage to stay alive. In the tradition of Raymond Khoury, Brad Meltzer, Dan Brown and Steve Berry, *The Moroni Deception* is a cleverly conceived, twisting tale of political and religious intrigue by a new master of the conspiracy thriller.

The Precolumbian ballgame, played on a masonry court, has long intrigued scholars because of the magnificence of its archaeological remains. From its lowland Maya origins it spread throughout the Aztec empire, where the game was so popular that sixteen thousand rubber balls were imported annually into Tenochtitlan. It endured for two thousand years, spreading as far as to what is now southern Arizona. This new collection of essays brings together research from field archaeology, mythology, and Maya hieroglyphic studies to illuminate this important yet puzzling aspect of Native American culture. The authors demonstrate that the game was more than a spectator sport; serving social, political, mythological, and cosmological functions, it celebrated both fertility and the afterlife, war and peace, and became an evolving institution functioning in part to resolve conflict within and between groups. The contributors provide complete coverage of the archaeological, sociopolitical, iconographic, and ideological aspects of the game, and offer new information on the distribution of ballcourts, new interpretations of mural art, and newly perceived relations of the game with material in the Popol Vuh. With its scholarly attention to a subject that will fascinate even general readers, *The Mesoamerican Ballgame* is a major contribution to the study of the mental life and outlook of New World peoples.

In a novel of military intrigue, formidable ex-Navy SEAL John Clark takes on a world-threatening band of terrorists

This exciting and accessible book takes us on a journey from the early days of computers to the cutting-edge research of the present day that will shape computing in the coming decades. It introduces a fascinating cast of dreamers and inventors who brought these great technological developments into every corner of the modern world, and will open up the universe of computing to anyone who has ever wondered where his or her smartphone came from.

Red Dawn

The BBC's Jazz Book of the Year for 2008. Few jazz musicians have had the lasting influence or attracted as much scholarly study as John Coltrane. Yet, despite dozens of books, hundreds of articles, and his own recorded legacy, the "facts" about Coltrane's life and work have never been definitely established. Well-known Coltrane biographer and jazz educator Lewis Porter has assembled an international team of scholars to write *The John Coltrane Reference*, an indispensable guide to the life and music of John Coltrane. *The John Coltrane Reference* features a day-by-day chronology, which extends from 1926-1967, detailing Coltrane's early years and every live performance given by Coltrane as either a sideman or leader, and a discography offering full session information from the first year of recordings, 1946, to the last, 1967. The appendices list every film and television appearance, as well as every recorded interview. Richly illustrated with over 250 album covers and photos from the collection of Yasuhiro Fujioka, *The John Coltrane Reference* will find a place in every major library supporting a jazz studies program, as well as John Coltrane enthusiasts.

The ground is shifting beneath our feet. Technology and globalization continue to uproot and reshape daily life and economics. Global supply chains are growing more deeply embedded in every region of the world. Digital platforms connect billions around the planet in ever more complex networks of data and exchange. In 2005, Thomas Friedman reduced these phenomena to one phrase, the title of his massively successful book: *The World is Flat*. The flat world is one of tremendous possibility, but it also poses new challenges to stability and shared prosperity. How will we come up with the new rules we need to make sure we continue to innovate and grow but also become a fairer, safer, and more inclusive global community? Law and economics professor Gillian K. Hadfield picks up where Friedman's book left off, peeling back the technological layer to look at the rule systems that guide global integration-our legal infrastructure-and argues that our existing approaches to making rules are no longer working. They are not only too slow, costly, and localized for increasingly complex advanced economies. Our rules also fail to address looming challenges such as poverty, instability, and oppression for the four billion living in poor and developing countries, largely outside of any formal legal framework. Following a rich and sweeping overview of the long-term evolution of social rules that made complex human societies and economic interdependence possible, Hadfield makes the case for building a more agile market-based and globally-oriented legal infrastructure. Combining an impressive grasp of contemporary economic globalization with an ambitious re-envisioning of our global legal system, *Rules for a Flat World* will transform our understanding of how to best achieve a more sustainable and vibrant global economy.

It is January 1964 in an alternative timeline in which the swinging sixties never happened. The fires of Washington DC have been extinguished and there is a new but fragile rapprochement between the old trans-Atlantic allies. But both old allies are afflicted with internal schisms that threaten the prospects of return to politics and business as usual. Moreover, a month after the Battle of Washington there is no conclusive proof that Red Dawn actually exists, let alone that it was involved in the events which almost provoked a war between the old Trans-Atlantic allies. However, something is going on in the Anatolian heartland of a devastated Turkey, around the Black Sea, in the Aegean and in the shattered former Soviet client states bordering the Balkans. Photographs taken by U-2 spy planes provide tantalising clues, radio intercepts hint at secret armies, and refugees fleeing from Turkey and the Greek Islands recount horrific tales of invaders burning towns and villages and of big grey warships anchored beneath the walls of ancient Constantinople. How much is the peace treaty between American and Britain worth? Is the World really any safer than it has been at any time since the cataclysm of the October War? Is it already too late to prepare for the next war? The war nobody except a solitary rogue Soviet defector predicts is inevitable? Now is the time for charismatic leaders to step forward. _____ Please note: this edition of 'Red Dawn' is re-proofed and re-formatted for re-release on 4th August 2017.

One of the most infamous and decisive battles of the Second World War, Stalingrad was a turning point of the Eastern Front, showing that the German juggernaut was not invincible. This Campaign Book for Bolt Action allows players to refight the fierce Battle of Stalingrad, from the actions of the surrounding area and within the city itself, to the encirclement, concerted relief efforts, and the final attempted breakout. New, linked scenarios, rules, troop types, and Theatre Selectors provide plenty of options for both novice and veteran players alike.

This revised and updated edition of the classic Cold War novel Team Yankee reminds us once again might have occurred had the United States and its Allies taken on the Russians in Europe, had cooler geopolitical heads not prevailed. For 45 years after World War II, East and West stood on the brink of war. When Nazi Germany was destroyed, it was evident that Russian tank armies had become supreme in Europe, but only in counterpart to US air power. In 1945 US and UK bombers sent a signal to the advancing Russians at Dresden to beware of what the Allies could do. Likewise when the Russians overran Berlin they sent a signal to the Allies what their land armies could accomplish. Thankfully the tense standoff continued on either side of the Iron Curtain for nearly half a century. During those years, however, the Allies beefed up their ground capability, while the Soviets increased their air capability, even as the new jet and missile age began (thanks much to captured German scientists on both sides). The focal point of conflict remained central Germany—specifically the flat plains of the Fulda Gap—through which the Russians could pour all the way to the Channel if the Allies proved unprepared (or unable) to stop them. Team Yankee posits a conflict that never happened, but which very well might have, and for which both sides prepared for decades. This former New York Times bestseller by Harold Coyle, now revised and expanded, presents a glimpse of what it would have been like for the Allied soldiers who would have had to meet a relentless onslaught of Soviet and Warsaw Pact divisions. It takes the view of a US tank commander, who is vastly outnumbered during the initial onslaught, as the Russians pull out all the cards learned in their successful war against Germany. Meantime Western Europe has to speculate behind its thin screen of armor whether the New World can once again assemble its main forces—or willpower—to rescue the bastions of democracy in time.

The institutional relationship between sport and the military appears to be intensifying. In the US for example, which faced global criticism for its foreign policy during the "war on terror," militaristic images are commonplace at sporting events. The growing global phenomenon of conflating sport with war calls for closer analysis. This critical, interdisciplinary and international book seeks to identify intersections of sport and militarism as a means to interrogate, interrupt and intervene on behalf of democratic, peaceful politics. Viewing sport as a crucial site in which militarism is made visible and legitimate, the book explores the connections between sport, the military and the state, and their consequent impact on wider culture. Featuring case studies on sports such as association football, baseball and athletics from countries including the US, UK, Germany, Canada, South Africa, Brazil and Japan, each chapter sheds new light on the shifting significance of sport in our society. This book is fascinating reading for all those interested in sport and politics, the sociology of sport, communication studies, the ethics and philosophy of sport, or military sociology.

On August 29, 1949, the first Soviet test bomb, dubbed First Lightning, exploded in the deserts of Kazakhstan. The startling event was not simply a technical experiment that confirmed the ability of the Soviet Union to build nuclear bombs during a period when the United States held a steadfast monopoly; it was also an international event that marked the beginning of an arms race that would ultimately lead to nuclear proliferation beyond the two superpowers. Following a trail of espionage, secrecy, deception, political brinkmanship, and technical innovation, Michael D. Gordin challenges conventional technology-centered nuclear histories by looking at the prominent roles that atomic intelligence and other forms of information play in the uncertainties of nuclear arms development and political decision-making. With the use of newly opened archives, Red Cloud at Dawn focuses on the extraordinary story of First Lightning to provide a fresh understanding of the origins of the nuclear arms race, as well as the all-too-urgent problem of proliferation.

THE STORY: Over the course of 30 years, the lives of Kayleen and Doug intersect at the most bizarre intervals, leading the two childhood friends to compare scars and the physical calamities that keep drawing them together.

More than tributes to Cape Breton women, these sketches offer intimate descriptions of life on this Nova Scotia Island. From women working in an Acadian fishing village, to wives and daughters in the coal mining culture, to the conversations of local quilters, the Island inspires women as they craft their art, stories, work and communities. This collection celebrates the contributions and hard work of women on this Island - an Island that continues to shape, inspire and test its people.

NEW YORK TIMES BEST SELLER • A grand, devastating portrait of three generations of the Sackler family, famed for their philanthropy, whose fortune was built by Valium and whose reputation was destroyed by OxyContin. From the prize-winning and bestselling author of Say Nothing, as featured in the HBO documentary Crime of the Century. The Sackler name adorns the walls of many storied institutions—Harvard, the Metropolitan Museum of Art, Oxford, the Louvre. They are one of the richest families in the world, known for their lavish donations to the arts and the sciences. The source of the family fortune was vague, however, until it emerged that the Sacklers were responsible for making and marketing a blockbuster painkiller that was the catalyst for the opioid crisis. Empire of Pain begins with the story of three doctor brothers, Raymond, Mortimer and the incalculably energetic Arthur, who weathered the poverty of the Great Depression and appalling anti-Semitism. Working at a barbaric mental institution, Arthur saw a better way and conducted groundbreaking research into drug treatments. He also had a genius for marketing, especially for pharmaceuticals, and bought a small ad firm. Arthur devised the marketing for Valium, and built the first great Sackler fortune. He purchased a drug manufacturer, Purdue Frederick, which would be run by Raymond and Mortimer. The brothers began collecting art, and wives, and grand residences in exotic locales. Their children and grandchildren grew up in luxury. Forty years later, Raymond's son Richard ran the family-owned Purdue. The template Arthur Sackler created to sell Valium—co-opting doctors, influencing the FDA, downplaying the drug's addictiveness—was employed to launch a far more potent product: OxyContin. The drug went on to generate

some thirty-five billion dollars in revenue, and to launch a public health crisis in which hundreds of thousands would die. This is the saga of three generations of a single family and the mark they would leave on the world, a tale that moves from the bustling streets of early twentieth-century Brooklyn to the seaside palaces of Greenwich, Connecticut, and Cap d'Antibes to the corridors of power in Washington, D.C. Empire of Pain chronicles the multiple investigations of the Sacklers and their company, and the scorched-earth legal tactics that the family has used to evade accountability. The history of the Sackler dynasty is rife with drama—baroque personal lives; bitter disputes over estates; fistfights in boardrooms; glittering art collections; Machiavellian courtroom maneuvers; and the calculated use of money to burnish reputations and crush the less powerful. Empire of Pain is a masterpiece of narrative reporting and writing, exhaustively documented and ferociously compelling. It is a portrait of the excesses of America's second Gilded Age, a study of impunity among the super elite and a relentless investigation of the naked greed and indifference to human suffering that built one of the world's great fortunes. Introduces the world of Roshar through the experiences of a war-weary royal compelled by visions, a highborn youth condemned to military slavery, and a woman who is desperate to save her impoverished house.

The Cuban Missiles Crisis didn't end peacefully and the 'swinging sixties' didn't happen. On Saturday 27th October 1962 American and Soviet geopolitical brinkmanship resulted in the most terrible war in human history. The forever changed world that remained when the thermonuclear fires had burned themselves out is the world of 'Timeline 10/27/62'. 'Operation Anadyr' is Book 1 of the alternative history series Timeline 10/27/62. 'Operation Anadyr' is about the first hours of that alternative history of the world. It is about living through the cataclysm, and wondering how it happened. How did the unthinkable happen? How could our leaders let it happen? How does one quantify the magnitude of the disaster? And what of the survivors living with the aftermath of a world gone mad? 'Operation Anadyr' confronts these questions. In 'Operation Anadyr' the anatomy of the disaster is writ plain and the men and women who survive it begin to find their voices. * * *Why Timeline 10/27/62? Because that date is a very significant date in my life and in the lives of everybody else in the world alive today because on Saturday 27th October 1962 World War III almost started. World War III probably wouldn't have lasted very long because one side would have been swiftly obliterated in the first 24 hours of a cataclysm that would have left vast tracts of the Northern Hemisphere uninhabited and uninhabitable for decades to come. Perhaps, a quarter of the world's population would have died in the firestorm or in the starvation and the plagues that would have ensued in the following weeks and months. In the October War of 1962 the hammer of the gods would have fallen upon the territories of the Soviet Union, central and Western Europe, and to a lesser extent, upon the extremities of continental North America. In the Soviet Union and in Europe from Paris to Warsaw, from Prague to Berlin, from the Alps to the Baltic, across the Low Countries and parts of the United Kingdom the thermonuclear fire would have burned with a merciless flame. Scandinavia might have escaped relatively untouched, likewise southern France, Italy, Spain and Portugal, Ireland and possibly parts of England, Wales and Scotland. The 'Cuban Missiles' War would have been a Man made global catastrophe like no other in human history. In the aftermath, the USA, mourning the dead in half-a-dozen wrecked cities would have been the last major industrial and military power left standing. That world could never, ever be the world we know today. How close did we actually come to the edge of the abyss? Much closer than most people like to contemplate. On Saturday 27th October 1962, north east of Cuba, the commander of Soviet submarine B-59 had to be talked out of firing a nuclear-tipped torpedo at the American destroyer USS Beale. That's how close we came to World War III! The Captain of the B-59 was a man called Valentin Grigorievitch Savitsky. He gave the order for a nuclear warhead to be fitted to a torpedo. In that era Soviet naval doctrine governing the deployment of tactical nuclear weapons onboard a warship at sea required the authorisation of three officers: the captain, the executive officer, and the vessel's political officer. B-59's political officer, Ivan Semonovich Maslennikov signed off on starting World War III but fortunately for us all, the submarine's second-in-command, Captain 2nd Rank Vasili Arkhipov, dissented and Armageddon was narrowly averted. Timeline 10/27/62 is an alternative history of the modern world in which nobody ever got to know the name of Vasili Arkhipov because he died in the first act of the most terrible war in history. Operation Anadyr is the first verse in the story of what happened after Vasili Arkhipov failed to prevail upon Valentin Grigorievitch Savitsky to see reason. Welcome to the Timeline 10/27/62.

The Business Year: Morocco 2020 is a portrait of the Moroccan economy as seen through the eyes of its economic decision makers. Research for this publication was carried out in a dynamic economic and political context, including a government reshuffle in October 2019, the conclusion of the First Industrial Acceleration plan, the new foundations for the 2020 Finance Bill, and the onset of the COVID-19 pandemic. This 120-page publication aims to provide a platform for the country's decision makers at a time of global uncertainty and act as a guide for investors looking seriously at the North African economy.

From the author of the Jack Ryan series comes an electrifying #1 New York Times bestseller—a standalone military thriller that envisions World War 3... A chillingly authentic vision of modern war, Red Storm Rising is as powerful as it is ambitious. Using the latest advancements in military technology, the world's superpowers battle on land, sea, and air for ultimate global control. It is a story you will never forget. Hard-hitting. Suspenseful. And frighteningly real. "Harrowing...tense...a chilling ring of truth."—TIME

For decades, traditional medicine had very little to offer for individuals suffering from multiple sclerosis and other autoimmune diseases. Today, medical science has brought us wave upon wave of immunomodulatory medications to try to slow disease progression. Unfortunately, these medications come with their own health- and life-threatening side effects. And sometimes, they just stop working. "Fighting the Dragon: How I Beat Multiple Sclerosis" is the story of one woman's thirty year battle with multiple sclerosis and what she did to reclaim her life when she realized she would need an assisted living facility within a few years. The book contains detailed descriptions of what worked and what did not, where she got the help she needed (and how the reader can locate these resources within his/her own community), and the logic behind the non-conventional therapies. "Fighting the Dragon" is a narrative of courage-courage driven by desperation, a story written by a patient who decided, when her neurologist told her, "You will never walk normally again," that she would dance. "Fighting the Dragon" is also a book the MS patient can take to his/her physician . . . it contains well-researched, easy-to-follow guidelines for what to do and how. The information is also applicable to a wide range of other autoimmune conditions, cancers, and AIDS. * * * * * Excerpt: . . . if your car kept breaking down and the mechanic you took it to kept doing the same thing to fix it-but it did not stay fixed, you would question the mechanic's competence. Maybe the mechanic pulled out a technical manual. "See. I fixed it exactly as the manual said. This is the industry-approved way to solve this problem." When the car broke down again a week later, would you be satisfied? Probably not. You might decide it is time to replace the car. But that might be too expensive. So, what to do? If you were

smart, you would probably try to find a new mechanic. You might ask your friends who they would recommend. You might search on the Internet to see if other people had the same experience with their cars . . . and what caused the problem. You might telephone some repair shops to get some idea of what they thought the problem might be. If you found a new mechanic and that mechanic looked over the car and said, "I have a solution that is not in any industry-approved repair manuals, but it is safe and it works,"-would you walk away and go back to the first mechanic who never got it right? Why is your health worth any less than your car?

Based on the blockbuster podcast where the McElroy brothers and their dad play a tabletop RPG and illustrated by cartooning powerhouse Carey Pietsch, *The Adventure Zone: The Crystal Kingdom* takes this #1 New York Times bestselling series to haunting new heights. A desperate call for help interrupts holiday celebrations at the Bureau of Balance, and sends Taako, Magnus and Merle on a high-stakes mission to find and Reclaim a fourth deadly relic: a powerful transmutation stone, hidden somewhere in the depths of a floating arcane laboratory that's home to the Doctors Maureen and Lucas Miller. An unknown menace has seized control of the stone, and is using it to transform the lab into a virulent pink crystal that spreads to everything it touches. It's only a matter of time before this sparkling disaster crash-lands, but in order to find the stone and save the whole planet from being King Midased, our heroes will have to fight their way through a gauntlet of rowdy robots and crystal golems, decide whether they can trust the evasive Lucas Miller, and solve the mystery of what—or who—has put them all in peril, before there's no world left to save.

When the ruthless Chancellor Palpatine issues his nefarious Order 66, which calls for the extermination of the Jedi, the members of the Omega and Delta squads are faced with a desperate choice between the Order and their loyalty to their Jedi allies.

The Ancient Greeks called the Straits of Gibraltar the 'Pillars of Hercules'. The Rock of Gibraltar was the northern pillar; Monte Hacho in Ceuta its probable southern analogue. To the ancients the Pillars of Hercules delineated the western end of the known Mediterranean World. Beyond lay the limitless, impassable vastness of the Atlantic; wherein lay monsters... It is December 1963 and the tensions that have been simmering since the October War have come to the boil in an atmosphere of mistrust and suspicion so poisonous, that nobody in England or Washington DC has realised that in the background there is a third, malignant force at work. When the CIA is implicated in the attempted assassination of the Royal Family, United States aircraft subsequently attack two British destroyers off the coast of Northern Spain and take part in a devastating surprise raid on the Maltese Archipelago, the belligerence of General Franco's government over Gibraltar and the sabre-rattling of the new fascist Government of Italy suddenly assumes the proportions of a Machiavellian American plot to drive the final nail into the coffin of the British Empire. In England the hard-pressed United Kingdom Interim Emergency Administration is struggling to feed and house its survivors; and every time it tries to talk to the Kennedy Administration nobody is available to take its call. On Malta hundreds are dead, thousands injured. Bunker-buster bombs have destroyed practically every key headquarters building, Sunken British warships lie in the oil-fouled waters of the Grand Harbour and Sliema Creek, and the medical facilities of the islands have been overwhelmed. Off the Straits of Gibraltar a Royal Navy carrier battle group is fending off mass attacks by the antiquated Spanish Air Force and harrying Franco's army and navy as they press around the beleaguered Rock, while far out at sea the Royal Navy's one nuclear powered attack submarine, HMS Dreadnought, is playing a deadly game of cat and mouse with two US Navy submarines. Britain and the United States of America are a heartbeat away from war. Never have two nations been so grievously separated by their common language. It is as if every word the former allies say to each other is being passed through a filter that translates 'peace' into 'war'.

The individual 'episodes' each explore a number of plot branches, and develop themes continuously from book to book. Inevitably, in any series some exposition and extemporization is unavoidable but I try - honestly, I do - to keep this to a minimum as it tends to slow down the pace of the stories I am telling. In writing each successive addition to the Timeline 10/27/62 'verse' it is my implicit assumption that my readers will have read the previous books in the series in sequence, and that my readers do not want their reading experience to be overly impacted by excessive re-hashing of the events in previous books. Humbly, I suggest that if you are 'hooked' by the Timeline 10/27/62 Series that reading the books in sequence will - most likely - enhance your enjoyment of the experience._____This edition was re-proofed, re-formatted and re-published on 2nd August 2017.

This book combines recent information and discoveries in the field of human molecular biology and human molecular evolution. In the name of fighting terrorism, countries have been invaded; wars have been waged; people have been detained, rendered and tortured; and campaigns for "hearts and minds" have been unleashed. Human rights analyses of the counter-terrorism measures implemented in the aftermath of 11 September 2001 have assumed that men suffer the most--both numerically and in terms of the nature of rights violations endured. This assumption has obscured the ways that women, men, and sexual minorities experience counter-terrorism. By integrating gender into a human rights analysis of counter-terrorism--and human rights into a gendered analysis of counter-terrorism--this volume aims to reverse this trend. Through this variegated human rights lens, the authors in this volume identify the spectrum and nature of rights violations arising in the context of gendered counter-terrorism and national security practices. Introduced with a foreword by Martin Scheinin, former UN Special Rapporteur on Human Rights and Counter-Terrorism, the volume examines a wide range of gendered impacts of counter-terrorism measures that have not been theorized in the leading texts on terrorism, counter-terrorism, national security, and human rights. Gender, National Security and Counter-Terrorism will be of particular interest to scholars and students in the disciplines of Law, Security Studies and Gender Studies.

Already a classic of war reporting and now reissued as a Grove Press paperback, *Black Hawk Down* is Mark Bowden’s brilliant account of the longest sustained firefight involving American troops since the Vietnam War. On October 3, 1993, about a hundred elite U.S. soldiers were dropped by helicopter into the teeming market in the heart of Mogadishu, Somalia. Their mission was to abduct two top lieutenants of a Somali warlord and return to base. It was supposed to take an hour. Instead, they found themselves pinned down through a long and terrible night fighting against thousands of heavily armed Somalis. The following morning, eighteen Americans were dead and more than seventy had been badly wounded. Drawing on interviews from both sides, army records, audiotapes, and videos (some of the material is still classified), Bowden’s minute-by-minute narrative is one of the most exciting accounts of modern combat ever written—a riveting story that captures the heroism, courage, and brutality of battle.

A NEW YORK TIMES NOTABLE BOOK OF 2020 NAMED A BEST BOOK OF THE YEAR BY * THE WASHINGTON POST * THE ECONOMIST * NEW SCIENTIST *

PUBLISHERS WEEKLY * THE GUARDIAN From one of the most dynamic rising stars in astrophysics, an “engrossing, elegant” (The New York Times) look at five ways the universe could end, and the mind-blowing lessons each scenario reveals about the most important concepts in cosmology. We know the universe had a beginning. With the Big Bang, it expanded from a state of unimaginable density to an all-encompassing cosmic fireball to a simmering fluid of matter and energy, laying down the seeds for everything from black holes to one rocky planet orbiting a star near the edge of a spiral galaxy that happened to develop life as we know it. But what happens to the universe at the end of the story? And what does it mean for us now? Dr. Katie Mack has been contemplating these questions since she was a young student, when her astronomy professor informed her the universe could end at any moment, in an instant. This revelation set her on the path toward theoretical astrophysics. Now, with lively wit and humor, she takes us on a mind-bending tour through five of the cosmos’s possible finales: the Big Crunch, Heat Death, the Big Rip, Vacuum Decay (the one that could happen at any moment!), and the Bounce. Guiding us through cutting-edge science and major concepts in quantum mechanics, cosmology, string theory, and much more, *The End of Everything* is a wildly fun, surprisingly upbeat ride to the farthest reaches of all that we know.

'The Burning Time' is Book 5 of the alternative history series Timeline 10/27/62. It is February 1964 in a World in which the 'swinging sixties' never happened. The atomic mushroom clouds over the Mediterranean have dispersed and now as the World teeters on the brink of a new thermonuclear war, it is dawning on the 'victors' that their 'victory', far from being absolute, was tragically pyrrhic. In the uneasy half-peace the United States stirs from its post-Cuban Missiles War slumber. But will it awaken soon enough to overcome its own divisions to confront the new and terrible forces unleashed by Red Dawn's first paroxysm of violence? Now is a time for betrayal. Now is judgement day when all the mistakes of the months since the October War will come back to haunt the 'victors'._____ This re-proofed, re-formatted and re-presented edition was uploaded on 24th August 2017.
