The Routledge Handbook of Entrepreneurship in Developing Economies is a landmark volume that offers a uniquely comprehensive overview of entrepreneurship in developing countries.

Addressing the multi-faceted nature of entrepreneurship, chapters explore a vast range of subject areas including education, economic policy, gender and the prevalence and nature of informal sector entrepreneurship. In order to understand the process of new venture creation in developing economies, what it means to be engaged in entrepreneurship in a developing world context must be addressed. This handbook does so by exploring the difficulties, risks and rewards associated with being an entrepreneur, and evaluates the impacts of the environment, relationships, performance and policy dynamics on small and entrepreneurial firms in developing economies. The handbook brings together a unique collection of over forty international researchers who are all actively engaged in studying entrepreneurship in a developing world context. The chapters offer concise but detailed perspectives and explanations on key aspects of the subject across a diverse array of developing economies, spanning Africa, Asia, Latin America and Eastern Europe. In doing so, the chapters highlight the heterogeneity of entrepreneurship in developed economies, and contribute to the on-going policy discourses for managing and promoting entrepreneurial growth in the developing world. The book will be of great interest to scholars, students and policymakers in the areas of development economics, business and management, public policy and development studies.

Since the mid-1980s, the psychology of liberation movement has been a catalyst for collective and individual change in communities throughout Latin America, and beyond; and recent political developments are making its powerful, transformative ideas more relevant than ever before. Psychology of Liberation: Theory and Applications updates the activist frameworks developed by Ignacio Martin-Baro and Paulo Freire with compelling stories from the frontlines of conflict in the developing and developed worlds, as social science and psychological practice are allied with struggles for peace, justice, and equality. In these chapters, liberation is presented as both an ongoing process and a core dimension of wellbeing, entailing the reconstruction of social identity and the transformation of all parties involved, both oppressed and oppressors. It also expands the social consciousness of professionals, bringing more profound meaning to practice and enhancing related areas such as peace psychology, as shown in articles such as these: Philippines: the role of liberation movements in the transition to democracy. Venezuela: liberation psychology as a therapeutic intervention with street youth. South Africa: the movement for representational knowledge. Muslim world: religion, the state, and the gendering of human rights. Ireland: linking personal and political development. Australia: addressing issues of racism, identity, and immigration. Colombia: building cultures of peace from the devastation of war.

Psychology of Liberation demonstrates the commitment to overcome social injustices and oppression. The book is a critical resource for social and community psychologists as well as policy analysts. It can also be used as a text for graduate courses in psychology, sociology, social work and community studies.

First published in 1943, *The Little Prince* by Antoine de Saint-Exupéry has been translated into more than 250 languages, becoming a global phenomenon. The Sahara desert is the scenery of Little Prince's story. The narrator's plane has crashed there and he has scarcely some food and water to survive. Trying to comprehend what caused the crash, the Little Prince appears. The serious blonde little boy asks to draw him a sheep. The narrator consents to the strange fellow's request. They soon become friends and the Little Prince informs the pilot that he is from a small planet, the asteroid 325, talks to him about the baobabs, his planet volcanoes and the mysterious rose that grew on his planet. He also talks to him about their friendship and the lie that evoked his journey to other planets. Often puzzled by the grown-ups' behavior, the little traveler becomes a total and eternal symbol of innocence and love, of responsibility and devotion. Through him we get to see how insightful children are and how grown-ups aren't. Children use their heart to feel what's really important, not the eyes. Heart-breaking, funny and thought-provoking, it is an enchanting and endlessly wise fable about the human condition and the power of imagination. A book about both childhood and adulthood, it can be read as a parable, a war story, a classic children's fairy-tale, and many more things besides: *The Little Prince* is a book for everyone; after all, all grown-ups were children once.

This book proposes an innovative approach to general nouns. General nouns are defined as high-frequency nouns that are characterized by their textual functions. Although the concept is motivated by Halliday & Hasan (1976), the corpus theoretical approach adopted in the present study is fundamentally different and set in a linguistic framework that prioritizes lexis. The study investigates 20 nouns that are very frequent in mainstream English, as represented by the Bank of English Corpus. The corpus-driven approach to the data involves a critical discussion of descriptive tools, such as patterns, semantic prosodies, and primings of lexical items, and the concept of? local textual functions? is put forward to characterize the functions of the nouns in texts. The study not only suggests a characterization of general nouns, but also stresses that functions of lexical items and properties of texts are closely linked. This link requires new ways of describing language.

Presents a guide to Jane Austen's work in the context of her contemporary world

There is nothing new about evil; it has been with us since time immemorial. But there is something new about the kind of evil that characterizes our contemporary liquid-modern world. The evil that characterized earlier forms of solid modernity was concentrated in the hands of states claiming monopolies on the means of coercion and using the means at their disposal to pursue their ends ends that were at times horrifically brutal and barbaric. In our contemporary liquid-modern societies, by contrast, evil has become altogether more pervasive and at the same time less visible. Liquid evil hides in the seams of the canvass woven daily by the liquid-modern mode of human interaction and commerce, conceals itself in the very tissue of human cohabitation and in the course of its routine and day-to-day reproduction. Evil lurks in the countless black holes of a thoroughly deregulated and privatized social space in which cutthroat competition and mutual estrangement have replaced cooperation and solidarity, while forceful individualization erodes the adhesive power of inter-human bonds. In its present form evil is hard to spot, unmask

and resist. It seduces us by its ordinariness and then jumps out without warning, striking seemingly at random. The result is a social world that is comparable to a minefield: we know it is full of explosives and that explosions will happen sooner or later but we have no idea when and where they will occur. In this new book, the sequel to their acclaimed work *Moral Blindness* Zygmunt Bauman and Leonidas Donskis guide the reader through this new terrain in which evil has become both more ordinary and more insidious, threatening to strip humanity of its dreams, alternative projects and powers of dissent at the very time when they are needed most.

This book looks at entrepreneurship and innovation as ways out of the economic crisis in Europe and other regions, and examines the main theoretical issues and practices related to this analysis. The volume addresses such questions as: From an institutional perspective, how do economic crisis conditions affect different types of entrepreneurs and entrepreneurship? Is it useful for public policymakers and entrepreneurs to understand the basic characteristics of entrepreneurial activity, relations between the institutional environment and entrepreneurship and among entrepreneurship, innovation and social change? Featuring case studies from several industries and countries, and a variety of methodological, theoretical, and empirical approaches, the authors build a compelling narrative on the dynamics of entrepreneurship and innovation as drivers of economic growth and organizational renewal. They demonstrate that the strategic and operational relationships that entrepreneurship creates within and outside the enterprise are a fundamental route for leading and mobilizing economic and social resources that permit innovation at the organizational level and in relationships with suppliers, customers, and other stakeholders - in turn, enabling technological innovation, creating new revenue streams through new productive activities and new demand, and ultimately facilitating emergence from economic crisis. The authors consider social, gender, and generational aspects of entrepreneurship, as well as the institutional conditions necessary to promote entrepreneurial activity.

The aim of the book is to record fact and dispel rumour on the fascinating publishing history of the Harry Potter series.

Para satisfacer las exigencias educativas contemporáneas hay que idear algún nuevo tipo de solución, como por ejemplo, una asignatura terminal avanzada dirigida a estudiantes principiantes. Esta paradoja ha creado un vacío en cuanto a libros de texto se refiere. El presente libro, *Química analítica moderna*, del Profesor Pickering, constituye un interesante ensayo de llenar este vacío. El libro de Pickering es un texto conciso adecuado para alumnos de tercer o cuarto año de carrera.

The maltreatment of children is an issue that has always been with us and civilized societies provide a range of services both social and medical to care for the children and families afflicted. In recent years, greater attention has been drawn to the medical aspects by competent authorities in the fields of forensic medicine, forensic psychiatry, epidemiological psychiatry, child psychiatry and family psychiatry; as well as the social aspects by those child welfare and child care agencies who have the difficult and distasteful task of removing children, with the help of the courts, from parents who can abuse them and are not able to care for them adequately. A multitude of social agencies, whose range of activities involve both the care and, where possible, the social betterment of afflicted families are now involved. Not least in importance is an increase in our global knowledge to help in the prevention or better treatment of these problems. This means more information on familial and genetic factors in human central nervous system development in its broadest sense. This would include how the central nervous system originates, mediates and controls the build up, speed of development and impulsive release, mastery and direction of aggressive drives and impulses. Very little is so far known about these factors.
