The gripping story of one man's fight for survival as a divided superpower stands on the brink of a bloody civil war. It's July 2030. The American States are no longer united, as the 'Tea Party' Republicans have seceded from the Union to form a new nation, the Confederate Christian States of America. For a decade the two ideological rivals have faced off against each other across the intra-American frontier. It's an uneasy truce that begins to crumble as a tragic incident pushes both sides to the very brink. Joshua Hamilton is a liberal with a history of political activism. Regarded as a traitor by the ultra-conservative population of the Arizona Strip where he lives, he has been blacklisted by the government security apparatus. His plans to cross the border to start a new life in the remnant United States are thrown into disarray when the brutal murder of a friend forces him to re-evaluate his priorities. As America creeps ever closer to a potentially catastrophic civil war he finds himself embroiled in a high risk mission. If the operation succeeds he will gain everything he desires. If it fails, his life will be over. From the author of the much acclaimed THE WAR OF ZERO-SUM, this is a fast moving thriller that will grip you from the first page to the last. This powerful drama examines the fears of parents driven to do "the right thing" when the safety of their daughter is in doubt. The fourth Pony Club Secrets adventure by bestselling author of *The Princess and the Foal*.

Affective Health and Masculinities in South Africa explores how different masculinities modulate substance use, interpersonal violence, suicidality, and AIDS as well as recovery cross-culturally. With a focus on three male protagonists living in very distinct urban areas of Cape Town, this comparative ethnography shows that men's struggles to become invulnerable increase vulnerability. Through an analysis of masculinities as social assemblages, the study shows how affective health problems are tied to modern individualism rather than African 'tradition' that has become a cliché in Eurocentric gender studies. Affective health is conceptualized as a balancing act between autonomy and connectivity that after colonialism and apartheid has become compromised through the imperative of self-reliance. This book provides a rare perspective on young men's vulnerability in everyday life that may affect the reader and spark discussion about how masculinities in relationships shape physical and psychological health. Moreover, it shows how men change in the face of distress in ways that may look different than global health and gender-transformative approaches envision. Thick descriptions of actual events over the life course make the study accessible to both graduate and undergraduate students in the social sciences. Contributing to current debates on mental health and masculinity, this volume will be of interest to scholars from various disciplines including anthropology, gender studies, African studies, psychology, and global health.
